Sociology And Psychology Of Terrorism:

The Sociology and Psychology of Terrorism Rex A. Hudson, 1999 The Sociology and Psychology of Terrorism Rex A. Hudson, Andrea M. Savada, Helen C. Metz, 2011-06-30

The purpose of this study is to focus attention on the types of individuals and groups that are prone to terrorism see Glossary in an effort to help improve U S counterterrorist methods and policies The emergence of amorphous and largely unknown terrorist individuals and groups operating independently freelancers and the new recruitment patterns of some groups such as recruiting suicide commandos female and child terrorists and scientists capable of developing weapons of mass destruction provide a measure of urgency to increasing our understanding of the psychological and sociological dynamics of terrorist groups and individuals The approach used in this study is twofold First the study examines the relevant literature and assesses the current knowledge of the subject Second the study seeks to develop psychological and sociological profiles of foreign terrorist individuals and selected groups to use as case studies in assessing trends motivations likely behavior and actions that might deter such behavior as well as reveal vulnerabilities that would aid in combating terrorist groups and individuals Because this survey is concerned not only with assessing the extensive literature on sociopsychological aspects of terrorism but also providing case studies of about a dozen terrorist groups it is limited by time constraints and data availability in the amount of attention that it can give to the individual groups let alone individual leaders or other members Thus analysis of the groups and leaders will necessarily be incomplete A longer study for example would allow for the collection and study of the literature produced by each group in the form of autobiographies of former members group communiqu s and manifestos news media interviews and other resources Much information about the terrorist mindset see Glossary and decision making process can be gleaned from such sources Moreover there is a language barrier to an examination of the untranslated literature of most of the groups included as case studies herein

Sociology and Psychology of Terrorism Rex A. Hudson, 2010 The purpose of this book is to focus attention on the types of individuals and groups that are prone to terrorism in an effort to help improve U S counter terrorist methods and policies The emergence of amorphous and largely unknown terrorist individuals and groups operating independently freelancers and the new recruitment patterns of some groups such as recruiting suicide commandos female and child terrorists and scientists capable of developing weapons of mass destruction provide a measure of urgency to increasing our understanding of the psychological and sociological dynamics of terrorist groups and individuals The approach used in this study is twofold First the study examines the relevant literature and assesses the current knowledge of the subject Second the study seeks to develop psychological and sociological profiles of foreign terrorist individuals and selected groups to use as case studies in assessing trends motivations likely behaviour and actions that might deter such behaviour as well as reveal vulnerabilities that would aid in combating terrorist groups and individuals This book is not about terrorism per se Rather it is concerned with the perpetrators of terrorism Prepared from a social sciences perspective it attempts to

synthesise the results of psychological and sociological findings of studies on terrorists published in recent decades and provide a general assessment of what is presently known about the terrorist mind and mindset

The Sociology and Psychology of Terrorism Federal Research Division, 2015-04-10 The purpose of this study is to focus attention on the types of individuals and groups that are prone to terrorism see Glossary in an effort to help improve U S counter terrorist methods and policies The emergence of amorphous and largely unknown terrorist individuals and groups operating independently freelancers and the new recruitment patterns of some groups such as recruiting suicide commandos female and child terrorists and scientists capable of developing weapons of mass destruction provide a measure of urgency to increasing our understanding of the psychological and sociological dynamics of terrorist groups and individuals The approach used in this study is twofold First the study examines the relevant literature and assesses the current knowledge of the subject Second the study seeks to develop psychological and sociological profiles of foreign terrorist individuals and selected groups to use as case studies in assessing trends motivations likely behavior and actions that might deter such behavior as well as reveal vulnerabilities that would aid in combating terrorist groups and individuals Because this survey is concerned not only with assessing the extensive literature on socio psychological aspects of terrorism but also providing case studies of about a dozen terrorist groups it is limited by time constraints and data availability in the amount of attention that it can give to the individual groups let alone individual leaders or other members Thus analysis of the groups and leaders will necessarily be incomplete A longer study for example would allow for the collection and study of the literature produced by each group in the form of autobiographies of former members group communiques and manifestos news media interviews and other resources Much information about the terrorist mindset see Glossary and decision making process can be gleaned from such sources Moreover there is a language barrier to an examination of the untranslated literature of most of the groups included as case studies herein Terrorism databases that profile groups and leaders quickly become outdated and this report is no exception to that rule In order to remain current a terrorism database ideally should be updated periodically New groups or terrorist leaders may suddenly emerge and if an established group perpetrates a major terrorist incident new information on the group is likely to be reported in news media Even if a group appears to be quiescent new information may become available about the group from scholarly publications There are many variations in the transliteration for both Arabic and Persian The academic versions tend to be more complex than the popular forms used in the news media and by the Foreign Broadcast Information Service FBIS Thus the latter usages are used in this study For example although Ussamah bin Ladin is the proper transliteration the more commonly used Osama bin Laden is used in this study

Sociology and Psychology of Terrorism K. L. Tuli, Avinash Bharti, 2011 Visions of the Apocalypse Wheeler Winston Dixon, 2003-09-17 Visions of the Apocalypse examines the cinema's fascination with the prospect of nuclear and or natural annihilation as seen in such films as Saving Private Ryan Bowling for Columbine We Were Soldiers Invasion U S A The Last War Tidal Wave The Bed Sitting

Room The Last Days of Man on Earth and numerous others It also considers the ways in which contemporary cinema has become increasingly hyper conglomerised leading to films with ever higher budgets and fewer creative risks Along the way the author discusses such topics as the death of film itself to be replaced by digital video the political and social tensions that have made these visions of infinite destruction so appealing to the public and the new wave of Hollywood war films coupled with escapist comedies in the post 9 11 era Encompassing both questions of physical and filmic mortality Visions of the Apocalypse is a meditation on the questions of time memory and the cinema s seemingly unending appetite for spectacles of destruction

Universal Human Rights David A. Reidy, Mortimer N. S. Sellers, 2005-07-21 Universal Human Rights brings new clarity to the important and highly contested concept universal human rights The Charter of the United Nations commits nearly all nations of the world to promote to realize and take action to achieve human rights and fundamental freedoms for all yet this formal consensus masks an underlying confusion about the philosophical basis and practical implications of rights in a world made up of radically different national communities This collection of essays explores the foundations of universal human rights in four sections devoted to their nature application enforcement and limits concluding that shared rights help to constitute a universal human community which supports local customs and separate state sovereignty Rights protect the benefits of cultural diversity while recognizing the universal dignity that every human life deserves The eleven contributors to this volume demonstrate from their very different perspectives how human rights can help to bring moral order to an otherwise divided world

The Pathology of Man Steven J. Bartlett, 2005
