Social And Economic Development In The Arab Gulf:

Social and Economic Development in the Arab Gulf Tim Niblock, 2015-05-15 The crucial importance of the Gulf region today which may be defined as comprising the states of Saudi Arabia Iraq Kuwait Oman Bahrain Qatar and the United Arab Emirates with Iran as a non Arab onlooker has stimulated surprisingly little interest in academic circles Much of what has been written moreover focuses exclusively on those aspects of direct concern to external interests The focus of this book is on the Gulf region as an area with its own problems of social economic and political development It examines the dimensions of the attempts by the governments and peoples of the area to create new social economic and political structures stemming mainly of course from their new found oil wealth First published in 1980 *Social and Economic Development in the Arab Gulf* Tim Niblock, University of Exeter. Centre for Arab Gulf Studies, 1980-01-01 *Social and Economic Development in the Arab Gulf* Tim Niblock, 2015 *Population and Development of the Arab Gulf States* Nadeya Sayed Ali

Mohammed, 2017-03-02 This thought provoking study measures and critically examines the effects that an average population growth rate of 2.8% could have on the development of the Arab Gulf States It questions the ability of Gulf governments to continue providing relatively high standards of education health and employment under conditions of rapid population growth an undiversified economic base and a tribal political framework Within this context population growth is identified as one important variable that hinders long term development The book will appeal to all those interested in the Middle East demography development and sociology *Oil and Development in the Arab Gulf States* Walid I.

Economic Development in the Middle East and North Africa Region Julia Devlin, Julia C. Devlin, 2010 This book surveys major economic issues in the development of countries in the Middle East and North Africa MENA region since World War II. It presents a framework of analysis highlighting underlying continuities in the region's approach to issues of growth management of oil and natural resources post conflict environments progress in trade liberalization and regional integration the use of industrial policy labor market adjustment and unemployment educational attainment and poverty incidence. At the same time this book focuses on emerging differences across countries in the region in the prevailing approach to addressing such challenges most notably between the economies of the Gulf Cooperation Council and other MENA countries. This book also incorporates a discussion of tools and methods used by development practitioners and briefly examines issues of aid effectiveness. The approach used is intended to appeal to a wide audience including students of economic development political scientists and development practitioners.

Economic Development in the Middle East Rodney Wilson, 2021-09-23 This new edition examines how development in the Middle East is being influenced by global economic change. This comparative textbook focuses on the region's strengths and highlights development success especially in the Gulf Turkey and Israel. The major structural changes in the economies of the Middle East are analysed and current employment challenges are discussed. The impact of demographic changes is considered notably the dramatic decline in birth rates which will have implications for future employment. The contribution of banks and capital markets to the region's development is appraised including that of Islamic financial institutions which play a prominent role in the Gulf Cooperation Council GCC countries but are on the margins of the financial systems elsewhere. Historically development in the GCC was linked to oil and gas production and prices a key issue being whether these are being decoupled as economies diversify and become more self sustaining. The evidence on this from the GCC is encouraging with transparent and accountable financial management and major improvements in economic governance despite the lack of democracy. Examining the drivers of economic development in the Middle East in a regional and global context this fully updated textbook is a key resource for students and academics interested in economic development and the political economy of the Middle East.

Creating the Arabian Gulf Paul J. Rich, 2009-08-16 Even whether to call the Gulf Arabian or Persian is an unending argument. Regardless of its name the Gulf is one of the most politically important regions of the world. Despite its constant presence in the headlines the fact that it was part of the British Indian empire for many years has gone unappreciated. The long period of British control and the connections with India are in fact necessary in understanding the contemporary Middle East. With more than ten years of experience as a government advisor in Saudi Arabia and Qatar Paul Rich draws on previously closed archives to document the actual heritage of the area and dispel the myths. Rich shows that the influences of Britain and India are far deeper than commonly acknowledged and that the sheikhs are actually the creation of the British Raj. He explains that they owe their thrones to a small group of British political agents the Heaven Born who created the satraps and then proceeded to rule from

behind the scenes by a clever use of stagecraft and ritual that was heavily flavored by their experiences at English public schools and in Masonic lodges In its attempt to make sense of the complexity of Arab sheikdoms in the Gulf Creating the Arabian Gulf is an ideal book for students and scholars interested in Middle East studies and international relations
