Boeckmann, Heather J. Smith, Yuen J. Huo, 2019-07-11 Issues of social justice have been an important part of social psychology since the explosion of psychological research that occurred during and after World War II At that time psychologists began to move away from earlier theories that paid little attention to people's subjective understanding of the world As increasing attention was paid to people's thoughts about their social experiences it was discovered that people are strongly affected by their assessments of what is just or fair in their dealings with others This recognition has led to a broad range of studies exploring what people mean by justice and how it influences their thoughts feelings and behaviors Social Comparison and Social Psychology Serge Guimond, 2006 Much of our knowledge about ourselves and about the world in which we live is based on a process of social comparison Our tendency to appraise events objects people and social groups by making comparisons has captured the interest of social psychologists for over half a century This volume provides an up-to-date synthesis of the latest theoretical and empirical developments in social psychology through research on social comparison processes With chapters by leading theorists and internationally renowned researchers it provides invaluable information on the role of this process of comparison as it occurs within a single individual over time between individuals and between social groups It also features an original international study testing the universality of the effects of social comparison on the self This book will appeal to scholars and students alike and will serve as an important reference for the study of cognition intergroup relations and culture *Handbook of Social Comparison* Jerry Suls, Ladd Wheeler, 2013-11-11 Comparison of objects events and situations is integral to judgment comparisons of the self with other people comprise one of the building blocks of human conduct and experience After four decades of research the topic of social comparison is more popular than ever In this timely handbook a distinguished roster of researchers and theoreticians describe where the field has been since its development in the early 1950s and where it is likely to go next Fairness and Groups Margaret Ann Neale, Elizabeth A. Offering the most thorough discussion of organizational justice currently available, *The Oxford Handbook of Justice in the Workplace* provides a comprehensive review of empirical and conceptual research addressing this vital topic. Reflecting this dynamic and expanding area of research, chapters provide cutting-edge reviews of selection, performance management, conflict resolution, diversity management, organizational climate, and other topics integral for promoting organizational success. Additionally, the book explores major conceptual issues such as interpersonal interaction, emotion, the structure of justice, the motivation for fairness, and cross-cultural considerations in fairness perceptions. The reader will find thorough discussions of legal issues, philosophical concerns, and human decision making, all of which make this the standard reference book for both established scholars and emerging researchers.

Self-related Cognitions in Anxiety and Motivation R. Schwarzer, 2013-08-21
 Research on anxiety and motivation has witnessed substantial progress in recent years in developing innovative perspectives and applying advanced psychometric tools. The most important contributions were made by cognitively oriented psychologists who have related the information processing view to anxiety and motivation. The organized knowledge about oneself and the storage, processing, and retrieval of information concerned with one's attitude and behavior strongly influences the way people think, feel, and act. Therefore, self-referent thoughts play a major role as a cognitive component in anxiety and motivation. It is the idea of this book to integrate different lines of thinking in the field of anxiety and motivation by relating both topics to self-focused attention, self-concept, and self-evaluation in achievement contexts as well as in social contexts.

Values, Achievement, and Justice Norman T. Feather, 2005-12-02 When we say that a person deserves a positive or negative outcome we are making a judgment that is influenced by a number of variables We would certainly take into account whether the person was responsible for the outcome or whether the outcome could be attributed to other sources We would also consider whether the actions that led to the positive or negative outcome were actions that we would value or

tion that would meet with our disapproval We might also be influenced by the person's own positive or negative characteristics by our knowledge of what kinds of groups or social categories the person belonged to and by whether we like or dislike the person Information about these different variables has to be considered and integrated in some way and our judgment of deservingness follows that psychological process a process that involves the cognitive affective system Values Achievements and Justice is about deservingness and about the variables that affect the judgments we make I use the term deservingness although I could equally have referred to deservedness or desert The terms are all virtually equivalent in meaning although dictionaries may separate them by using fine distinctions I assume that the sorts of variables I have just described will affect our judgments of deservingness and I further assume that a judgment of deservingness is most likely to occur when these variables fit together in a consistent harmonious and balanced way
