Sociology And Religion**bociologie Et Religions:**

Sociologie Et Religions Liliane Voyé, Jaak Billiet, 1999 What are the relations between sociology and the different religions Christianity with its various branches Judaism Islam Oriental religions sects and New Religious Movements That is the question which this work conceived on the occasion of the XXVth Conference of the International Society for the Sociology of Religion Soci t Internationale de Sociologie des Religions SISR wishes to clarify The book retraces the varied and troubled history of these relations and also reveals how in opening up its research to other religions besides the Christian sociology is forced to redefine the very object of its field of study What is the religious This question which until recently was considered impertinent informs this book throughout It confronts the necessity of rethinking theories and methodological approaches which constructed in the context of 19th and early 20th century Western Europe prove to be rather inadequate for encompassing contemporary religious phenomena and religious manifestations in other contexts To these new theoretical and methodological demands is added for the sociologist a deontological imperative which takes on all the more importance today as the religious provokes passionate social debate Textual, Comparative, Sociological, and Cognitive Approaches Peter Antes, Armin W. Geertz, Randi R. Warne, 2008-12-19 Since its founding by Jacques Waardenburg in 1971 Religion and Reason has been a leading forum for contributions on theories theoretical issues and agendas related to the phenomenon and the study of religion Topics include among others category formation comparison ethnophilosophy hermeneutics methodology myth phenomenology philosophy of science scientific atheism structuralism and theories of religion From time to time the series publishes volumes that map the state of the art and the history of the discipline Religious Education at Schools in Europe Martin Rothgangel, Robert Jackson, Martin Jäggle, 2014-05-14 The project Religious Education at Schools in Europe REL EDU which is divided up into six volumes Central Europe Western Europe Northern Europe Southern Europe South Eastern Europe Eastern Europe aims to research the situation with regard to religious education in Europe The second volume outlines the organisational form of religious education in the countries of Western Europe England Ireland Northern Ireland Scotland Wales Belgium France Luxembourg Netherlands This is done on the basis of thirteen key issues which allows specific points of comparison between different countries in Europe Thereby the volume focusses the comparative approach and facilitates further research into specific aspects of the comparison **Bibliographie Internationale de L'histoire Des Religions**, 1954 The Salt of the Earth Martyn Percy, 2016-10-06 This is a sparkling collection of essays by one of Britain's best known and acute commentators of the church scene and of contemporary religious life Martyn Percy explores new liberalism the churches and human rights in the European Union football and religion pilgrimage demonology common spirituality religious attitudes to nudity and the relationship between religion and advertising The argument running throughout this book is that despite claims and the appearance of increasing secularity the influence of religious themes and values on our everyday life remains pervasive The Secularization Debate William H. Swatos (Jr.), 2000 Introduced to

social scientific audiences by Max Weber the concept of secularization has had a major influence on the way in which religion has been understood in the West But at least since the late 1980s both the predictive and the descriptive adequacy of this concept have been seriously challenged In the face of this challenge The Secularization Debate offers a timely summary of the critical issues that have arisen over the past decade With its wide range of essays by prominent international scholars The Secularization Debate is sure to become a pivotal volume for anyone interested in the hotly contested concept of secularization and its continued relevance to the study of religion

Introduction to the Social Sciences (RLE Social Theory)
Maurice Duverger, 2020-09-10 Professor Duverger at last provides the student with an overall view of the methodology of the social sciences He briefly traces the origin of the notion of a social science showing how it emerged from social philosophy Its essential elements and pre conditions are described the splintering of social science into specialist disciplines is explained and the need for a general sociology confirmed The techniques of observation used by social scientists are dealt with in some detail and the unity of the social sciences is illustrated by examples of the universal application of these techniques Documentary evidence in its various forms are described along with the basic analytical techniques including quantitative methods and content analysis Other methods of gathering information through polls interviews attitude scales and participant observation are all described Professor Duverger brings together the different kinds of analysis used to assess the information thus gathered Arguing that observing and theorizing are not two different stages or levels of research he examines the practical value and difficulties of general sociological theories partial theories and models and working hypotheses He both describes and assesses the limitations of experiment and the scope of comparative methods in the social sciences He then gives elementary instructions for using and assessing the value of mathematical techniques The possibilities of presenting social phenomena through graphs and charts are also explored There are useful book lists and diagrams

Gifts and Interests Antoon Vandevelde, 2000 According to a common understanding of economics economists attempt to understand and explain societal reality in the light of individual self interest For them a gift is no exception to this except for the slight and misleading veil of altruism which covers a purely egoistic motivation On the other hand theologians philosophers and ethicists use a more normative concept of man Man realises his best potential through deeds of selfless sacrifice that remain unknown to everyone In reality however people are either entirely egoistic nor altruistic Marcel Mauss model of the gift is interesting because it seems to escape the classical or rather modern egoism altruism dichotomy Gifts are not primarily motivated by the well being of myself or the other but rather by the desire to bring about or maintain a certain kind of social relation between giver and receiver Altruistic as well as egoistic motivations are an integral part of that relation The role of gifts in the constitution of social relations and social cohesion explains why most kinds of gifts are reciprocal and even obligatory In this book anthropologists sociologists and economists as well as philosophers focus on the question of the relevance of Mauss work on the gift for the understanding of actual social phenomena

The Sociology of

Religion George Lundskow, 2008-06-10 Most Sociology of Religion texts are decidedly staid and uninteresting covering contemporary developments which are only contemporary only from a disciplinary perspective They are not contemporary if viewed from the perspective of the religion's practitioners in religious and non religious settings The textbooks that attempt to be interesting to undergraduate students often fall short because they either try to cover too much in an encyclopedic format or sacrifice a sociological perspective for a personal one Many use real life examples only superficially to illustrate concepts Lundskow's approach is the opposite students will learn the facts of religion in its great diversity all the most interesting and compelling beliefs and practices and then learn relevant concepts that can be used to explain empirical observations The book thus follows the logic of actual research investigate and then analyze rather than approaching concepts with no real bearing on how religion is experienced in society This approach using provocative examples and with an eye toward the historical and theoretical not to mention global experience of religion will make this book a success in the classroom The author envisions a substantive approach that examines religion as it actually exists in all its forms including belief ritual daily living identity institutions social movements social control and social change Within these broad categories the book will devote particular chapters to important historical moments and movements leaders and various individual religions that have shaped the contemporary form and effect of religion in the world today

Territories of Faith Sven Sterken, Eva Weyns, 2022-01-28 A novel and interdisciplinary perspective on post war church building In the 1950s and 1960s thousands of churches were built across Europe in an attempt to keep up with the continent's rapid urbanisation This book addresses the immense effort related to the planning financing and construction of this new religious infrastructure Going beyond aspects of style and liturgy and transcending a focus on particular architects or regions this volume considers church building at the crossroads of pastoral theology religious sociology and urban planning Presenting the rich palette of strategies and methods deployed by congregations dioceses government bodies and private patrons in their attempt to secure a religious presence in the rapidly modernising world Territories of Faith offers a broad view of the practice of religion and its material expression in the fast evolving sub urban landscapes of post war Europe

The History of Religions Ugo Bianchi, 2023-08-28 *Religious Pluralism* Giuseppe Giordan, Enzo Pace, 2014-07-08 This volume illustrates both theoretically and empirically the differences between religious diversity and religious pluralism It highlights how the factual situation of cultural and religious diversity may lead to individual social and political choices of organized and recognized pluralism In the process both individual and collective identities are redefined incessantly moving along the continuum that ranges from exclusion to inclusion The book starts by first detailing general issues related to religious pluralism It makes the case for keeping the empirical the normative the regulatory and the interactive dimensions of religious pluralism analytically distinct while recognizing that in practice they often overlap It also underlines the importance of seeking connections between religious pluralism and other pluralisms Next the book explores how religious diversity can

operate to contribute to legal pluralism and examines the different types of church state relations eradication monopoly oligopoly and pluralism The second half of the book features case studies that provide a more specific look at the general issues from ways to map and assess the religious diversity of a whole country to a comparison between Belgian French views of religious and philosophical diversity from religious pluralism in Italy to the shifting approach to ethnic and religious diversity in America and from a sociological and historical perspective of religious plurality in Japan to an exploration of Brazilian religions old and new The transition from religious diversity to religious pluralism is one of the most important challenges that will reshape the role of religion in contemporary society This book provides readers with insights that will help them better understand and interpret this unprecedented transition

Durkheim and the Jews of France Ivan Strenski, 2008-04-15 Ivan Strenski debunks the common notion that there is anything essentially Jewish in Durkheim's work Seeking the Durkheim inside the real world of Jews in France rather than the imagined Jewishness inside Durkheim himself Strenski adopts a Durkheimian approach to understanding Durkheim's thought In so doing he shows for the first time that Durkheim's sociology especially his sociology of religion took form in relation to the Jewish intellectual life of late nineteenth and early twentieth century France Strenski begins each chapter by weighing particular claims some anti Semitic some not for the Jewishness of Durkheim's work In each case Strenski overturns the claim while showing that it can nonetheless open up a fruitful inquiry into the relation of Durkheim to French Jewry For example Strenski shows that Durkheim's celebration of ritual had no innately Jewish source but derived crucially from work on Hinduism by the Jewish Indologist Sylvain Lévi whose influence on Durkheim and his followers has never before been acknowledged

Studying Religion and Society Titus Hjelm, Phil Zuckerman, 2013 How do you study religion and society In this fascinating book some of the most famous names in the field explain how they go about their everyday work of studying religions in the field They explain how the ideas for their projects and books have come together how their understanding of religion has changed over the years and how their own beliefs have affected their work They also comment on the changing nature of the field the ideas which they regard as most important and those which have not stood the test of time Lastly they offer advice to young scholars and suggest what needs to be done to enable the field to grow and develop further

Alternative Religions Among European Youth Luigi Tomasi, 2018-08-17 First published in 1999 this book provides an overview of various non conventional notions of what is sacred currently held among European young people It analyses the growing estrangement between traditional religious doctrines and current beliefs among young people in the following countries France Austria Holland England Germany Poland Russia and Iceland Using first hand statistical support and a well

established theoretical approach the book examines new religious movements and sects analysing and interpreting the reasons for their growth and spread among young people The distinctive features of the book are its investigation of diverse religious phenomena and its verification of whether this spread of alternative religiosity is due to the reluctance of a growing section of the European population to accept traditional religious beliefs The result of eight separate empirical surveys the book is original in its content and innovative in its theoretical approach Overall it provides a detailed and documented analysis of the increasing number of young Europeans now attracted by alternative religions The Quest Mircea Eliade,2013-11-22 In The Quest Mircea Eliade stresses the cultural function that a study of the history of religions can play in a secularized society He writes for the intelligent general reader in the hope that what he calls a new humanism will be engendered by a confrontation of modern Western man with unknown or less familiar worlds of meaning Each of these essays contains insights which will be fruitful and challenging for professional students of religion but at the same time they all retain the kind of cultural relevance and clarity of style which makes them accessible to anyone seriously concerned with man and his religious possibilities Joseph M Kitagawa Religious Education **Bibliography** Jacques Waardenburg,2015-08-31 No detailed description available for Bibliography
