Klassen, Yunjeong Yang, 2013-07-31 The distinguishing feature for many workers in South Korea is contractual and often involuntary retirement at a young age mid 50s for most workers followed by precarious and low paying self employment or contract work In the past this practice which is also found in other East Asian nations provided firms with a youthful and highly productive workforce However with a rapidly aging population and shifts in the labour market the existing arrangement is becoming less and less functional This book examines how this retirement arrangement arose and the policy reforms that have been both undertaken and proposed to allow workers to remain employed longer The analysis focuses on the institutional constraints to reforms as well as the impact forced retirement has on individuals Using a multi disciplinary and comparative approach the authors study contractual mandatory retirement trends and policies in South Korea and in doing so illuminate the political social legal economic and labour market implications of this widespread practice As nations across Asia face aging populations this book will be welcomed by students and scholars interested in Korean studies social policy social welfare and gerontology It will also be of great value to policy makers The Small Welfare State Jae-jin Yang, 2020-04-24 In a period of rapid change for welfare states around the world this insightful book offers a comparative study of three historically small welfare states the US Japan and South Korea Featuring contributions from international distinguished scholars this book looks beyond the larger European welfare states to unpack the many common political and institutional characteristics that have constrained welfare state development in industrialized democracies **Exploring the World of Social Policy** Hill, Michael, Irving, Zoë, 2020-04-22 This bold new textbook represents a significant step forward in social policy teaching by combining comparative and global perspectives Introducing readers to a wide spread of international challenges and issues the book shows how insights into policy can be generated using a comparative and multidisciplinary approach Global in its canvas and analytical in its method the book explores the economic social and political contexts of social policy examines in detail its institutions and fields of practice illustrates the field's main ideas themes and practices drawing on a rich international literature and using pertinent and thought provoking examples Authored by two highly respected and

Understanding Korean Public Administration Kwang-Kook Park, Wonhee Lee, Seok-Hwan Lee, 2016-06-17 Although much has been written about the Korean public administration the international academic community has little knowledge about it as most of the literature has been written in Korean This book aims to provide more accessible knowledge internationally by filling that gap covering both the history and the current status of the Korean public administration This book is a collaboration of many Korean public administration scholars and would appeal to those interested in the secrets of Korea's rapid development in such a short span of time Each chapter covers historical contexts key to understanding its public administration and an important aspect as Korea is a fast changing society The book takes on a more pragmatic approach rather than to put the Korean experiences into the western theory Each chapter therefore provides an extensive discussion on the lessons learned and practical implications *Samsung, Media Empire and Family* Chunhyo Kim, 2016-02-26 This book analyses media conglomerates owning multiple media holdings under centralized ownership within and across media markets It argues that Asian capitalists utilize both a market oriented ideology and family connections to build their media empires thereby creating cultural conglomerates that exercise corporate censorship over media markets It focuses on family controlled media conglomerates in Korea specifically the international business giant Samsung and its related media companies Cheil Jedang and JoongAng Ilbo all of which are controlled by the single Lee family Utilizing the theoretical approach of political economy of communication the book examines how and why the Lee family

exercise corporate censorship over Korean society Offering an essential take on Asia's political economy of communication in order to understand the workings of Asian media empires this book will appeal to students and scholars of Korean Studies Korean Business and Mass Communications The Governance of Financialization in Latin America and East Asia Max Nagel, 2023-10-20 The Governance of Financialization in Latin America and East Asia analyses how states in these areas have adopted different monetary financial and foreign exchange policies to govern financialization which have induced varying levels of state control over financial markets The book analyzes the puzzling observation of policy divergence by investigating how countries have reacted differently to major financial crises since the 1970s It shows how Argentina and Japan selected a governance approach to financialization that followed Western prescriptions by propelling unregulated financialization but also how Chile and South Korea by contrast crafted policies to reduce the negative effects of financialization on economic development and financial stability The book identifies variegated expertise in central banks ministries of finance expert commissions and research institutions that has informed policymaking across Argentina Chile Japan and South Korea since the 1970s It then demonstrates how governments have used experts to achieve diverse political objectives and explains how governments can use experts to enhance state agency to counter globalization pressures This book will appeal to scholars of International Political Economy comparative politics economics sociology development studies and Latin American and East Asian history It will also be of interest to economists and policymakers who want to safeguard financial stability and promote economic growth **Korean Workers and Neoliberal Globalization** Kevin Gray, 2013-03-07 One of the most remarkable aspects of South Korea's transition from impoverished post colonial nation to fully fledged industrialized democracy has been the growth of its independent and dynamic labour movement Korean Workers and Neoliberal Globalisation examines current trends and transformations within the Korean labour movement since the 1990s It has been a common assumption that the third wave of democratisation the end of the Cold War and the spread of neoliberal globalisation in the latter part of the 20th century have helped to create an environment in which organised labour is better placed to overcome bureaucratic national unionism and transform itself into a potential counter globalisation movement However Kevin Gray argues that despite the apparent continued phenomena of labour militancy and the rhetoric of anti neoliberalism the mainstream independent labour movement in Korea has become increasingly institutionalised and bureaucratised into the new capitalist democracy This process is demonstrated by the Korean Confederation of Trade Unions experience of participation in various forms of policy making forums Gray suggests that as a result the KCTU has failed to mount an effective challenge against processes of neoliberal restructuring and concomitant social polarisation The Korean experience provides an excellent case study for understanding the relationship between organised labour and globalisation Korean Workers and Neoliberal Globalisation will appeal to students and scholars of Korean studies and International Political Economy as well as Asian politics and economics The Global Korean Motor Industry Russell D. Lansbury, Chung-Sok Suh, Seung-Ho Kwon, 2007-01-24 This book examines

the experiences of the globalizing Korean automobile industry with particular focus on the Hyundai Motor Company HMC one of the most prominent of the new Korean multinational corporations It provides an overview of the changing nature of the global automobile industry before considering in depth the globalization processes that the Korean automobile industry has undertaken Tracing the development of HMC as it recovered from the failure of its first venture overseas in Canada and tried again in India the authors explore the similarities and differences between the practices which HMC implemented in India and Korea They highlight the importance of production systems and employment relations as part of HMC s growth and argue that if Korean companies such as HMC are to compete successfully as global automobile producers they will need to increase the proportion of overseas production establish global supply chains and improve co ordination between head office and subsidiaries Based upon extensive fieldwork in India and Korea this book is a detailed account of the globalization of the Korean automobile industry and Hyundai Motor Company Its findings will be of importance to all those who seek to understand the challenges faced by firms that attempt to become global players Contemporary South Korean Society

Hŭi-yŏn Cho, Lawrence Surendra, Hyo-je Cho, 2013 The growing importance of the Korean economy in the global arena and the spread of the so called Korean wave in Asia mean there is an increasing desire to understand contemporary Korean Society To this end this book provides a critical and progressive analysis of the diverse issues that impact on and shape contemporary Korean society at both local and national levels The contributors address issues and movements which include The state and regime Human rights Gender Civil society and social movements Culture Religion Domestic and migrant labour Welfare The chapters in this volume provide a critical perspective on Korean society and draw upon interdisciplinary research from across the social sciences With contributions from leading Korean scholars and academics from around the world this is a welcome addition to the growing field of Korean Studies and will be of great interest to students and scholars interested in Korean studies Korean and Asian culture and society and Asian studies more generally **Pathways to State Welfare in Korea**

Gyu-Jin Hwang, 2017-03-02 Why has Korean social policy developed differently from that of other East Asian countries While in many respects Korea can be compared with Taiwan Hong Kong and Singapore where economic development has been the chief priority of state action Korea has also implemented extensive welfare reform expanding its welfare provision even under recent conditions of economic downturn Gyu Jin Hwang traces the development of the Korean welfare state providing a fascinating case study for observers of East Asian industrial growth and the public management of social risks Arguing that the extension of state welfare presents a unique challenge to existing theoretical propositions underlying social policy development he draws on detailed empirical analysis of key policy areas namely public assistance national pensions health care and employment insurance The book offers a definitive analysis of the development of Korean social policy programmes and the politics of implementing them The book will be important reading for all those interested in comparative Social Policy and more specifically the development of Social Welfare in Asian countries **Understanding**
