Dyreson, Robert Trumpbour, 2013-09-13 Many Americans know more about the stadiums that loom over their cityscapes or college campuses than they do about any other aspect of the nation's geography Stadiums serve as iconic monuments of urban and university identities Indeed the power of sport in modern American culture has produced sportscares landscapes literally shaped by their devotion to athletic competition Curiously given the importance of the secular cathedrals in American culture historians have paid little attention to these edifices *The Rise of Stadiums in the Modern United States Cathedrals of Sport* seeks to remedy that oversight This book will analyze stadiums from a variety of perspectives paying special attention to the links between the built environment in which Americans watch and play games and the larger social environments that the nation's sporting practices inhabit *The Rise of Stadiums in the Modern United States Cathedrals of Sport* explores the role of stadiums in shaping urban identities determining the economics of intercollegiate athletics influencing local and national politics This book was previously published as a special issue of the *International Journal of the History of Sport* *Sport in the Cultures of the Ancient World* Zinon Papakonstantinou, 2013-09-13 Sport has been practised

in the Greco Roman world at least since the second millennium BC It was socially integrated and was practised in the context of ceremonial performances physical education and established local and international competitions including most famously the Olympic Games In recent years the continuous re assessment of old and new evidence in conjunction with the development of new methodological perspectives have created the need for a fresh examination of central aspects of ancient sport in a single volume This book fills that gap in ancient sport scholarship When did the ancient Olympics begin How is sport depicted in the work of the fifth century historian Herodotus What was the association between sport and war in fifth and fourth century BC Athens What were the social and political implications of the practice of Greek style sport in third century BC Ptolemaic Egypt How were Roman gladiatorial shows perceived and transformed in the Greek speaking east And what were the conditions of sport participation by boys and girls in ancient Rome These are some of the questions that this book written by an international cast of distinguished scholars on ancient sport attempts to answer Covering a wide chronological and geographical scope ancient Mediterranean from the early first millennium BC to fourth century AD individual articles re examine old and new evidence and offer stimulating original interpretations of key aspects of ancient sport in its political military cultural social ceremonial and ideological setting This book was previously published as a special issue of the *International Journal of the History of Sport* **Militarism, Hunting, Imperialism** J.A. The Balkan Games and Balkan Politics in the

Interwar Years 1929 - 1939 Penelope Kissoudi,2013-10-18 The Balkan Games resulted on the one hand from the growth of modern European sport and the unsatisfactory performances of the Balkan athletes at national and international level and on the other hand from a desire to bring the Balkan peoples together in peace and concord The Games were initiated in Athens in 1929 and increasingly became an integral part of the political cultural and social life of the area The common global reality is that when an athletic event is staged attempted friendship seldom receives priority In the 1930s however the Balkan Games provided a rare example of an international athletic event bringing antagonistic states together in friendship This consideration of the significance of the Balkan Games as an instrument of political optimism provides clear evidence of the occasional positive influence of sport in politics The work is a case study of interest to political and social scientists and to historians of Europe and sport This book was previously published as a special issue of the International Journal of the History of Sport

Football and Community in the Global Context Adam Brown, Tim Crabbe, Gavin Mellor, 2013-10-31 Football clubs across the world continue to embody many of the collective symbols identifications and processes of connectivity which have long been associated with the notion of community In recent years however the very term community has become the focus of renewed interest within popular discourse and amongst academics politicians and policy makers It has become something of a buzz word wheeled out as both a lament to more certain times and as an appeal to a better future a term imbued with all the richness associated with human interaction

Community has also been employed increasingly within football for instrumental reasons concerned with policy and stadium redevelopment and in broader rhetoric about clubs their localities and fans This book brings together a range of key debates around contemporary understandings of community in world football Split into four sections it considers political and theoretical debates around football and its connection with community different national and ethnic football communities instrumental uses of football to bridge gaps within and between groups future directions in the football and community debate This book was published as a special issue of Soccer Society
