Social And Biological Aspects Of Ethnicity:

Social and Biological Aspects of Ethnicity Malcolm Chapman, 2023 This volume focuses on the biological and social aspects of ethnicity which comprises three chapters from anthropologists Biology and society are both considered and the bidirectional nature of influence between the two factors is emphasized throughout the text

Health and Ethnicity Helen Macbeth, Prakash Shetty, 2000-11-23 It is becoming increasingly apparent that certain diseases occur at higher frequencies in different ethnic groups e.g. Afro Caribbeans and sickle cell anaemia The causes for such differences are only just being investigated and the factors involved are clearly both genetic and non genetic The biological complexity lies in the interaction of genetic variation and lifestyle differences Cultural differences range from diet to traditional remedies from religious beliefs to marriage patterns and much more This multidisciplinary volume discusses these factors with contributions from geneticists, medics, anthropologists, epidemiologists and social scientists Anyone considering variation in health experience due to ethnic factors would be enriched by reading the different perspectives presented in this volume

The Concept of Race in Natural and Social Science E. Nathaniel Gates, 2014-05-01 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law, literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Authoritative commentary The series editor has put together a balanced selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and scholarly controversies Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field After reading the material even a beginning student will have an excellent grasp of the basics of

the subject **Ethnicity: Anthropological Constructions** Marcus Banks,2003-09-02 Ethnicity has been a key concept in anthropology and sociology for many years yet many people still seem uncertain as to its meaning its relevance and its relationship to other concepts such as race and nationalism In *Ethnicity Anthropological Constructions* the major anthropological and sociological approaches to ethnicity covering much of the significant literature and leading authors are outlined clearly and concisely The Meaning of Race Kenan Malik,1996-07-12 In *The Meaning of Race* Kenan Malik throws new light on the nature and origins of ideas of racial difference Arguing that the concept of race is a means through which Western society has come to understand the relationship between humanity society and nature the book re examines the relationship between Enlightenment thought and racial discourse clarifies the nature of scientific racism and presents a critique of postmodern theories of cultural difference Migration, Ethnicity, Race, and Health in Multicultural Societies Raj S. Bhopal,2014 This book discusses the concepts of migration race and ethnicity and demonstrates how these can be applied in scientific research policy making health service planning and health promotion Extensive examples are used to demonstrate the application of the theory **Public Health Reports** ,1994 **Culture and Modernity** Eliot Deutsch,1991-01-01 The crisis of modernity Incommensurability Relativism Language and non Western cultural traditions Culture and the ethical Culture and the aesthetic Culture and the religious Culture and the political Cultural identity Scientific progress **Race and Racism in Theory and Practice** Berel Lang,2000 This collection of original essays by scholars from a diverse range of fields examines issues of race in a variety of historical and geographical settings ranging from classical Greece to the contemporary Americas Europe and Asia The authors provide an important perspective on race both in its theoretical origins and in its actual appearances while paying close attention to the ways in which the study of race itself has been carried on or ignored by various disciplines **Racial Theories in Social Science** Sean Elias,Joe R. Feagin,2016-04-14 *Racial Theories in Social Science A Systemic Racism Critique* provides a critique of the white racial framing and lack of systemic racism analysis prevalent in past and present mainstream race theory As this book demonstrates mainstream racial analysis and social analysis more generally remain stunted and uncritical because of this unhealthy white framing of knowledge and evasion or downplaying of institutional structural and systemic racism In response to ineffective social science analyses of racial matters this book presents a counter approach systemic racism theory The foundation of this theoretical perspective lies in the critical insights and perspectives of African Americans and other people of color who have long challenged biased white framed perspectives and practices and the racially oppressive and exclusionary institutions and social systems created by whites over several centuries Ethnic Stratification and Economic Inequality around the World Max Haller in collaboration,Anja Eder,2016-03-03 The modern world is characterised by pervasive economic inequalities Strong economic growth in some developing countries has contributed to a degree to a reduction in the levels of inequality between nations yet inequality within nations remains high and in some cases continues

to increase Ethnic Stratification and Economic Inequality around the World investigates the reasons for these striking differences exploring the coincidence and interaction between economic stratification and ethnic differentiation Drawing on extensive international survey and statistical data the author develops a new theory and concrete hypotheses concerning the conditions which lead toward extreme inequality and those which tend toward greater equality A systematic examination of the interaction between class structures social stratification and ethnic differentiation this book sheds light on the manner in which the resulting social structures produce different levels of economic inequality offering a fivefold typology of patterns of ethnic stratification which can be applied to present day world regions Drawing on the work of Max Weber to provide a rigorous investigation of inequality around the world it demonstrates what sociology as a science of social reality can significantly contribute to our understanding of global economic stratification The book is relevant for a wide social scientific audience particularly for sociologists economists and political scientists working in a comparative perspective

Globalization George Ritzer, Paul Dean, 2014-11-19 Updated to reflect recent global developments the second edition of *Globalization A Basic Text* presents an up to date introduction to major trends and topics relating to globalization studies Features updates and revisions in its accessible introduction to key theories and major topics in globalization Includes an enhanced emphasis on issues relating to global governance emerging technology global flows of people human trafficking global justice movements and global environmental sustainability Utilizes a unique set of metaphors to introduce and explain the highly complex nature of globalization in an engaging and understandable manner Offers an interdisciplinary approach to globalization by drawing from fields that include sociology global political economy political science international relations geography and anthropology Written by an internationally recognized and experienced author team Socio-Spatial Inequalities in Contemporary Cities Alfredo Mela, Alessia Toldo, 2019-05-11 The book explores social inclusion exclusion from a socio spatial perspective highlighting the active role that space assumes in shaping social phenomena Unlike similar books it does not discuss exclusion and inclusion in particular geographical contexts but instead explains these phenomena starting from the dense and complex set of relationships that links society and space It particularly focuses on social differences and how the processes of exclusion and inclusion can produce a highly spatialized understanding of them for example when particular groups of people are perceived as being out of place At the same time within the context of the different approaches that policies adopt to contrast the phenomena of social exclusion it examines the role of participation as an instrument to promote bottom up inclusion and cohesion processes **Encyclopedia of Political Theory** Mark Bevir, 2010-03-18 Looking at the roots of contemporary political theory this three volume set examines the global landscape of all the key theories and the theorists behind them and provides concise to the point definitions of key concepts ideas schools and figures **On Race and Philosophy** Lucius Outlaw, 2016-01-08 *On Race and Philosophy* is a collection of essays written and published across the last twenty years which focus on matters of race philosophy and social and political

life in the West in particular in the US These important writings trace the author's continuing efforts not only to confront racism especially within philosophy but more importantly to work out viable conceptions of raciality and ethnicity that are empirically sound while avoiding chauvinism and invidious ethnocentrism The hope is that such conceptions will assist efforts to fashion a nation state in which racial and ethnic cultures and identities are recognized and nurtured contributions to a more just and stable democracy

Blood Politics Circe Sturm, 2002-03-20 *Blood Politics* offers an anthropological analysis of contemporary identity politics within the second largest Indian tribe in the United States one that pays particular attention to the symbol of blood The work treats an extremely sensitive topic with originality and insight It is also notable for bringing contemporary theories of race nationalism and social identity to bear upon the case of the Oklahoma Cherokee Pauline Turner Strong author of *Captive Selves Captivating Others The Politics and Poetics of Colonial American Captivity Narratives*

Ethnicity, Class, and Nationalism Anton L. Allahaar, 2005-06-28 Celebrants of an ever emerging globalization fly the banner of free trade the mass marketization of once faltering economies and rising economic and social standards for all Many opponents to globalization rightfully point out that borders still exist largely for the purposes of keeping one commodity in its place the labor commodity or the more familiar immigrant Arguments of this type are often steeped in economic and social discourse Race and ethnicity are seen as either being subsumed by this discourse or are entirely ignored as incidental to this type of political thought In *Ethnicity Class and Nationalism Caribbean and Extra Caribbean Dimensions* specialists writing on the Caribbean form of the nation state place race and ethnicity along with class in its proper context at the very foundations of the modern nation Editor Anton L. Allahaar has handpicked scholarship that is both contemporary and expert in its consideration of Caribbean geo politics Furthermore essays in this volume include comparative cases from around the globe In the interest of locating race and ethnicity as sociological and political categories that are inimical to contemporary conceptions of the nation state Allahaar explores spaces other than the Caribbean The result is a comparative study that is unique in scope and also in its level of scholarly reflection This book is the first of its kind It is essential reading for anyone interested in advancing their analysis of political economic social and cultural thought in the Caribbean

On Human Nature Michel Tibayrenc, Francisco J. Ayala, 2016-09-12 *On Human Nature Biology Psychology Ethics Politics and Religion* covers the present state of knowledge on human diversity and its adaptive significance through

a broad and eclectic selection of representative chapters This transdisciplinary work brings together specialists from various fields who rarely interact including geneticists evolutionists physicians ethologists psychoanalysts anthropologists sociologists theologians historians linguists and philosophers Genomic diversity is covered in several chapters dealing with biology including the differences in men and apes and the genetic diversity of mankind Top specialists known for their open mind and broad knowledge have been carefully selected to cover each topic The book is therefore at the crossroads between biology and human sciences going beyond classical science in the Popperian sense The book is accessible not only to specialists but also to students professors and the educated public Glossaries of specialized terms and general public references help nonspecialists understand complex notions with contributions avoiding technical jargon Provides greater understanding of diversity and population structure and history with crucial foundational knowledge needed to conduct research in a variety of fields such as genetics and disease Includes three robust sections on biological psychological and ethical aspects with cross fertilization and reciprocal references between the three sections Contains contributions by leading experts in their respective fields working under the guidance of internationally recognized and highly respected editors

Constructing Reality in Comparative Theology Paul S. Chung, 2022-09-29 Through an examination of Christian interaction with other religions Paul S Chung constructs a theology of comparative religion In the course of this construction he employs the work of Ernst Troeltsch Robert Bellah and Karl Barth while offering case studies of transformative interaction between Buddhism Christianity and Islam Chung s interdisciplinary approach opens up avenues for the inter religious understanding and melding for instance exploring the development of a Protestant Islam Throughout he provides new conceptions of the religions involved and the realities they assert
