Interaction and Connectivity in the Greater Southwest
 Karen Harry, Barbara J. Roth, 2019-03-21 This volume of proceedings from the fourteenth biennial Southwest Symposium explores different kinds of social interaction that occurred prehistorically across the Southwest The authors use diverse and innovative approaches and a variety of different data sets to examine the economic social and ideological implications of the different forms of interaction presenting new ways to examine how social interaction and connectivity influenced cultural developments in the Southwest The book observes social interactions role in the diffusion of ideas and material culture the way different social units especially households interacted within and between communities and the importance of

interaction and interconnectivity in understanding the archaeology of the Southwest's northern periphery. Chapters demonstrate a movement away from strictly economic driven models of social connectivity and interaction and illustrate that members of social groups lived in dynamic situations that did not always have clear cut and unwavering boundaries. Social connectivity and interaction were often fluid, changing over time. Interaction and Connectivity in the Greater Southwest is an impressive collection of established and up and coming Southwestern archaeologists collaborating to strengthen the theoretical underpinnings of the discipline. It will be of interest to professional and academic archaeologists as well as researchers with interests in diffusion, identity, cultural transmission, borders, large scale interaction, or social organization.

Kayenta Anasazi Archaeology and Navajo Ethnohistory on the Northwestern Shonto Plateau
 Alan R. Schroedl, 1989 **Proceedings of the Anasazi Symposium, 1981** Jack E. Smith, 1983 **Prehistoric Culture Change on the Colorado Plateau** Shirley Powell, Francis E. Smiley, 2016-02. A collection of writings by participants in the Black Mesa Archaeological Project offers a synthesis of Kayenta area archaeology, examining the ancestral Puebloan and Navajo occupation of the Four Corners region and analysing faunal, lithic, ceramic, chronometric and human osteological data to construct an account of the prehistory and ethnohistory of northern Arizona that demonstrates how organizational variation and other aspects of culture change are largely a response to a changing natural environment.

Prehistoric Stone Technology on Northern Black Mesa, Arizona William J. Parry, Andrew L. Christenson, 1987 **Ancestral Hopi Migrations** Patrick D. Lyons, 2016-10-15. Southwestern archaeologists have long speculated about the scale and impact of ancient population movements. In *Ancestral Hopi Migrations*, Patrick Lyons infers the movement of large numbers of people from the Kayenta and Tusayan regions of northern Arizona to every major river valley in Arizona, parts of New Mexico and northern Mexico. Building upon earlier studies, Lyons uses chemical sourcing of ceramics and analyses of painted pottery designs to distinguish among traces of exchange, emulation and migration. He demonstrates strong similarities among the pottery traditions of the Kayenta region, the Hopi Mesas and the Homolovi villages near Winslow, Arizona. Architectural evidence marshaled by Lyons corroborates his conclusion that the inhabitants of Homolovi were immigrants from the north. Placing the Homolovi case study in a larger context, Lyons synthesizes evidence of northern immigrants recovered from sites dating between A.D. 1250 and 1450. His data support Patricia Crown's contention that the movement of these groups is linked to the origin of the Salado polychromes and further indicate that these immigrants and their descendants were responsible for the production of Roosevelt Red Ware throughout much of the Greater Southwest. Offering an innovative juxtaposition of

anthropological data bearing on Hopi migrations and oral accounts of the tribe's origin and history Lyons highlights the many points of agreement between these two bodies of knowledge Lyons argues that appreciating the scale of population movement that characterized the late prehistoric period is prerequisite to understanding regional phenomena such as Salado and to illuminating the connections between tribal peoples of the Southwest and their ancestors Archaeological Series ,1980 *The Kiva* ,1993 **Catalog of Museum Publications & Media** Paul Wasserman, Esther Herman, Dynamics of Southwest Prehistory Linda S.
