Arthur P. Molella, Anna Karvellas

Slow Death 09:

438 Days Jonathan Franklin, 2015-11-17 The miraculous account of the man who survived alone and adrift at sea longer than anyone in recorded history For fourteen months Alvarenga survived constant shark attacks He learned to catch fish with his bare hands He built a fish net from a pair of empty plastic bottles Taking apart the outboard motor he fashioned a huge fishhook Using fish vertebrae as needles he stitched together his own clothes Based on dozens of hours of interviews with Alvarenga and interviews with his colleagues search and rescue officials the medical team that saved his life and the remote islanders who nursed him back to health this is an epic tale of survival Print run 75 000 **Ardeth #09** Felipe

Hernández, 2022-12-06 Architecture is an inward looking discipline Its history conveys the norms of the discipline to an audience composed mostly of architects who are familiar with the work of their predecessors from whom they learnt or for whom they worked As such architecture singularises the multiple processes through which space is produced excluding difference in the pursuit of coherent narratives to sustain its authority and does so mainly through the figure of the architect For a long time now critics have shown how that figure is principally male However little has been said about the fact that the figure of the architect is also white a racial classification that refers not only to epidermal characteristics but to their national origin education and in most cases their class affiliation **Life Without Parole** Ross Kleinstuber, Jeremiah

Coldsmith, Margaret Leigey, Sandra Joy, 2022-04-19 This book is an in depth critical examination of all pertinent aspects of life without parole LWOP Empirically assessing key arguments that advance LWOP including as an alternative to the death penalty it reveals that not only is the punishment cruel while not providing any societal benefits it is actually detrimental to society Over the last 30 years LWOP has exploded in the United States While the use of capital punishment over that same time period has declined it must be recognized that LWOP is in fact a hidden death sentence It is however implemented in a way that allows society to largely ignore this truth While capital punishment has rightfully been subject to intense debate and scholarship LWOP has mostly escaped such scrutiny In fact LWOP has been touted by both death penalty abolitionists and by tough on crime conservatives which has allowed it to flourish under the radar Specifically abolitionists have advanced LWOP as a palatable alternative to capital punishment which they perceive as inhumane error prone costly and racially biased Conservatives meanwhile advocate for LWOP as an effective means of fighting crime a just form of retribution and necessary tool for managing incorrigible offenders This book seeks to tap into and help inform this growing debate by subjecting these key arguments to empirical scrutiny The results of those analyses fail to produce any evidence in support of any of those various justifications and therefore suggest that LWOP should be abolished and replaced with life sentences that come with parole eligibility after a maximum of 25 years The book will be of great interest to students and scholars of criminology and criminal justice and will also have crossover appeal into the fields of law political science and sociology It will also appeal to criminal justice professionals lawmakers activists and attorneys as well as death penalty abolitionists opponents of mass

incarceration advocates for sentencing reform and supporters of prisoners rights **The Rise of the Robots** Martin Ford,2015-09-03 Intelligent algorithms are already well on their way to making white collar jobs obsolete travel agents data analysts and paralegals are currently in the firing line In the near future doctors taxi drivers and ironically even computer programmers are poised to be replaced by robots Without a radical reassessment of our economic and political structures we risk the very implosion of the capitalist economy itself In *The Rise of the Robots* technology expert Martin Ford systematically outlines the achievements of artificial intelligence and uses a wealth of economic data to illustrate the terrifying societal implications From health and education to finance and technology his warning is stark all jobs that are on some level routine are likely to eventually be automated resulting in the death of traditional careers and a hollowed out middle class The robots are coming and we have to decide now whether the future will bring prosperity or catastrophe

The Great Music City Andrea Baker,2019-03-01 In the 1960s as gentrification took hold of New York City Jane Jacobs predicted that the city would become the true player in the global system Indeed in the 21st century more meaningful comparisons can be made between cities than between nations and states Based on case studies of Melbourne Austin and Berlin this book is the first in depth study to combine academic and industry analysis of the music cities phenomenon Using four distinctly defined algorithms as benchmarks it interrogates Richard Florida s creative cities thesis and applies a much needed synergy of urban sociology and musicology to the concept mediated by a journalism lens Building on seminal work by Robert Park Lewis Mumford and Jane Jacobs it argues that journalists are the cultural branders and street theorists whose ethnographic approach offers critical insights into the urban sociability of music activity *You Call This Art?* Patrick Rosenkranz,2008-08-27 If he were alive today he d be a superstar He was that good But Greg Irons died just as his star was rising He was only 37 years old when a speeding bus on a busy Bangkok street killed him in 1984 Irons was a psychedelic poster artist an underground cartoonist a book illustrator and an emerging tattoo virtuoso who brought a new sensibility to an age old art form This retrospective book spans his whole artistic career from his earliest dance posters to his ground breaking science fiction and horror comix to his innovative and colorful tattoo art Greg Irons was one of the elite among posters artists who worked for Bill Graham s Fillmore Ballroom in San Francisco during the Age of Aquarius designing posters for Chuck Berry Jefferson Airplane Big Brother and Paul Butterfield *You Call This Art* reprints his finest psychedelic posters in full color as well as complete comic stories from *Slow Death Funnies Legion of Charlies Deviant Slice Yellow Dog Thrilling Murder* and many other underground comic books It also includes rarely seen album cover art for Jerry Garcia Blue Cheer Jefferson Starship and other counterculture musicians Irons had a third career as an illustrator of children s coloring books and pages from books including *One Old Oxford Ox Last of the Dinosaurs Pirates and Wyf of Bathe* appear as well Many examples of his tattoo art are also included **Faxed** Jonathan Coopersmith,2015-02-28 *Faxed* is the first history of the facsimile machine the most famous recent example of a tool made obsolete by relentless technological innovation

Jonathan Coopersmith recounts the multigenerational multinational history of that device from its origins to its workplace glory days in the process revealing how it helped create the accelerated communications information flow and vibrant visual culture that characterize our contemporary world Most people assume that the fax machine originated in the computer and electronics revolution of the late twentieth century but it was actually invented in 1843 Almost 150 years passed between the fax's invention in England and its widespread adoption in tech savvy Japan where it still enjoys a surprising popularity Over and over again faxing's promise to deliver messages instantaneously paled before easier less expensive modes of communication first telegraphy then radio and television and finally digitalization in the form of email the World Wide Web and cell phones By 2010 faxing had largely disappeared having fallen victim to the same technological and economic processes that had created it Based on archival research and interviews spanning two centuries and three continents Coopersmith's book recovers the lost history of a once ubiquitous technology Written in accessible language that should appeal to engineers and policymakers as well as historians *Faxed* explores themes of technology push and market pull user based innovation and blackboxing the packaging of complex skills and technologies into packages designed for novices while revealing the inventions inspired by the fax how the demand for fax machines eventually caught up with their availability and why subsequent shifts in user preferences rendered them mostly pass

New Geographies of Music 1 Ola

Johansson,Séverin Guillard,Joseph Palis,2023-08-03 This book is the first installment of a trilogy that explores the spatial dimensions of music Music has generated substantial interest among geographers but other academic disciplines have also developed related spatial perspectives on music This trilogy brings together multiple approaches each book investigating a bundle of interrelated themes *New Geographies of Music 1 Urban Policies Live Music and Careers in a Changing Industry* starts with an introduction that explores contemporary approaches to the study of popular music The following chapters address a range of issues including the role of live music in urban development how knowledge about local music ecosystems circulates among cities urban networks of music production how musical practices in local scenes are affected by core periphery relations and how musicians rely on touring in order to earn a living This is a must read for anyone interested in the relationship between space and music

Rehabilitative Postsocialism

Katerina Kolářová,2025-06-30 Kateřina Kolářová's *Rehabilitative Postsocialism* offers a timely interdisciplinary and intersectional analysis of how disability race class and gender operate as ideological tools within the postsocialist Czech Republic formerly Czechoslovakia Kolářová presents postsocialism as an analytic that can and should be brought to bear to understand cultural politics economic formations and state politics through the present day *Rehabilitative Postsocialism* names disability sexuality and race as central yet invisible to negotiations of the postsocialist consensus Drawing from a rich and varied archive *Rehabilitative Postsocialism* maps the formation of new structures of inequalities and social imaginaries of wellness merit and justice in order to understand current articulations of global disenchantment with democracy social justice and solidarity The book also makes clear that

disability race and ethnicity continue to circulate in depictions of Eastern Europe as suspended in a chronic developmental delay Rehabilitative Postsocialism both situates this positioning within its political and historical formation and offers the analytical tools to challenge its continued deployment Is Entrepreneurship Dead? Scott A. Shane, 2018-05-08 It s become an article of faith that American entrepreneurship is in trouble The problems are many lack of capital too few entrepreneurial immigrants excessive regulation an aging population slowing population growth and rising student debt But while experts across the country debate the causes and propose solutions Scott Shane explains that the data just do not fit Dismantling each of the most widely accepted theories in turn he persuasively demonstrates that while an evolving market is changing the nature of most startups entrepreneurship is actually alive and well Shane reveals how the number of incorporated startups is rising fewer startups are failing and the number of businesses backed by investors is increasing The overall picture is positive Exhaustively researched and compellingly told this book will be read and discussed for years to come
