**Incarcerated Young People, Education and Social Justice** Kitty te Riele,Tim Corcoran,Fiona MacDonald,Alison Baker,Julie White,2023-03-31 This book foregrounds the provision of education for young people who have been remanded or sentenced into custody Both international conventions and national legislation and guidelines in many countries point to the right of children and young people to access education while they are incarcerated Moreover education is often seen as an important protective and rehabilitative factor However the conditions associated with incarceration generate particular challenges for enabling participation in education Bridging the fields of education and youth justice this book offers a social justice analysis through the lens of participatory parity the book brings together rare interviews with staff and young people in youth justice settings in Australia secondary data from these sites a suite of pertinent and frank reports and international scholarship Drawing on this rich set of material the book demonstrates not only the challenges but also the possibilities for education as a conduit for social justice in custodial youth justice The book will be of immediate relevance to governments and youth justice staff for meaningfully meeting their obligation of enabling children and young people in custody to benefit from education and of interest to scholars and researchers in education youth work and criminology      Education, Social Status, and Health John Mirowsky,2017-09-08 Education forms a unique dimension of social status with qualities that make it especially important to health It influences health in ways that are varied present at all stages of adult life cumulative self amplifying and uniformly positive Educational attainment marks social status at the beginning of adulthood functioning as

the main bridge between the status of one generation and the next and also as the main avenue of upward mobility It precedes the other acquired social statuses and substantially influences them including occupational status earnings and personal and household income and wealth Education creates desirable outcomes because it trains individuals to acquire evaluate and use information It teaches individuals to tap the power of knowledge Education develops the learned effectiveness that enables self direction toward any and all values sought including health For decades American health sciences has acted as if social status had little bearing on health The ascendance of clinical medicine within a culture of individualism probably accounts for that omission But research on chronic diseases over the last half of the twentieth century forced science to think differently about the causes of disease Despite the institutional and cultural forces focusing medical research on distinctive proximate causes of specific diseases researchers were forced to look over their shoulders back toward more distant causes of many diseases Some fully turned their orientation toward the social status of health looking for the origins of that cascade of disease and disability flowing daily through clinics Why is it that people with higher socioeconomic status have better health than lower status individuals The authors who are well recognized for their strength in survey research on a broad national scale draw on findings and ideas from many sciences including demography economics social psychology and the health sciences People who are well educated feel in control of their lives which encourages and enables a healthy lifestyle In addition learned effectiveness a practical end of that education enables them to find work that is autonomous and creative thereby promoting good health

In 2020 over 1 billion of the world s population were over the age of 60 years old and it is expected to double by 2050 according to WHO Due to the growing population of older adults there is a focus on healthy aging that will benefit the individuals and the wider communities as older adults will be able to support family members and partake in paid or voluntary work for a longer period of time Currently a large number of older adults are unable to work increasing the likelihood of economic instability with fewer streams of income Economic instability has been proven to have health impacts including declining mental wellbeing malnutrition and the inability to afford prescribed medications Social isolation proves to be another important factor in the overall health of older adults The CDC reports that poor social interactions have been linked to a higher risk of developing multiple serious medical conditions
