Skylife Space Habitats In Story And Science:

Skylife Gregory Benford, 2000 A collection of tales from such science fiction masters as Bradbury Asimov and Vinge focuses on life in space habitats and includes essays by scientists that discuss the potential realities of space stations and homes

Skylife Gregory Benford, George Zebrowski, 2000 The border between science fiction and science fact is crossed in this collection of stories and essays by such renowned authors as Asimov Bradbury and Clarke 8 page color insert Line art

Off the Main Sequence Tom Easton, 2006-10-01 Tom Easton has served as the monthly book review columnist for Analog Science Fiction for almost three decades having contributed during that span many hundreds of columns and over a million words of penetrating criticism on the best literature that science fiction has to offer His reviews have been celebrated for their wit humor readability knowledge and incisiveness His love of literature particularly fantastic literature is everywhere evident in his essays Easton has ever been willing to cover small presses obscure authors and unusual publications being the only major critic in the field to do so on a regular basis He seems to delight in finding the rare gem among the backwaters of the publishing field A reviewer's job he says is not to judge books for the ages but to tell readers enough about a book to give them some idea of whether they would enjoy it And this he does admirably whether he's discussing the works of the great writers in the field or touching upon the least amongst them This companion volume to Periodic Stars Borgo Wildside collects another 250 of Easton's best reviews from the last fifteen years of The Reference Library No one does it better and no other guide provides such lengthy or discerning commentary on the best SF works of recent times Complete with Introduction and detailed Index

The Stuff of Science Fiction Gary Westfahl, 2022-10-07 While students and general readers typically cannot relate to esoteric definitions of science fiction they readily understand the genre as a literature that characteristically deals with subjects such as new inventions space robot and aliens This book looks at science fiction in precisely this manner with twenty one chapters that each deal with a subject that is repeatedly addressed in science fiction of recent centuries Based on a packet of original essays that the author assembled for his classes the book could serve as a supplemental textbook in science fiction classes but also contains material of interest to science fiction scholars and others devoted to the genre In some cases chapters offer thorough surveys of numerous works involving certain subjects such as imagined vehicles journeys beneath the Earth and undersea adventures discovering intriguing patterns in the ways that various writers developed their ideas When comprehensive coverage of ubiquitous topics such as robots aliens and the planet Mars is impossible chapters focus on major themes referencing selected texts A conclusion discusses other science fiction subjects that were omitted for various reasons and a bibliography lists additional resources for the study of science fiction in general and the topics of each chapter

Far Beyond the Moon David P. D. Munns, Karin Nickelsen, 2021-06-01 From the beginning of the space age scientists and engineers have worked on systems to help humans survive for the astounding 28 500 days 78 years needed to reach another planet They've imagined and tried to create a little piece of Earth in a bubble

travelling through space inside of which people could live for decades centuries or even millennia Far Beyond the Moon tells the dramatic story of engineering efforts by astronauts and scientists to create artificial habitats for humans in orbiting space stations as well as on journeys to Mars and beyond Along the way David P D Munns and K rin Nickelsen explore the often unglamorous but very real problem posed by long term life support How can we recycle biological wastes to create air water and even food in meticulously controlled artificial environments Together they draw attention to the unsung participants of the space program the sanitary engineers nutritionists plant physiologists bacteriologists and algologists who created and tested artificial environments for space based on chemical technologies of life support as well as the bioregenerative algae systems developed to reuse waste water and nutrients so that we might cope with a space journey of not just a few days but months or more likely years

Science Fiction Literature through History Gary Westfahl, 2021-07-19 This book provides students and other interested readers with a comprehensive survey of science fiction history and numerous essays addressing major science fiction topics authors works and subgenres written by a distinguished scholar This encyclopedia deals with written science fiction in all of its forms not only novels and short stories but also mediums often ignored in other reference books such as plays poems comic books and graphic novels Some science fiction films television programs and video games are also mentioned particularly when they are relevant to written texts Its focus is on science fiction in the English language though due attention is given to international authors whose works have been frequently translated into English Since science fiction became a recognized genre and greatly expanded in the 20th century works published in the 20th and 21st centuries are most frequently discussed though important earlier works are not neglected The texts are designed to be helpful to numerous readers ranging from students first encountering science fiction to experienced scholars in the field

Multiverse: Exploring the Worlds of Poul Anderson Greg Bear, Gardner Dozois, 2015-05-16 Poul Anderson was one of the seminal figures of 20th century science fiction Named a Grand Master by the SFWA in 1997 he produced an enormous body of stand alone novels Brain Wave Tau Zero and series fiction Time Patrol the Dominic Flandry books and was equally at home in the fields of heroic fantasy and hard SF He was a meticulous craftsman and a gifted storyteller and the impact of his finest work continues undiminished to this day Here is a rousing all original anthology that stands both as a significant achievement in its own right and a heartfelt tribute to a remarkable writer and equally remarkable man A nicely balanced mixture of fiction and reminiscence this volume contains thirteen stories and novellas by some of today's finest writers along with moving reflections by among others Anderson's wife Karen his daughter Astrid Anderson Bear and his son in law novelist and co editor Greg Bear Bear's introduction My Friend Poul is particularly illuminating and insightful The fictional contributions comprise a kaleidoscopic array of imaginative responses to Anderson's many and varied fictional worlds A few of the highlights include Nancy Kress's Outmoded Things and Terry Brooks The Fey of Cloudmoor stories inspired by the Hugo Award winning The Queen of Air and Darkness a pair of truly wonderful Time Patrol stories A Slip in
