International Studies in Sociology and Social Anthropology ,1980 **Islam, Orientalism and Intellectual History**

Mohammad R. Salama,2011-03-30 Debates on the relationship between Islam and the West rage on from talk of clashing civilizations to political pacification from ethical and historical perspectives to distrust xenophobia and fear Here Mohammad Salama argues that the events of 9 11 force us to engage ourselves fully without preconditions in understanding not just the history of Islam as a religion but of Islam as a historical condition that has existed in relationship to the West since the seventh century Salama compares the Arab Islamic and European traditions of historical thought since the early modern period focusing on the watershed moments that informed the two traditions ideas of intellectual history and perceptions of one another He draws attention to European intellectual history s entangled links with the Islamic philosophy of history especially the complexities of orientalism and modernity Recent critical reflections on the work of Ibn Khald n confirm this intertwined and troubled relationship reflecting major disparities and contradictions At the same time recent Arab writings on Europe s intellectual history reveal a struggle against erasure and intellectual superiority Calling for a new understanding of the relationship between Islam and the West Salama argues that Islam has played a major role in enabling and positioning various paths of Western historiography at crucial moments of its development leaving palpable imprints on Islamic historiography in the process He proposes an answer to a fundamental question how to make sense of the mechanics of production in Arab Islamic and Western historiographies or how to identify the ways in which they have both failed to make sense of themselves and of each other in an increasingly disenchanted postnationalist world Spanning an impressive array of recent writings on these themes as well as older foundational texts in both traditions including al Tabar Ibn Khald n Hegel al Jabart Toynbee Foucault Edward Said and Hourani this book is both timely and crucial for all those interested in Islamic and Middle Eastern studies Western and Islamic philosophies of history modernity and the relationship between Islam and the West *New Directions in Quantitative Comparative Sociology* ,2021-10-18 The comparative method is at the core of

sociological inquiry and gained new importance emphasis and practitioners particularly after the second world war as a consequence of a large variety of international and global scale developments The contributions to this book regard nations or countries as contextual units of analysis and treat them as variables Theoretical explanations are presented of how social phenomena are systematically related to characteristics of the nation states and these explanations are tested empirically using the qualitative tools of mainstream sociology The chapters in this book can be useful to a broad audience and a range of social scientists who are interested in the understanding of contemporary social phenomena that are no longer limited to national borders but that are transnational or of a global order Contributors are Toril Aalberg Wil Arts Carole B Burgoyne Loek Halman Piet Hermkens Guillermina Jasso Mebs Kanji James R Kluegel Ola Listhaug David S Mason Petr Mat ju Neil Nevitte Thorleif Pettersson David A Routh Svetlana Sidorenko Stephenson Johan Verweij Bernd Wegener and Peter Van

Wijck **The Fall of Constantinople to the Ottomans** Michael Angold, 2014-06-11 The fall of Constantinople to the Ottomans in 1453 marked the end of a thousand years of the Christian Roman Empire. Thereafter world civilisation began a process of radical change. The West came to identify itself as Europe, the Russians were set on the path of autocracy, the Ottomans were transformed into a world power while the Greeks were left exiles in their own land. The loss of Constantinople created a void. How that void was to be filled is the subject of this book. Michael Angold examines the context of late Byzantine civilisation and the cultural negotiation which allowed the city of Constantinople to survive for so long in the face of Ottoman power. He shows how the devastating impact of its fall lay at the centre of a series of interlocking historical patterns which marked this time of decisive change for the late medieval world. This concise and original study will be essential reading for students and scholars of Byzantine and late medieval history as well as anyone with an interest in this significant turning point in world history.

Liberal Democracy and Its Critics in Africa Tukumbi Lumumba-Kasonga, 2013-07-04 Democratic institutional forms and processes are increasingly widespread in Africa as dictatorial regimes have been forced to give way as a result of popular mobilization and external donor pressure. However, the premises of the African scholars whose empirical research and analytical explorations are included in this volume are that democratic form and democratic substance are two different things. Western derived institutional forms are neither necessarily the most appropriate nor the most practical in the current African context and rooting democratic norms in the political cultures of African polities raises socio-cultural issues with which political scientists must engage. This book explores various critical questions in the context of particular elections and particular countries as diverse as Ghana, Nigeria, Kenya, the Congo, Cameroon and the Central African Republic. They include the continuing impact of police state apparatuses following democratic transition, factors influencing African voters' attitudes and behaviour, the impact of incumbency on electoral competition, women's electoral participation, the phenomenon of often very limited party programmatic choice in the context of huge social diversity and multi-party competition, and the controversial issues around the transplantation of liberal democratic institutions. Underlying these issues is the fundamental question of whether democratic processes as currently practised in Africa are really making any significant difference to the African struggle for economic, social and cultural progress. This volume is valuable for the original perspectives of its African contributors, the issues it explores, and the concrete democratic experiences it analyses, and the challenges it makes to the existing concepts, paradigms and practices of liberal democracy.

Religion and Political Power Gustavo Benavides, M. W. Daly, 1989-07-28 This book explores the interaction between two of the most charged topics in the modern world: religion and politics. It shows the inextricable connection between religious attitudes and representations and political activities. After an introductory chapter explores theoretically the religious articulations of political power, the authors examine the role played by religion in the current political situation in several

countries Approaching these cases as anthropologists historians sociologists and political scientists the authors make visible the dialectical relationship between religion and the pursuit of political power on the one hand the political significance of religious choices and on the other the almost unavoidable need to articulate in religious terms a group's attempt to acquire maintain or expand political power *Cross-National Perspectives: United States and Canada (=IJCS XVIII, 1-2)*

Prethus,2022-07-04 *Rethinking Modernity and National Identity in Turkey* Sibel Bozdogan,Resat Kasaba,2011-11-15 In the first two decades after W W II social scientist heralded Turkey as an exemplar of a modernizing nation in the Western mold Images of unveiled women working next to clean shaven men healthy children in school uniforms and downtown Ankara's modern architecture all proclaimed the country's success Although Turkey's modernization began in the late Ottoman era the establishment of the secular nation state by Kemal Ataturk in 1923 marked the crystallization of an explicit elite driven project of modernity that took its inspiration exclusively from the West The essays in this book are the first attempt to examine the Turkish experiment with modernity from a broad interdisciplinary perspective encompassing the fields of history the social sciences the humanities architecture and urban planning As they examine both the Turkish project of modernity and its critics the contributors offer a fresh balanced understanding of dilemmas now facing not only Turkey but also many other parts of the Middle East and the world at large **The Democratic Imagination** Ray C. Murphy,2013-03-21 Although education researchers have drawn on the work of a wide diversity of theorists a number of these have been of particular significance to education While the likes of Karl Marx Antonio Gramsci John Dewey and Paulo Freire influenced previous generations of educational theorists much of the more contemporary theory building has revolved a *Overlooking Nazareth* Dan Rabinowitz,1997-01-16 A sophisticated and engaging ethnographic account of the Palestinian citizens of Israel and the first since the 1970s *Overlooking Nazareth* examines specific situations of friction

deep is the chasm and how is it to be bridged How much do people in the West know about their own cultural tradition and the modern times they live in How much do they know of the traditions and the modernities of the East and how much do they need to know in order to cope with what the future will probably bring Are our images of cultural tradition and modernity in East and West in Past and Present so blurred that we look at them as through a glass darkly What the contributors to this book argue for is the necessity of looking at developments both in East and West both in Past and Present from a wider perspective of taking a global point of departure They argue for greater understanding and communication between cultures for cultural pluralism as distinct from cultural relativism They argue for the open tolerant non dogmatic and critical thought that was the most important characteristic of Erasmus s philosophy The chapters in this book can be useful to a broad audience and a range of social scientists and historians who are interested in the understanding of the relation between Past and Present Tradition and Modernity East and West Social Memory among the Literati of Yehud
