Hornstein, 2013-06-28 As Ruskin suggests in his *Seven Lamps of Architecture* We may live without architecture and worship without her but we cannot remember without her We remember best when we experience an event in a place But what happens when we leave that place or that place no longer exists This book addresses the relationship between memory and place and asks how architecture captures and triggers memory It explores how architecture exists as a material object and how it registers as a place that we come to remember beyond the physical site itself It questions what architecture is in the broadest sense assuming that it is not simply buildings Rather architecture is considered to be the mapping of physical mental or emotional space The idea that we are all architects in some measure as we actively organize and select pathways and markers within space is central to this book's premise Each chapter provides a different example of the manifold ways in which the physical place of architecture is curated by the architecture in our mental space our imaginary toolbox when we think of a place and look at a photograph or visit a site and describe it later or send a postcard By connecting architecture with other disciplines such as geography visual culture sociology and urban studies as well as the fine and performing arts this book puts forward the idea that a conversation about architecture is not exclusively about formal isolated buildings but instead must be deepened and broadened as spatialized visualizations and experiences of place *InTerior Design -*

Convolute Håkan Gulliksson, The home is under siege both because it is an enormous potential market and because of changing human behaviours It is also interesting as a platform for new technology and for analysis of everyday life as in this essay We will describe the home as a context where the interactors are humans inhabitants things artefacts in the home and information The interactions at home are activities and routines This essay presents and structures quotes and thoughts on the organization and decoration of the home another huge topic To limit the scope somewhat we will look for theory to discuss only related to homes of the western middle class The essay is yet another piece in a puzzle to understand information technology in the future **Urban Blue Spaces** Simon Bell, Lora E. Fleming, James Grellier, Friedrich

Kuhlmann, Mark J. Nieuwenhuijsen, Mathew P. White, 2021-09-30 This book presents an evidence based approach to landscape planning and design for urban blue spaces that maximises the benefits to human health and well being while minimising the risks Based on applied research and evidence from primary and secondary data sources stemming from the EU funded BlueHealth project the book presents nature based solutions to promote sustainable and resilient cities Numerous cities around the world are located alongside bodies of water in the form of coastlines lakes rivers and canals but the relationship between city inhabitants and these water sources has often been ambivalent In many cities water has been polluted engineered or ignored completely But due to an increasing awareness of the strong connections between city people nature and water and health this paradigm is shifting The international editorial team consisting of researchers and professionals across several disciplines leads the reader through theoretical aspects evidence illustrated case studies risk assessment and a series of validated tools to aid planning and design before finishing with overarching planning and design principles for a range of blue space types Over 200 full colour illustrations accompany the case study examples from geographic locations all over the world including Portugal the United Kingdom China Canada the US South Korea Singapore Norway and Estonia With green and blue infrastructure now at the forefront of current policies and trends to promote healthy sustainable cities Urban Blue Spaces is a must have for professionals and students in landscape planning urban design and environmental design Open Access for the book was funded by the European Union s Horizon 2020 research and innovation programme under grant agreement No 666773 The Open Access version of this book available at www.taylorfrancis.com/books/oa-edit/10.4324/9780429056161 has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Advances in Affective and Pleasurable Design WonJoon Chung, Cliff Sungsoo Shin, 2016-07-26 This book discusses the latest advances in affective and pleasurable design It reports on important theoretical and practical issues covering a wealth of topics including aesthetics in product and system design design driven innovation affective computing evaluation tools for emotion Kansei engineering for products and services and many more This timely survey addresses experts and industry practitioners with different backgrounds such as industrial designers emotion designers ethnographers human computer interaction researchers human factors engineers interaction designers mobile product designers and vehicle system designers Based on the AHFE 2016 International Conference on Affective and Pleasurable Design held on July 27-31 2016 in Walt Disney World Florida USA the book represents an inspiring guide for all researchers and professionals in the field of design

Space Syntax Laura Vaughan, John Peponis, Ruth Conroy Dalton, 2025-04-30 Professor Bill Hillier spent most of his career at The Bartlett University College London where he founded and developed with a team of

colleagues an original research programme that set the study of architecture on a firm scientific basis His transformational way of thinking about buildings and cities influenced generations of scholars researchers and practitioners within the built environment disciplines and way beyond in fields ranging from archaeology and biology to physics and zoology Space Syntax Selected papers by Bill Hillier provides a canon of works that reflects the progression of Hillier s ideas from the early publications of the 1970s to his most recent work published before his death in 2019 This selection of influential works ranges from his papers on architecture as a professional and research discipline through to his later papers that present a theory of the spatial structure of the city and its social functions By bringing together writing from across his career span of half a century with specially commissioned introductions by a wide range of international experts in the field we are able to contextualise and show the range and evolution of Hillier s key ideas

Crystal Growth of Multifunctional Borates and Related Materials Nikolay I Leonyuk,2019-05-03 Borate crystals are attractive for different technological applications because of their favorable physical and chemical properties like stability and high transparency both high thermal and non linear optical coefficients making them ideal active media for highly efficient solid state lasers In this Special Issue different aspects of multifunctional borate crystals are discussed including ortho and oxyorthoborates and compounds with condensed anions as well as their nonlinear optical and laser properties and piezoelectric characteristics For this reason complex investigations of the phase relationships in multi component borate melts the study of crystal growth conditions of novel high temperature borates and the development of the crystallization conditions composition structure and properties concept will provide a scientific basis for growth technologies of high performance electronic and optical devices and components with a variety of industrial medical and many other applications In the meantime these relationships can help to estimate the affinity of synthetic borate materials with their natural prototypes and structural analogues

the papers presented at the 11th European Conference on Product Process Modelling ECPPM 2016 Cyprus 7-9 September 2016. The contributions cover complementary thematic areas that hold great promise for the advancement of research and technological development in the modelling of complex engineering systems encompassing a substantial number of high quality contributions on a large spectrum of topics pertaining to ICT deployment instances in AEC FM including Information and Knowledge Management, Construction Management, Description Logics and Ontology Application in AEC Risk Management, 5D nD Modelling, Simulation and Augmented Reality, Infrastructure Condition Assessment, Standardization of Data Structures, Regulatory and Legal Aspects, Multi Model and distributed Data Management, System Identification, Industrialized Production, Smart Products and Services, Interoperability, Smart Cities, Sustainable Buildings and Urban Environments, Collaboration and Teamwork, BIM Implementation and Deployment, Building Performance Simulation, Intelligent Catalogues and Services.

Multi-Agent Systems Adelinde M. Uhrmacher, Danny Weyns, 2018-10-08

Methodological Guidelines for Modeling and Developing MAS Based Simulations The intersection of agents modeling simulation and application domains has been the subject of active research for over two decades. Although agents and simulation have been used effectively in a variety of application domains, much of the supporting research remains scattered in the literature, too often leaving scientists to develop multi agent system MAS models and simulations from scratch. **Multi Agent Systems Simulation and Applications** provides an overdue review of the wide ranging facets of MAS simulation including methodological and application oriented guidelines. This comprehensive resource reviews two decades of research in the intersection of MAS simulation and different application domains. It provides scientists and developers with disciplined engineering approaches to modeling and developing MAS based simulations. After providing an overview of the field's history and its basic principles as well as cataloging the various simulation engines for MAS, the book devotes three sections to current and emerging approaches and applications. **Simulation for MAS** explains simulation support for agent decision making, the use of simulation for the design of self organizing systems, the role of software architecture in simulating MAS and the use of simulation for studying learning and stigmergic interaction. **MAS for Simulation** discusses an agent based framework for symbiotic simulation, the use of country databases and expert systems for agent based modeling of social systems, crowd behavior modeling, agent based modeling and simulation of adult stem cells and agents for traffic simulation. **Tools** presents a number of representative platforms and tools for MAS and simulation including Jason, James II, SeSAM and RoboCup Rescue. Complete with over 200 figures and formulas, this reference book provides the necessary overview of experiences with MAS simulation and the tools needed to exploit simulation in MAS for future research in a vast array of applications including home security, computational systems, biology and traffic management.
