Harris, 2017-09-29 The Ascent of Man develops a comprehensive theory of human nature James F Harris sees human nature as an emergent property that supervenes a cluster of properties Despite significant overlap between individuals that have human nature and those that are biologically human the concept of human nature developed in this book is different Whether biologically human or not an individual may be said to possess human nature This

theory of human nature is called the cluster theory Harris takes as his point of departure Plato's comment that in learning what a thing is we should look to the ways in which it acts upon or is acted upon by other things He commits to a methodological naturalism and draws upon current views from the social and biological sciences The cluster theory he develops represents one of the very few completely novel theories of human nature developed in the post Darwin era It will prove most useful in dealing with philosophical questions involving such contemporary issues as cloning cybernetics and the possibility of extraterrestrial life The fundamental conceptual issue is how plastic and elastic is the nature of human nature Just how different might we imagine human beings to be and still be human in the sense that they still possess whatever it is that accounts for a unique nature The theory of human nature developed in this book is a descriptive dynamic bottom up non essentialist naturalist theory Harris is well versed in classical philosophy and contemporary behavioral science He writes in a graceful open ended way that both educates and illuminates renewed interest in what it means to be human **Boys' and**

Kathryn Jasper, 2024-10-15 In *Bounded Wilderness* Kathryn Jasper focuses on the innovations undertaken at the hermitage of Fonte Avellana in central Italy during the eleventh century by its prior Peter Damian d 1072 The congregation of Fonte Avellana experimented with reforming practices that led to new ways of managing property and relations among clergy nobles and the laity Jasper charts how Damian s notion of monastic reform took advantage of the surrounding topography and geography to amplify the sensory aspects of ascetic experiences By focusing on monastic landscapes and land ownership Jasper demonstrates that reform extended beyond abstract ideas Rather reform circulated locally through monastic networks and addressed practical concerns such as property boundaries and rights over water orchards pastures and mills Putting new sources both documentary and archaeological into conversation with monastic charters and Damian s letters *Bounded Wilderness* reveals the interrelationship of economic practices religious traditions and the natural environment in the idea and implementation of reform
