Owen, Lazar Berman, Benjamin S. Lambeth, Forrest E. Morgan, Steven Paget, 2022-11-29 Is it possible for two combatants who possess equally strong air forces to conduct limited warfare by restraining air operations In *Restraining Air Power* Robert C Owen and contributing authors aim to answer this question by providing theoretical and empirical assessments of restrained air warfare through five historical case studies since 1945 Through an objective analysis of the past this collection evaluates the principles of escalation and escalation management in conventional warfare scenarios to better understand when why and how peer opponents in past conflicts have expanded or restrained air operations The surge in cyber warfare the development of artificially intelligent weaponry and the founding of the United States Space Force in 2019 mean that analysts and military planners must be prepared to think about escalation management and peer conflict in increasingly complicated and arduous ways This comprehensive study provides readers with refined theoretical visions of the possibilities and challenges of

managing escalation as a powerful mode of warfare between opponents who believe they must choose between sacrificing their own national interests or risking escalated destruction of their economies military forces and governing authority The analysis within the pages of this volume updates our understanding of air warfare within a world of unprecedented military complexity and as such will hold immense value for specialists in advanced military studies as well as those studying international relations and history *DMY International Design Festival Berlin 2008* Christiane Isenberg, Lia Lambert, 2008

Unlocking Economic Development Ahmed Tahiri Jouti, 2024-07-18 Despite the abundant literature about development policies and solutions many developing countries continue to struggle with basic development issues The author of this book argues that such a situation is due to the absence of an unlearning process that would aid in adjusting negative mindsets and outdated mental models that hinder economic development This book addresses development issues from the behavioral perspective linking negative mindsets and behaviors to growth and development strategies and policies It identifies six mindsets and actions that impede the economic development of underdeveloped nations Then it suggests solutions to upgrade the mindsets according to the plans and policies Moreover the book highlights the different concepts and phenomena in a straightforward way with simple figures to facilitate their understanding for people who do not necessarily have a background in business or economics At the same time it fully respects scientific standards in addressing the topics and themes under discussion Each chapter identifies the state of mind needed to unlearn with real examples and experiences and offers suggestions to undertake and accomplish the unlearning process Based on real and clear cut examples the book presents the main beliefs and psychological mechanisms that lead to underperforming behaviors of customers investors entrepreneurs and policy makers Thus the main audience for the book is scholars students and researchers in economics and development as well as policymakers wishing to attempt new approaches to counteract the boomerang effect
