A commentary on

How to Make the Ghosts in my Bedroom Disappear? Focused-Attention Meditation Combined with Muscle Relaxation (MR Therapy) – A Direct Treatment Intervention for Sleep Paralysis
by Jalal, B. (2016). *Front. Psychol.* 7:28. doi: 10.3389/fpsyg.2016.00028

We read with interest Dr. Jalal's recent publication on another potential treatment option for recurrent isolated sleep paralysis: *Meditation Combined with Muscle Relaxation* (MR Therapy). The author is to be commended for adding to the limited literature on ameliorating problematic cases of isolated sleep paralysis (ISP). As recently reviewed (Sharpless, 2016), there are few options available, pharmacological or otherwise, for the chronic and severe cases of ISP, and none of these yet possess compelling evidence in favor of their efficacy.

We appreciate the citation of our work in his article. However, we disagree with the author's claim that MR Therapy is the "first direct treatment" for ISP (Jalal, 2016, p. 1). This comment is puzzling given that our 2015 book (i.e., Sharpless and Doghramji, 2015) was cited in this same manuscript. Contained within is a manual titled *Cognitive Behavioral Therapy for Isolated Sleep Paralysis* (CBT-ISP) and a corresponding adherence measure (pp. 257–272).

CBT-ISP is a brief, systematic approach that focuses upon helping patients both prevent and disrupt recurrent ISP episodes. In order to better clarify the nature of our own approach and to compare and contrast it to MR Therapy, we detail CBT-ISP in Table 1 below.

As can be seen, there are areas of substantial overlap between CBT-ISP and MR Therapy. Both have strong emphases on various forms of relaxation, symptom reappraisals, shifts in attention away from episode content, and the practice of disruption techniques while patients are in a supine position. We should also note that both approaches are based upon panic disorder models.

However, there are some notable points of divergence. First, MR Therapy discourages attempts to move, whereas CBT-ISP actively encourages these attempts in order to directly disrupt episodes and shift attention away from potentially frightening symptoms (e.g., hallucinations). Our approach is based upon empirical work with sufferers who reported that these attempts were effective (Sharpless and Grom, 2016). Second, the author discourages attempts to control breathing whereas we view this as a potential source of relaxation to be used "in the moment." Third, he encourages the use of prayer as a form of relaxation/meditation whereas we are more cautious

web abstract in this research the hyperelastic strain energy density function based on the exponential logarithmic invariant is extended to the visco hyperelastic constitutive

identification of constitutive parameters from full thermal and - Aug 25 2022

web may 25 2022 the main aim of this paper is to develop a convenient and effective grnn based approach to identify the model parameters of hyperelastic material this grnn

development and parameter identification of a visco hyperelastic - May 22 2022

web jun 12 2014 this review is devoted to some inverse problems arising in the context of linear elasticity namely the identification of distributions of elastic moduli model

hyperelastic constitutive model for rubber like materials based on - Jun 22 2022

web the stress response is decomposed into two constitutive parts in parallel which are a hyperelastic and a time dependent viscoelastic stress response in order to identify the

stochastic modeling and identification of a hyperelastic - Jun 03 2023

web aug 5 2020 hyperelastic behavior can be described by constitutive model which are mathematical formulation between the stress and the strain generally hyperelastic

inverse parameter identification for hyperelastic model of a - Nov 15 2021

web jul 26 2023 here a modified hyperelastic constitutive model based on the yeoh model is proposed to improve its prediction performance for multiaxial deformation of

a visco hyperelastic constitutive model for rubber considering - Dec 17 2021

web in this procedure a polynomial hyperelastic model was chosen as the constitutive model both uniaxial tension and compression tests were performed for a polyurea an iterative

stochastic modeling and identification of a hyperelastic - Sep 25 2022

web in this work we propose to identify the constitutive parameters by reconstructing the heat source field according to two different ways a first one that requires the kinematic field

hyperelastic constitutive model parameters identification using - Jan 30 2023

web oct 27 2023 multiple research on pdms modeling have been conducted using these five hyperelastic models with varying results depending on their methodologies and

a parameter identification scheme of the visco hyperelastic - Jan 18 2022
