The social construction of gender is a term that highlights how the meanings we ascribe to genders are socially and culturally mediated.

## HOW?

- 1 **Language** - The language used in everyday conversation is gendered. For example, parents tend to speak differently to boys and girls.
- 2 **Discourse** - Discourse is a term to describe the social narratives that are repeated over and over again until they are seen as natural. Normative gendered discourse is repeated everywhere we look.

## WHO?

We learn about our own society's idealized gender constructions from:

- 1 Parents
- 2 Friends
- 3 Siblings
- 4 Teachers
- 5 Movies
- 6 Gendered toys

**Global Impact of the Ukraine Conflict** Shuichi Furuya, Hitomi Takemura, Kuniko Ozaki, 2023-11-30 The invasion of Ukraine by the Russian Federation and the subsequent military campaigns entail several classical aspects of armed conflict First it is a type of international armed conflict between two sovereign states that had been prevalent until the middle of the twentieth century but not in the last several decades It is also a direct intervention by a superpower into a neighboring state with the former's aspiration of territorial expansion This action evokes a scheme of

war reminiscent of the nineteenth or early twentieth century At the same time however the invasion is generating in the international community a sense of new phenomena leading to a new era that may be different from the past three decades following the end of the Cold War In fact the hostilities between the Russian Federation and Ukraine as well as reactions by other states and international organizations have raised legal and political issues that require scholars to reexamine existing frameworks of the international community and individual rules of international law The process of applying international law to states is a dynamic one Rules of international law may and should regulate the behavior of states and provide standards to decide whether a particular act by a state is permissible At the same time however states may change or replace existing rules and a significant event or series of such events may be a strong motivator to create a new legal framework In this regard rules of international law and the conduct of states are in a dialectical relationship International law can both shape a mode of conduct and be shaped by that conduct being its creator as well as its creation The Ukraine conflict is not an exception We can discuss the conduct of the Russian Federation Ukraine other states and international organizations and evaluate their legality and legitimacy from the viewpoint of existing rules However we may also reevaluate the current rules of international law through the lens of the Ukraine conflict and discuss possible changes to those rules in the future Inspired by the latter aspect of the international legal process the present book aims to examine the impact of the Ukraine conflict whether salient or potential on various rules of international law Most of the authors are from Japan and other Asian countries that are geographically remote from the site of the conflict It is often true however and particularly in this case that those keeping an appropriate distance can look at relevant issues in a broader view and from a more objective perspective To what extent and in what manner may the Ukraine conflict have an impact on the legal framework of the international community and the rules of international law This book is the first to answer those questions in a comprehensive manner
