Wicken, 2020-11-09 At the beginning of the

twentieth century Lake Tahoe and the Donner Summit region became California's first developed winter sports areas Plentiful snowfall and newly built highways opened up the summer playground for visitors year round and skiing flourished The Sierra Ski Club formed in 1925 attracting members eager to experience everything the mountains had to offer People flocked to the slopes visiting places like Clair Tappaan Lodge in Soda Springs boasting one of the summit's earliest ski tows and the Yuba Gap Lodge a pioneer in night skiing Join Ingrid P Wicken award winning author and ski historian as she recounts the fascinating beginnings of this celebrated ski hub Understanding Extreme Sports: A Psychological Perspective Eric Brymer, Francesco Feletti, Erik Monasterio, Robert D. Schweitzer, 2020-03-30 Extreme sports those activities that lie on the outermost edges of independent adventurous leisure activities where a mismanaged mistake or accident would most likely result in death have developed into a significant worldwide phenomenon Brymer Patterson 2002 and Generation Z turn to extreme sports because they are popular and linked to escapism Giannoulakis Pursglove 2017 Arguably extreme sports now support a multi billion dollar industry and the momentum seems to be intensifying Traditional explanations for why extreme sports have become so popular are varied For some the popularity is explained as the desire to rebel against a society that is becoming too risk averse for others it is about the spectacle and the merchandise that is associated with organised activities and athletes For others it is just that there are a lot of people attracted by risk and danger or just want to show off For others still it is about the desire to belong to sub cultures and the glamour that goes with extreme sports Some seek mastery in their chosen activity and in situations of significant challenges This confusion is unfortunate as despite their popularity there is still a negative perception about extreme sports participation There is a pressing need for clarity The dominant research perspective has focused on positivist theory driven perspectives that attempt to match extreme sports against predetermined characteristics For the most part empirical research has conformed to predetermined societal perspectives Other ways of knowing might reveal more nuanced perspectives of the human dimension of extreme sport participation This special edition brings together cutting edge research and thought examining psychology and extreme

sports with particular attention paid to the examination of motivations for initial participation continued participation effective performance and outcomes from participation
