Ethical Trade, Gender and Sustainable Livelihoods Kiah Smith,2014-03-21 Fair and ethical trade is often criticized for being highly gendered and for institutionalizing the ethical values of consumers the priorities of NGOs and governments and most of all food retailers But little is known about how women smallholder farmers experience diverse ethical standards or whether and how standards reflect their values local cultural and environmental contexts or priorities for achieving sustainable livelihoods Linking gender smallholder livelihoods and global ethical trade regulations this book reveals that multiple understandings of social justice environmental sustainability and well being or ethicality exist in parallel to those institutionalized in ethical trade schemes Through an in depth case study of smallholder subsistence and French

bean farming in Kenya the book grounds the analysis of livelihoods gender and ethical trade in women smallholders perspectives links the macro level of markets with the micro level of livelihoods and engenders relations of power structure and agency in food networks It brings together disparate bodies of theory to illustrate the knowledge strategies and values of women smallholder farmers that are often beyond the scope of ethical trade regulations It also provides a challenging new vision for doing food systems research **Bulletin of Bibliography and Magazine Subject-index ,1907**
