Deep-Sky Companions: The Caldwell Objects Stephen James O'Meara, 2016-09-26. The Caldwell Catalogue compiled by the late Sir Patrick Moore (1923-2012) has delighted amateur astronomers worldwide since its publication in 1995. Twenty years on, Stephen James O'Meara revisits his guide to these 109 deep sky delights, breathing new life into them and the 20 additional observing targets included as an appendix. This second edition retains O'Meara's detailed visual descriptions and sketches, accompanied by stunning new images taken by amateur photographer Mario Motta and observations by Magda Streicher. The astrophysical descriptions have been updated to account for the many advances in our understanding of the objects, not least due to an armada of space-borne observatories and the new technologies used in large ground-based telescopes. Ideal for observers who have completed the Messier objects and are looking for their next challenge, *Deep Sky Companions: The Caldwell Objects* is a fitting tribute from a renowned visual observer to one of astronomy's most famous personalities. *Optical, Infrared, and Millimeter Space Telescopes*, 2004 **Nuclear Science Abstracts**, 1970

Atlas of the Messier Objects Ronald Stoyan, 2024-03-28. Messier's catalog of 110 star clusters, nebulae, and galaxies is the most popular list of deep sky gems. The first edition of this stunning reference atlas was hailed as the most comprehensive, detailed, and beautiful account of the Messier objects then available. The second edition continues this trend with thoroughly investigated and updated astrophysical, historical, and observational information for every object. The main object photos have all been replaced with more than 150 new images from some of the world's best amateurs, displaying the objects' splendor through large-scale color images. Historical sketches from classical observers from the nineteenth century are presented alongside the author's modern deep sky drawings. Extensive information is given on visual observation, from using the naked eye and binoculars through to large modern amateur telescopes. Astronomers of all abilities will delight in the atlas's return as your guide to the sky's finest objects. Basic Observational Data William E. Howard, 1969 **English Mechanics**, 1929
