Reading the Maya Glyphs (Second Edition) Michael D. Coe, Mark Van Stone, 2005-06-17 The breaking of the Maya code has completely changed our knowledge of this ancient civilization and has revealed the Maya people s long and vivid history Decipherment of Maya hieroglyphic writing has progressed to the point where most Maya written texts whether inscribed on monuments written in the codices or painted or incised on ceramics can now be read with confidence In this practical guide first published in 2001 Michael D Coe the noted Mayanist and Mark Van Stone an accomplished calligrapher have made the difficult often mysterious script accessible to the nonspecialist They decipher real Maya texts and the transcriptions include a picture of the glyph the pronunciation the Maya words in Roman type and the translation into English For the second edition the authors have taken the latest research and breakthroughs into account adding glyphs updating captions and reinterpreting or expanding upon earlier decipherments After an introductory discussion of Maya culture and history and the nature of the Maya script the authors introduce the glyphs in a series of chapters that elaborate on topics such as the intricate calendar warfare royal lives and rituals politics dynastic names ceramics relationships and the supernatural world The book includes illustrations of historic texts a syllabary a lexicon and translation exercises

Lost Science and Technology of the Mayan Civilization NORAH ROMNEY, The Mayan civilization is one of the most fascinating cultures of all time They flourished in Mesoamerica from around 300 BC to 900 AD and their cities were more complex than any others at the time The Maya built roads developed an accurate measurement system for distances and built enormous stone temples that served as centers of worship astronomy and astrology They also had a well developed written language which they used to record their history and communicate important messages This post will explore some of their most significant discoveries that have shaped our world today The Mayan culture flourished in the Mesoamerican region from around 300 BC The society was known for its unique and advanced knowledge of architecture astronomy calendar making and mathematics The Mayans were one of the first civilizations in the Americas to develop a written language and they had an extensive knowledge of astronomy which they used to predict eclipses Mayans lived in Mexico and Central America especially on the Yucatan Peninsula where they built sophisticated cities with pyramids and

temples made of stone such as Chich n Itz or Uxmal They also built many buildings with flat roofs named patios where people would come together to worship their gods while they watched dances performed by priests dressed in colorful costumes made from jaguar skins The Maya had a well developed written language The Mayan writing system was developed before the invention of the wheel and is one of the oldest in existence It was first used to record history astronomy and astrology but later became a way for people to communicate with each other The Mayans turned out to be better mathematicians than we thought they were Their calendar could easily track lunar cycles solstices and equinoxes without error it also predicted eclipses with great accuracy
