### **Theory Beyond Structure and Agency**

Jean-Sébastien Guy,2019-09-10 This book offers a solution for the problem of structure and agency in sociological theory by developing a new pair of fundamental concepts metric and nonmetric Nonmetric forms arising in a crowd made out of innumerable individuals correspond to social groups that divide the many individuals in the crowd into insiders and outsiders Metric forms correspond to congested zones like traffic jams on a highway individuals are constantly entering and leaving these zones so that they continue to exist even though the individuals passing through them change Building from these concepts we can understand agency as a requirement for group identity and group membership thus associating it with nonmetric forms and structure as a building up effect following the accumulation of metric forms This reveals the contradiction between structure and agency to be a case of forced perspective leaving us victim to an optical illusion

**Herbert Spencer: Collected Writings** Herbert Spencer,2021-03-24 Herbert Spencer 1820 1903 was regarded by the Victorians as the foremost philosopher of the age the prophet of evolution at a time when the idea had gripped the popular imagination Until recently Spencer s posthumous reputation rested almost exclusively on his social and political thought which has itself frequently been subject to serious misrepresentation But historians of ideas now recognise that an acquaintance with Spencer s thought is essential for the proper understanding of many aspects of Victorian intellectual life and the present selection is designed to answer this need It provides a cross section of Spencer s works from his more popular and approachable essays to a number of the volumes of the Synthetic Philosophy itself Volume VI The Study of Sociology

John Dewey and the Notion of Trans-action Christian Morgner,2019-10-09 Engaging with several emerging and interconnected approaches in the social sciences including pragmatism system theory processual thinking and relational thinking this book leverages John Dewey and Arthur Bentley s often misunderstood concept of trans action to revisit and redefine our perceptions of social relations and social life The contributors gathered here use trans action in a more specific sense showing why and how social scientists and philosophers might use the concept to better understand our social life and social problems As the first collective sociological attempt to apply the concept of trans action to contemporary social issues this volume is a key reference for the growing audience of relational and processual thinkers in the social sciences and beyond
