understanding life and how to live has attracted worldwide attention since it was originally introduced to the scientific community in *New Ideas in Psychology* an international journal of innovative theory in psychology in 1996 This is a peer reviewed journal produced by the world's largest publisher of original scientific work and overseen by an editorial board consisting of faculty from departments of psychology in several of the world's leading universities The *Formula for Happiness* presents this paradigm for the pursuit of happiness in a format which is entertaining and easily understood It familiarizes readers with what they need to become and remain happy and how to proceed with their personal pursuit of happiness Readers are provided with an objective means of measuring current levels of happiness as well as methods for increasing happiness and forecasting the effect potential courses of action are likely to have on their happiness at some future point in time The *Formula for Happiness* is the product of an innovative approach to the study of happiness which incorporates and surpasses research currently going on in the field of positive psychology in a number of important ways It is based on generalizations emerging from the review of massive amounts of positive psychology research integrated with insights into the nature of happiness emerging from the fields of clinical and developmental psychology It provides a comprehensive and coherent set of propositions about the nature of happiness which is different from anything available elsewhere in scientific and self help literature today The *Formula for Happiness* is the first solidly scientifically based self help book to assert that happiness is primarily a matter of how people are situated with respect to the circumstances of their lives Beyond making this assertion it actually specifies exactly which circumstances make a difference in the quality of human life It precisely identifies what we require in order to become and remain happy The *Formula for Happiness* is also the first solidly scientifically based self help book to assert that happiness is a matter of choice In addition to advancing this proposition it provides readers with the only set of scientifically formulated guidelines for making choices which have happiness as their effect It is the first book to present a set of principles for the pursuit of happiness which like the principles of nutrition and health are the product of scientific reasoning and research In showing readers how happiness is mainly a matter of circumstances and that circumstances are largely a matter of choice The *Formula for Happiness* provides a new and much needed counterpoint to most of the thinking within psychology as well as much of what is available on the self help market today Instead of promoting the notion that happiness is a matter of what we think how we perceive or how we interpret things The *Formula for Happiness* shows readers how quality of life is a matter of the way things really are and what we actually do It is the first self help book to provide a blueprint for constructing a durable high quality life In addition to presenting a pioneering paradigm for the pursuit of happiness The *Formula for Happiness* contains a set of newly developed psychometric instruments Readers can use these instruments to measure happiness to develop goals for personal strategic planning and to make momentous decisions such as what to major in at college which career to pursue whether to take a particular job whether to remain in a romantic relationship whether to g
