Woodworth, 1875 *Übersicht über die im Jahre ... auf dem Gebiete der englischen Philologie erschienenen Bücher, Schriften und Aufsätze*, 1911 The Cholera Epidemic of 1873 in the United States United States. Department of the Army. Office of the Surgeon General, 1875 **International Catalogue of Scientific Literature, 1901-1914**, 1902 North German Opera in the Age of Goethe Thomas Bauman, 1985 This book is the first study of the development of German opera in northern Germany from the first comic operas of Johann Adam Hiller at Leipzig in 1766 to the end of the century Intellectually and historically the period witnessed the flowering of the German stage and German letters German opera was an inseparable part of the new aspirations of the German stage during the Enlightenment Thomas Bauman stresses the vital role of the mixed repertories of German companies in effecting changes in the genre North German opera began as a basically literary genre It then changed dramatically in response to two major trends first the contact with the serious elements and styles of tragedy and secondly the triumph on German stages of Italian French and Viennese comic operas The book is generously illustrated with music examples There is also a complete catalogue of texts of North German opera those composed for performance and unset published librettos both cross indexed under the librettists names **International Catalogue of Scientific Literature**, 1902 **The Music of Carl Philipp Emanuel Bach** David Schulenberg, 2014 Of the four sons of J S Bach who became composers Carl Philipp Emanuel 1714-88 was the most prolific the most original and the most influential both during and after his lifetime This first full length English language study critically surveys his output examining not only the famous keyboard sonatas and concertos but also the songs chamber music and sacred works many of which resurfaced in 1999 and have not previously been evaluated The book also outlines the composer's career from his student days at Leipzig and Frankfurt Oder to his nearly three decades as court musician to Prussian King Frederick the Great and his last twenty years as cantor at Hamburg Focusing on the composer's choices within his social and historical context the book shows how C P E Bach deliberately avoided his father's style while adopting the

manner of his Berlin colleagues derived from Italian opera A new perspective on the composer emerges from the demonstration that C P E Bach best known for his virtuoso keyboard works refashioned himself as a writer of vocal music and popular chamber compositions in response to changing cultural and aesthetic trends Supplementary texts and musical examples are included on a companion website David Schulenberg is professor of music at Wagner College and teaches historical performance at the Juilliard School He is the author of *The Music of Wilhelm Friedemann Bach* University of Rochester Press 2010

The Alphorn through the Eyes of the Classical Composer Frances Jones, 2021-04-06 The Alphorn through the Eyes of the Classical Composer is the first and definitive book to be written about the alphorn in English It has been written with English speaking readers in mind as it examines the extensive interest of primarily non Swiss composers writers and artists in the alphorn as a symbol of the Alps the influence and significance of the alphorn in culture literature and the arts across the globe and the ways in which the instrument has been specifically utilised by the Swiss as the iconic representation of their country This book also explores the use of the musical language of the alphorn call to ascertain why and how such references as those of Berlioz or Beethoven can convey so much meaning Dr Jones seeks out what it is that a composer brings into the concert hall the theatre the opera house the church or the drawing room by such a quotation to what heritage they are referring and upon what basis there are grounds for an assumption that such a reference will be understood by an audience The book which will be of interest to researchers in Swiss cultural studies and ethnomusicology builds on Dr Jones's research and PhD thesis The six chapters deal with a variety of topics including a basic introduction to the alphorn and an exploration of the promotion of the instrument as the symbol of Switzerland as well as the reasons behind symbolic references to alphorn motifs by European and British composers in concert repertoire jazz and film

Egyptian Myths and Mysteries Rudolf Steiner, 1971 12

Lectures Leipzig September 2 14 1908 CW 106 Rudolf Steiner emphasizes the astonishing and special relationship between our own time and that of ancient Egypt how in the natural rhythm of the ages the so called third post Atlantean Egyptian epoch is mirrored by the fifth present epoch In this sense today it is especially relevant to look at ancient Egypt with fresh eyes The evolution of Western civilization has been profoundly influenced by Egyptian myths through the Greek mysteries Because of other influences however this heritage has degenerated thinking has mummified and and myth has all but disappeared Consequently it is important to revive the seed of goodness passed down to us from ancient Egypt Through true imagination it is our task to renew human knowledge related to the creative forces in nature which the Egyptians attempted through the Osiris Isis myth and the Greeks through the myth of Demeter This is what Rudolf Steiner attempts in this lecture cycle Steiner's subjects include experiences of Egyptian initiations esoteric anatomy and physiology the stages of evolution of the human form and much more The final lecture is on the Christ impulse as the conqueror of matter This volume is a translation from German of *gyptische Mythen und Mysterien im Verh ltnis zu den wirkenden Geisteskr ften der Gegenwart* GA 106

Bach John Eliot Gardiner, 2013-10-29 Johann Sebastian Bach is one of the most unfathomable composers in the history of music How can such sublime work have been produced by a man who when we can discern his personality at all seems so ordinary so opaque and occasionally so intemperate John Eliot Gardiner grew up passing one of the only two authentic portraits of Bach every morning and evening on the stairs of his parents house where it hung for safety during World War II He has been studying and performing Bach ever since and is now regarded as one of the composer's greatest living interpreters The fruits of this lifetime's immersion are distilled in this remarkable book grounded in the most recent Bach scholarship but moving far beyond it and explaining in wonderful detail the ideas on which Bach drew how he worked how his music is constructed how it achieves its effects and what it can tell us about Bach the man Gardiner's background as a historian has encouraged him to search for ways in which scholarship and performance can cooperate and fruitfully coalesce This has entailed piecing together the few biographical shards scrutinizing the music and watching for those instances when Bach's personality seems to penetrate the fabric of his notation Gardiner's aim is to give the reader a sense of inhabiting the same experiences and sensations that Bach might have had in the act of music making This I try to show can help us arrive at a more human likeness discernible in the closely related processes of composing and performing his music It is very rare that such an accomplished performer of music should also be a considerable writer and thinker about it John Eliot Gardiner takes us as deeply into Bach's works and mind as perhaps words can The result is a unique book about one of the greatest of all creative artists
