Hastings, past and present: with notices of the most remarkable places in the neighbourhood, by the author of 'A handbook to Hastings and St. Leonards' and other works Mary Matilda Howard, 1855 [Hastings, Past and Present](#) Mary Matilda Howard, 1855 *Special Scientific Report* ,1965 *The Zoologist* ,1878 [Animals under logs and stones](#) C. Philip Wheeler, Helen J. Read, Charlotte E. Wheeler, 2023-07-11 Logs stones and the like provide an interesting interface between the damp depths of the soil and the drier open ground surface offering refuges for a fascinating array of animals The communities of organisms that live beneath them are little noticed and even less studied yet the potential for ecological work here is great Some of the animals are relatively large and frequently not difficult to find They exhibit a wide range of lifestyles from slow slugs or snails to very fast centipedes from generalist to specialist feeders and from herbivores to carnivores With chapters covering the cryptosphere environment species groups identification guidelines and ideas for further research this much expanded and updated new edition also includes extensive easy to use comprehensively illustrated keys Ground surface debris can be found almost anywhere often presenting highly accessible microhabitats for study and bringing immediate rewards to the curious here is the ideal tool to unlock these worlds

Snails Paul Davies, 2016-09-03 The remains of snails in ancient soils and sediments are one of the most important biological indicators of past landscapes and have attracted study for well over a

century In spite of this the only English language textbook was published in 1972 and is long since out of print Snails provides a comprehensive up to date reference text on the use of snails as indicators of past environments in Quaternary landscape studies and archaeology It considers the use of terrestrial and freshwater sub fossil snail remains as indicators of Late Quaternary c last 15 000 years environmental change and as indicators of past environments and human impacts on the landscape The volume also demonstrates how an understanding of modern snail ecology can be used to enhance our interpretation of landscape archaeology and provides a detailed contextual approach to the main types of deposits in which snail remains are found Davies also puts forward an agenda for future research on the use of snails in archaeological and environmental reconstruction The Biological Bulletin Frank Rattray Lillie, Carl Richard Moore, Alfred Clarence

Redfield, 1926 Vols 17 21 105 contain Annual reports of the Marine Biological Laboratory for 1907 08 1952 *The Fairy Woods Children* Adriana Yamane, 2015-04-24 Much of the education of children is based on the antithesis between good and bad The images of bad are supposed to be the dark background against which the good can shine like courage shining through in times of danger The problem with this approach is that the good has only the chance to shine but not to grow The Fairy Woods Children thus tries to bring a new approach that allows goodness to grow and to expand in childrens consciousness without the need of a fear based background scenario While this may sound boring to grown up people who are used mainly to the strife of their daily life with all its troubles and fears small children do not need to have this handicap From an early age they need to be allowed to grow beyond this stage at which humankind is now and they need to learn more about the infinite possibilities that may lie before them in the future A lot of misunderstandings and conflicts arise from the lack of heart to heart communication which is the central point in the seven stories of the book Each story meant to be read at bedtime brings to the surface a deep inner longing of the soul to express itself As a child these were the stories I would have liked to hear and these were the teachings I would have liked to receive as they can greatly eliminate the need of the good versus bad antithesis And this is the reason why I would like to offer them to children and people like me who may appreciate art and beauty and who may wish to create for their families a lifestyle which is more soulful and kind The Chapel and Burial Ground on St Ninian's Isle, Shetland: Excavations Past and Present: v. 32 Rachel C.

Barrowman, 2017-12-02 This volume is the definitive account of the excavation which led to the discovery of the magnificent hoard of 28 pieces of Pictish silverware on St Ninian s Isle Shetland in 1958 It includes a reassessment of the original archives and finds including an ogham stone found on the site in 1876 and a fantastic collection of glass beads as well as several new small scale excavations on the site of the chapel and its burial ground Taken together this work reveals a long sequence of settlement beginning in the Iron Age The first church was built on the site in the 8th century and accompanied by a long cist cemetery with cross incised stones and shrine sculpture The church may have continued in use into the 9th or 10th centuries and the recent work has confirmed that the famous hoard was buried into its floor There was a degree of

continuity between the pre Christian and Christian burials with evidence that the site was a special place for burial before the advent of Christianity The report describes these burials in detail ending the story sometime between the 11th and end of the 12th centuries when an adult male who had died a violent death was moved to be buried on the site Thereafter the site was inundated with wind blown sand A new chapel with an accompanying long cist cemetery was then built above the earlier church and a chancel was added later The associated graveyard continued in use until around 1840 long after the building was demolished
