Ken G. Smith, Michael A. Hitt, 2005-09-22 In Great Minds In Management Ken G Smith and Michael A Hitt have brought together some of the most influential and original thinkers in management Their contributions to this volume not only outline their landmark contributions to management theory but also reflect on the process of theory development presenting their own personal accounts of the gestation of these theories The result is not only an ambitious and original panorama of the key ideas in management theory presented by their originators but also a unique collection of reflections on the process of theory development an area which to date little has been written about by those who have actually had experience of building theory In their concluding chapter Ken G Smith and Michael A Hitt draw together some common themes about the development of management theory over the last half a century and suggest some of the conclusions to be drawn about how theory comes into being

Trust, Organizations and Social Interaction Søren Jagd, Lars Fuglsang, 2016-05-27 Trust Organizations and Social Interaction aims to promote new knowledge about trust in an organizational context The book provides case analysis of how trust is formed through processes of social interaction in which actors observe reflect upon and make sense of trust behaviour and its meaning in an organizational and social environment It greatly contributes to clarifying what a process view may mean in trust research and to the understanding how social interaction processes affect trust The contributing authors demonstrate how trust and distrust are produced and reproduced in a complex interplay with social processes and practices Instead of asking how trust may be measured or how trust is a resource for managers they explore how trust develops and how managers become intertwined with and caught up in trust processes This enlightening empirical analysis

of trust and its relationship with organizational processes is a vital resource for students academics and scholars of organization management organizational behaviour and change HRM and learning Contributors include J Allwood N Berbyuk Lindstr m M Bosse M B Ellingsen B Espedal M Frederiksen L Fuglsang A H Gausdal K Gr nhaug U K Hansen M Ikonen S Jagd S T Johansen I L Johansson K Malkam ki K Mogensen L N slund M Neisig K A Perry M A Rasmussen T Savolainen M Selart A Sw rd N Thygesen S Vallentin

Social Trust and Life Insurance Louise Morris, 2011-05-25 This book investigates the role of incomplete knowledge social trust and risk perceptions in influencing acceptance of the perceived risks related to insurers using genetic test results In addition the author identifies and explains the factors and conditions that affect this risk acceptance pattern In order to do so both survey methods and semi structured interviews are employed A review of the necessity of life insurance companies to acquire genetic test results is undertaken followed by an analysis of the speculated consequences of such usage for society Management of the risks related to insurers using genetic test results is examined and the problems and difficulties inherent in the risk management strategies suggested and enforced are explored This is followed by a comparison between the societal risks produced by insurers using genetic test results and the risks theorised as pertaining to a risk society Beck 1992 and a runaway world Giddens 1990 1999

Social Construction of Trust to Protect Ideas and Data in Space Science and Geophysics Lynne G. Zucker, Michael R. Darby, 1995 This paper applies a rational action economic sociology approach to the central organizational theory question of whether action is embedded in pre formed institutions that are relatively cheap in terms of time and energy or to what extent action becomes embedded in newly constructed institutions that are more costly but perhaps better adapted to task goals We develop a new model of the social construction of trust producing social structure based on the initial endowment of this structure the demand for it and the cost of social construction We test the model with data on construction of social structure in

collaborations in space science and geophysics developed in a large number of interviews conducted by the Center for History of Physics of the American Institute of Physics We do find that greater pre existing endowment reduces social construction of new institutions while greater demand for trust increases that construction We also find some evidence that social construction of trust producing social structure in fact results in production of higher value science *Social Trust and the Management of Risk* George Cvetkovich,2013-12-16 Social trust is a crucial issue to many aspects of modern society Policy makers continually aspire to winning it and corporations frequently run the risk of losing it The trust deficit raises vital questions and problems to which until recently there have been few answers or solutions Experts from both sides of the Atlantic explore the importance for trust of various influences from individual perceptions to organizational systems and consider the conditions involved in building or undermining trust Several authors examine practical hazard management issues including medical vaccination programmes and popular participation in pollution control and waste management as strategies for enhancing social trust This book provides insightful analysis for researchers and students of environmental and social sciences and is essential reading for those engaged in risk management in both the public and private sectors

Social Construction of Reality as Communicative Action Antonio Sandu,2016-05-11 The central focus of this volume is social constructionism in all its dimensions including its sociological ontological epistemological methodological ethical and pragmatic features It pays particularly close attention to the social construction of reality as a communicative action extending this area to include social pragmatics It also interprets social action as a discursive seductive strategy of exercising power in the public space utilising a constructionist understanding in which public space is represented by any part of the co construction of reality through social or communicative action In addition at the methodological level the book proposes a new semiotic strategy called fractal constructionism which analyses the interpretative drift of certain key concepts that are valued as social constructs Social Trust Liu Weiping,2023-06-19 This book explores how social trust impacts the Chinese economy Due to the profound social changes brought by rapid urbanization China s traditional social trust system gradually weakens How to rebuild and enhance social credit remains as a key and difficult project Exploring case studies from the real estate market private banking and urban financing this book explores the value of informal social links to the economic functions of a society and how to rebuild them when they erode This is of interest to scholars of China s economy and society The Social Construction of Knowledge in Mission-Critical Environments Theodoros Katerinakos,2018-06-27 This volume analyzes real in flight communications to explain the dynamics of knowledge construction With the use of a grounded theory approach real life scenarios for in depth interviews with aviation informants were developed and analyzed using discourse analysis The study revealed aspects of tacit knowledge and expertise behavior that develop in mission critical environments Among the findings the author discovered Silence is an interactional element and a substantial contributing factor to both completed flights and aviation incidents accidents Hesitation is an early reaction

when situational awareness is lacking The aviation sub cultures contain several distinct micro cultures which affect professional responsibility and decision making in micro environments Human errors should be acknowledged discussed and repaired by all actors of the flight model Non verbal communication in institutional settings and mediated environments is instrumental to safe and efficient operations The results suggest fruitful applications of theory to explore how knowledge is generated in highly structured high risk organizational environments such as hospitals nuclear plants battlefields and crisis and disaster locations Katerinakis explains the emergent knowledge elements in communication command with messages spoken heard understood applied from multiple stakeholders The interplay of theory and real flight examples with key interlocutors creates a valuable narrative both for the expert reader and the lay person interested in the insights of hospitals nuclear plants battlefields safety and rescue systems and crisis and disaster locations Ilias Panagopoulos PhD Command Fighter Pilot Col Ret Senior Trainer Joint Aviation Authorities JAA Training Organisation Safety Manager NATO Airlift Management Programme In this path breaking work Theodore Katerinakis brings the study of human communication to the airplane cockpit as a knowledge environment Toward that end drawing on his own experience with the Air Force and Aviation Authorities and interviews with flight controllers and scores of pilots Katerinakis both builds on moves beyond human factors research and ecological psychology It is a work of theoretical value across disciplines and organizational settings and of practical importance as well His lively narrative adds to translational research by translating knowledge or evidence into action in mission critical systems Douglas V Porpora PhD Professor of Sociology Director Communication Culture and Media Drexel University

Trust and Rationality Stephan Alexander Rompf, 2014-10-01 Combining economic social psychological and sociological approaches to trust this book provides a general theoretical framework to causally explain conditional and unconditional trust it also presents an experimental test of the corresponding integrative model and its predictions Broadly it aims at advancing a cognitive turn in trust research by highlighting the importance of 1 an actor's context dependent definition of the situation and 2 the flexible and dynamic degree of rationality involved In essence trust is as multi faceted as there are cognitive routes that take us to the choice of a trusting act Therefore variable rationality has to be incorporated as an orthogonal dimension to the typological space of trust The theory presents an analytically tractable model the empirical test combines trust games high and low incentive conditions framing manipulations and psychometric measurements and is complemented by decision time analyses

The Single Currency and European Citizenship Giovanni Moro, 2013-02-28 Established in 2002 the Euro is now the currency of 17 countries used by over 335 million people daily Although the single currency is much discussed in terms of macroeconomics and global finances policymakers rarely address its impact on European citizenship in social cultural political and everyday life economics terms This hidden side of the single currency is the focus of the essays which use various approaches from economic history and political sociology to citizenship and legitimacy to reveal the connections between the Euro and European citizenship This timely contribution by

renowned experts provides a greater understanding of the Euro at a time when it is not clear whether it should be celebrated or commemorated and looks into aspects of the single currency that are the base of the social trust that supports it and that is at stake in the present crisis It will be an essential tool to anyone studying the political social and economic development of the E U

Social Capital and Urban Networks of Trust Jouni Häkli, 2016-12-05 This is the first book on social capital and trust informed by a critical geographical perspective The authors examine the role of social capital in the constitution and reproduction of urban networks of trust in different places and contexts They explore how social capital and trust are reflected in the capacity of these networks to achieve their goals and to deliver specific forms of urban development in a number of Finnish and Italian cities Finland and Italy present in many ways two almost paradigmatic cases of how social capital and trust can work in extremely different and yet very effective ways in the production of the urban They are two almost ideal laboratories for experimenting new definitions and new understandings of the concepts in question

The Business Improvement District Movement Seth A. Grossman, 2016-06-20 This comprehensive book covers the theory and practice of Business Improvement Districts or BIDs partnerships between local communities and governments established to revitalize neighborhoods and catalyze economic development in a region In this book author Seth Grossman demonstrates the ways in which BIDs work pull stakeholders together and acquire funds to manage the difficult process of community revitalization especially in urbanized threatened town centers BIDs also blur traditional lines between public and private organizations and their governance raises critical new questions about democratic representation accountability transparency and responsiveness As this book illustrates BID managers act as public entrepreneurs and management in the public realm requires community development skills community planning organization and leadership and economic expertise jobs business development housing and public infrastructure Through an in depth examination of Business Improvement Districts and their managers we begin to see that the future of public administration might no longer be contained behind the walls of formal government with an increasing number of public

administrators defining and creating public solutions to real life commercial problems This book is essential reading for all practicing urban and regional administrators and government officials as well as students studying public administration public management and urban and regional politics *Networks, Trust and Social Capital* Sokratis M. Koniordos, 2017-03-02

The concepts of social networks social capital and trust play an increasingly central role in the social sciences They have become indispensable conceptual tools for the analysis of post industrial late modern societies which are characterized by such features as the relative decline of formal hierarchies the development of flexible social arrangements in the sphere of production and the extreme mobility of capital This is the first book to study the interrelationships between these important concepts both theoretically and empirically Drawing on empirical investigations from a range of diverse European social contexts the contributors develop an economic sociology that builds on and extends established theoretical perspectives The book opens with an introduction to the theoretical ideas relating social capital to reciprocity trust and social networks in line with current debates The authors go on to discuss the concept of social embeddedness addressing the economic effects of social capital by examining the network and trust foundations of labour markets and investigating the structural limits of trusting networks They conclude with an exploration of the impact of networking and the functioning of trust and social capital on the economic arrangements and performance of nascent capitalist economies in post Communist Europe This thematically unified collection by a team of distinguished contributors from across Europe provides an innovative and distinctive contribution to an expanding area of research *Partnership Governance in Public Management* Seth Grossman, Marc Holzer, 2015-10-14

The ability to create and sustain partnerships is a skill and a strategic capacity that utilizes the strengths and offsets the weaknesses of each actor Partnerships between the public and private sectors allow each to enjoy the benefits of the other the public sector benefits from increased entrepreneurship and the private sector utilizes public authority and processes to achieve economic and community revitalization Partnership Governance in Public Management describes what partnership is in the public sector as well as how it is managed measured and evaluated Both a theoretical and practical text this book is a what why and how examination of a key function of public management Examining governing capacity community building downtown revitalization and partnership governance through the lens of formalized public private partnerships specifically how these partnerships are understood and sustained in our society this book is essential reading for students and practitioners with an interest in partnership governance and public administration and management more broadly Chapters explore partnering technologies as a way to bridge sectors to produce results and a new sense of public purpose and to form a stable foundation for governance to flourish
