W. Singer,2011-06-16 Some have claimed that War is too important to be left to the generals but P W Singer asks What about the business executives Breaking out of the guns for hire mold of traditional mercenaries corporations now sell skills and

services that until recently only state militaries possessed Their products range from trained commando teams to strategic advice from generals This new Privatized Military Industry encompasses hundreds of companies thousands of employees and billions of dollars in revenue Whether as proxies or suppliers such firms have participated in wars in Africa Asia the Balkans and Latin America More recently they have become a key element in U S military operations Private corporations working for profit now sway the course of national and international conflict but the consequences have been little explored In this book Singer provides the first account of the military services industry and its broader implications *Corporate Warriors* includes a description of how the business works as well as portraits of each of the basic types of companies military providers that offer troops for tactical operations military consultants that supply expert advice and training and military support companies that sell logistics intelligence and engineering In an updated edition of P W Singer s classic account of the military services industry and its broader implications the author describes the continuing importance of that industry in the Iraq War This conflict has amply borne out Singer s argument that the privatization of warfare allows startling new capabilities and efficiencies in the ways that war is carried out At the same time however Singer finds that the introduction of the profit motive onto the battlefield raises troubling questions for democracy for ethics for management for human rights and for national security

conducting operations and from triumphs to tragedies Cold War Warriors documents the P 3 s service in the RAAF in the context of the unfolding domestic and international events that shaped the aircraft s evolving missions As well as being a story of the RAAF Orions and their growing capabilities Cold War Warriors is also the story of the crews who flew the aircraft Using their words Cold War Warriors faithfully describes a number of incidents both on the ground and in the air to provide a sense of the enormous breadth of service the P 3 Orion has provided to the Royal Australian Air Force to Australia and to our allies

**Financing National Defense** Lawrence R. Jones, Philip J. Candreva, Marc R. DeVore, 2011-12-01 A myth from the colonial period was that Americans could defend themselves by keeping a rifle in the closet and when needed grab it and march off to battle in times of crisis Unfortunately providing national defense is more complicated than that indeed it was more complicated even during the Revolutionary war General George Washington s struggles to form a standing army supported by workable logistics and supply processes and to get funding for both from the Revolutionary Congress are well documented Financing national defense requires planning and resourcing in advance Reacting at the instant of crisis is too late Building an educated highly trained and capable Armed Forces and the acquisition of defense weapons and weapons systems has long lead times and involves making decisions the consequences of which are likely to last for decades These decisions include how to recruit and retain military and civilian personnel as well as designing buying and fielding a vast array of ground weapons ships aircraft and other weaponry A decision to buy a major defense weapons system for example

sets in motion a chain of other decisions that will affect the U S its allies and enemies around the world Implementation of such decisions is financed through the U S federal government and Department of Defense budget processes in a planned yet highly and pluralistic and disaggregated system for determining how to advocate acquire and allocate scarce resources in a manner that culminates in congressional and presidential approval In this book we examine the concepts and practices of defense financing provide a detailed description and analysis of resource policy decision making financial management and budget execution processes and analyze the most significant features of the national defense and U S federal government resource decision and management system The book assesses the numerous factors including those that characterize the complex budget review and appropriation decision making dynamics of Congress that make U S defense finance and budgeting different from any other system in the world In addition in a concluding chapter the book compares U S defense policy and budgeting to other nations in different regions of the globe drawing conclusions about the effects of U S defense policy and defense financing abroad in regions including Europe Russia the Middle East and Asia     *Aircraft & Aerospace* ,1989     **Military History** ,1990-08     *The Battle of An-Nasiriyah* Rod Andrew (Jr.),2009
