Nothing Stopped Sophie Cheryl

Bardoe,2018-06-12 The true story of eighteenth century mathematician Sophie Germain who solved the unsolvable to achieve her dream When her parents took away her candles to keep their young daughter from studying math nothing stopped Sophie When a professor discovered that the homework sent to him under a male pen name came from a woman nothing stopped Sophie And when she tackled a math problem that male scholars said would be impossible to solve still nothing stopped Sophie For six years Sophie Germain used her love of math and her undeniable determination to test equations that would predict patterns of vibrations She eventually became the first woman to win a grand prize from France s prestigious Academy of Sciences for her formula which laid the groundwork for much of modern architecture and can be seen in the book s illustrations Award winning author Cheryl Bardoe s inspiring and poetic text is brought to life by acclaimed artist Barbara McClintock s intricate pen and ink watercolor and collage illustrations in this true story about a woman who let nothing stop her *Popular Mechanics* ,2000-01 Popular Mechanics inspires instructs and influences readers to help them master the modern world Whether it s practical DIY home improvement tips gadgets and digital technology information on the newest cars or the latest breakthroughs in science PM is the ultimate guide to our high tech lifestyle **Bulletin of the**

Mulligan,2013-05-09 This book emanated primarily from concerns that the mathematical capabilities of young children continue to receive inadequate attention in both the research and instructional arenas Research over many years has revealed that young children have sophisticated mathematical minds and a natural eagerness to engage in a range of mathematical activities As the chapters in this book attest current research is showing that young children are developing complex mathematical knowledge and abstract reasoning a good deal earlier than previously thought A range of studies in prior to school and early school settings indicate that young learners do possess cognitive capacities which with appropriately designed and implemented learning experiences can enable forms of reasoning not typically seen in the early years Although there is a large and coherent body of research on individual content domains such as counting and arithmetic there have been remarkably few studies that have attempted to describe characteristics of structural development in young students mathematics Collectively the chapters highlight the importance of providing more exciting relevant and challenging 21st century mathematics learning for our young students The chapters provide a broad scope in their topics and approaches

to advancing young children's mathematical learning They incorporate studies that highlight the importance of pattern and structure across the curriculum studies that target particular content such as statistics early algebra and beginning number and studies that consider how technology and other tools can facilitate early mathematical development Reconceptualising the professional learning of teachers in promoting young children's mathematics including a consideration of the role of play is also addressed Bulletin of the Atomic Scientists ,1955-04 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world
