Florida Studies General Editor, Claudia Slate, 2009-05-05 Florida was the first region of the United States
to be discovered explored and after a fashion settled by Euroamericans Its population in the early 21st century is
approaching 17 million Within years the number of people living in the state will surpass those living in New York and the
Sunshine State will become the most populous area east of the Mississippi The first book in English about Florida was
written by Jean Ribault A French adventurer Ribault established a colony of Huguenots near present day Jacksonville He was
captured by the very able Spanish commander Pedro Menendez who ordered his French rival and all his minions killed The
state's long and colorful past is matched by its equally long and colorful literary production Strangely critical assessment of
Florida literature has lagged far behind With this volume the Florida College English Association has formally begun an effort

to correct this lamentable oversight Included are papers on every aspect of Florida literature and history by scholars from every part of the state who are employed in every kind of institution of higher learning Of special interest are the studies of Florida literature in the 19th century and in the late 20th and early 21st centuries areas that are generally ignored in national journals The papers on the contributions of African American literary figures such as Zora Hurston and James Weldon Johnson are noteworthy Of particular interest are the suggestions for teaching Florida studies in the classroom which can be adapted for high school as well as college students Slattery's Hurricane Herman Wouk,1956 The Exhibitor,1947 Some issues include separately paged sections Better management Physical theatre extra profits Review Servisection
