Jacket *Chicago's Greatest Year, 1893* Joseph Gustaitis, 2013-05-01 In 1893 the 27 5 million visitors to the Chicago World's Fair feasted their eyes on the impressive architecture of the White City lit at night by thousands of electric lights In addition to marveling at the revolutionary exhibits most visitors discovered something else beyond the fair's 633 acres lay a modern metropolis that rivaled the world's greatest cities The Columbian Exposition marked Chicago's arrival on the world stage but even without the splendor of the fair 1893 would still have been Chicago's greatest year An almost endless list of achievements took place in Chicago in 1893 Chicago's most important skyscraper was completed in 1893 and Frank Lloyd Wright opened his office in the same year African American physician and Chicagoan Daniel Hale Williams performed one of the first known open heart surgeries in 1893 Sears and Roebuck was incorporated and William Wrigley invented Juicy Fruit gum that year The Field Museum the Art Institute of Chicago and the Museum of Science and Industry all started in 1893 The Cubs new ballpark opened in this year and an Austro-Hungarian immigrant began selling hot dogs outside the World's Fair grounds His wares became the famous Chicago hot dog Cities are not buildings cities are people writes author Joseph Gustaitis Throughout the book he brings forgotten pioneers back to the forefront of Chicago's history connecting these important people of 1893 with their effects on the city and its institutions today The facts in this history of a year range from funny to astounding showcasing innovators civic leaders VIPs and power brokers who made 1893 Chicago about so much more than the fair **The extended self** Chris Abel, 2016-10-28 In this wide-ranging study of architecture and cultural evolution the author argues that underlying the global environmental crisis is a general resistance to changing personal and social identities shaped by a technology-based culture and its energy-hungry products The book traces the roots of that culture to the coevolution of Homo sapiens and technology from the first use of tools as artificial extensions of the human body to the motorised cities spreading around the world whose uncontrolled effects are changing the planet itself Advancing a new concept of the meme called the technical meme as the primary agent of cognitive extension and technical embodiment the author proposes a theory of the extended self encompassing material and spatial as well as psychological and social elements Drawing upon research from philosophy psychology and the neurosciences the book presents a new approach to environmental and cultural studies that will appeal to a broad readership searching for insights into the crisis **The Grove Encyclopedia of American Art** Joan M. to tell a chronological story about the history of the future in the past century He defines six separate eras of future narratives from 1920 to the present day and argues that the milestones reached during these years especially related to air and space travel atomic and nuclear weapons the women s and civil rights movements and the advent of biological and genetic engineering sparked the possibilities of tomorrow in the public s imagination and helped make the twentieth century the first century to be significantly more about the future than the past The idea of the future grew both in volume and importance as it rode the technological wave into the new millennium and the author tracks the process by which most people to some degree have now become futurists as the need to anticipate tomorrow accelerates Sky Scrapers Andres Lepik,2004 This title reveals every facet of the skyscraper as an architectural icon Architectural Record ,2001
