Krieg,2019-07-11 Apply statistics to your everyday life

Statistics and Data Analysis for Social Science helps students to build a strong foundational understanding of statistics by providing clarity around when and why statistics useful Rather than focusing on the how to of statistics author Eric J Krieg simplifies the complexity of statistical calculations by introducing only what is necessary to understanding each concept Every chapter is written around and applied to a different social problem or issues enabling students to broaden their imagination about the statistical tools that can be used to make sense of our world and maybe to make the world a better place In addition to updating all the tables and examples with new data the Second Edition has replaced the section on SPSS with three new sets of exercises at the end of each chapter Chapter Exercises for students complete during their reading and bring questions to class In Class Exercises that focus on the areas that students struggled with during their reading and Homework Exercises that can be assigned if students need extra practice with the concepts **Transatlantic Travels in**

What is Society? Earl R. Babbie,1994 The most difficult issue for teachers of introductory sociology is how to communicate to students the power of social structure and its relationship to individual human behaviour and experience In this provocative new work Babbie addresses the task helping to teach and to provoke the sociological imagination whilst also exploring what is produced and institutionalized through social interaction and organization *Sociology* David M. Deciphering Violence Karen A. Cerulo,2023-04-28 In the current information age Americans are bombarded daily with stories and images portraying a rising tide of violence Drawing on media that includes television newspaper fiction film painting and photography as well as interviews and focus groups Karen Cerulo explores the ways in which individuals think

about depict and evaluate violence Moving beyond typical studies that focus on violent story content Deciphering Violence decodes the role of story structure itself and how the sequencing of facts can systematically influence our moral judgements of violent acts The book identifies institutionalized forms of violent storytelling and raises new possibilities both for decreasing public tolerance of violence and increasing social control of the phenomenon *Blurring The Boundaries* Jack Levin, 2013-02-11 Over the decades the lines separating young middle aged and older adults have blurred as indicated by a broadening of the appropriate years for making life decisions Not only are many people marrying later but some are marrying earlier than ever Overall women giving birth later but some are having children earlier in their lives Older people are retiring later but some are retiring at a younger age The spread or variability standard deviation of age based decisions has increased substantially giving adults greater freedom from the traditional constraints of age With these relaxed age norms has come a host of related social problems The relaxation of age norms for adult decision making has inadvertently blurred the boundaries between adults and teenagers between teenagers and children This generalization of the phenomenon throughout the life cycle is responsible for the adultification of childhood Eight year old girls are to an increasing extent being treated as sexual objects bullying peaks in the 6th grade larger numbers of girls are having oral sex or sexual intercourse by the age of 15 the pregnancy rate for girls 13 15 is on the rise we are in the process of dismantling the juvenile justice system in favor of adult forms of punishment and more and more children are left without adult supervision in the afternoons as though they were miniature adults who are capable of raising themselves Jack Levin is the American Sociological Association's 2009 Winner of the Public Understanding of Sociology Award This short book communicates the power and importance of sociological thinking to major worldwide social trends Ideal for use in undergraduate courses such as introductory sociology social problems and social change as well as more advanced courses in population or sociology of aging **Culturally Relevant Arts Education for Social Justice** Mary Stone Hanley, Gilda L Sheppard, George W. Noblit, Thomas Barone, 2013-08-21 A groundswell of interest has led to significant advances in understanding and using Culturally Responsive Arts Education to promote social justice and education This landmark volume provides a theoretical orientation to these endeavors Examining a range of efforts across different forms of art various educational settings and diverse contexts it foregrounds the assets of imagination creativity resilience critique and cultural knowledge working against prevailing understandings of marginalized groups as having deficits of knowledge skills or culture Emphasizing the arts as a way to make something possible it explores and illustrates the elements of social justice arts education as a way out of no way imposed by dominance and ideology A set of powerful demonstrations shows how this work looks in action Introductions to the book as a whole and to each section focus on how to use the chapters pedagogically The conclusion pulls back the chapters into theoretical and pedagogical context and suggests what needs done to be done practically empirically and theoretically for the field to continue to develop **Universal Localities** Galin

Tihanov,2022-07-02 The volume features the work of leading scholars from the US UK Germany China Spain and Russia and presents an important contribution to current debates on world literature The contributions discuss various facets of the historically changing role and status of language in the construction of notions of universality and locality of difference foreignness and openness they explore the relationship between world literature and bilingualism supranational languages dialects and linguistic inbetweenness They also examine the larger social and political stakes behind both foundational and more recent attempts to articulate ideas of world literature Mapping the space between philology anthropology and ecohumanities the essays in this volume approach world literature with sophisticated methodological toolkits and open up new opportunities for engaging with this important discursive framework Disciplines of Modernity Saurabh Dube,2022-10-14 Scrupulously based in anthropology and history and drawing on social theory and critical thought this book revisits the disciplines archives and subjects of modernity There are at least three interleaving emphases here To begin with the work rethinks institutionalized formations of anthropology and history together with archives at large as themselves intimating disciplines of modernity Understood in the widest senses of the terms these disciplines are constitutively contradictory Moreover the study interrupts familiar projections of modern subjects as molded a priori by a disenchanted calculus of interest and reason It tracks instead the affective embodied and immanent attributes of our varied worlds as formative of subjects of modernity sown into their substance and spirit Finally running through the book is a querying of entitlement and privilege that underlie social terrains and their scholarly apprehensions articulating at once distinct elites pervasive plutocracies and modern scholasticisms
