

WHAT TOO LITTLE SLEEP DOES TO YOUR BODY

Colds.

A study of 164 healthy people found that those who slept <5 hours per night were more likely to get a cold compared to those who slept 7+ hours, regardless of demographics and weight.

Tummy troubles.

Not sleeping can make the symptoms of **Inflammatory Bowel Disease** and acid reflux worse and may put you more at risk of developing IBD and **inflammatory bowel syndrome**.

Difficulty learning.

Sleep deprivation **interferes** with our ability to **remember and process** new information. Researchers recommend **pushing back** early work and school start times to help ensure we get enough sleep.

Irritability and mood swings.

Researchers found that interruptions and disturbances tend to **bother us more** when we haven't slept.

Headaches and migraines.

Research links **poor sleep quality** to migraines and sleep apnea to headaches.

Depleted sex drive.

Getting enough sleep is important for promoting **healthy sexual desire and genital response**. It also appears to play a role in **how often** we engage in sexual activity with our partners.

Poor vision.

Sleep deprivation is linked with **tunnel vision, double vision, and dimness**. The longer you're awake, the more **visual errors** you'll see and the more likely you are to **hallucinate**.

Weight gain.

When we don't get enough shut-eye, researchers found, we also tend to **snack more** and pick **calorie-rich foods** over lighter ones—especially for kids.

 the proven art of optimism *Handbook of Clinical Behavior Therapy with Adults* Alan S. Bellack, Michel Hersen, 2012-12-06
 Despite the occasional outcries to the contrary the field of behavior therapy is still growing and the asymptote has not been
 reached yet The umbrella of behavior therapy continues to enlarge and still is able to encompass new theories new concepts
 new research new data and new clinical techniques Although the number of new behavioral journals now has stabilized we
 still see a proliferation of books on the subject In the past few years however we have seen considerable specialization within
 behavior therapy No longer is it possible to be a generalist and remain fully abreast of all the relevant developments Thus we
 see behavior therapists who deal with adults those who deal with children those whose specialty is hospital psychiatry and
 those who see themselves as practitioners of behavioral medicine Even within a subarea such as behavioral medicine
 specialization runs supreme to the extent that there are experts in the specific addictions adult medical problems and child
 medical problems Given the extent of specialization there are numerous ways to skin the proverbial cat We therefore have
 chosen to look at the contemporary work in behavior therapy that is being carried out with adults in part of course because
 of our long standing interest in this area as teachers researchers and clinicians In so doing we have chosen to highlight the

clinical aspects of the endeavor but not at the expense of the rich research heritage for each of the specific adult disorders

Fatigue To Fit Lisa Silvani,2022-09-30 The problem with health in general in our society today is the lack of energy It might seem obvious when we look at what our day looks like the constant hustles targets and goals But not many realize how far it would go influencing our health What s

worse is that not many know where to look when this happens Our energy is made in the mitochondria microscopic structures that are present in the core cells in the body When we eat food and fuel our body with nutrients these nutrients will then be used by mitochondria to produce ATP the actual energy that forms in the body ATP has several functions but its main role is to power up the cells When the cells have enough power the organs work wonderfully together and metabolism can be at its optimum level But then this condition is also vice versa Lack of energy can halt many cells and organs functions This causes a metabolism goes imbalance and leads to health problems especially chronic illnesses Inspired by studies and research around the world about energy and mitochondria the *Fatigue To Fit* book offers an approach that maps the pathway to restore the body s energy and balance the energy production system To do this our body must meet the required conditions for mitochondria to function fully In the book you will learn what factors contribute to energy and what drains them and how to restore the process By following the restoration of our energy production system we are also rejuvenating our entire body Following the guide inside expect to achieve several things More energy to do daily activities Easy weight loss and weight maintenance Increase muscle performance Better focus and attention span Better working and long term memory Better mood and mental health Better hormonal balance Reduced immune related problems such as allergies and infections Healthier skin and hair Reduced signs and symptoms of previous chronic pain
