Social Conservatism The Middle Classes:

Social Conservatism and the Middle Class in Germany, 1914-1933 Herman Lebovics, 2015-12-08 Uprooted by the war exposed to the full brunt of economic dislocation and fearful of losing status in face of the growing might of big business and organized labor the middle classes in Weimar Germany longed for a solution to their plight that neither the capitalism nor the socialism of their day could offer This work examines the attempts of a number of scholars and publicists Sombart Salin Spann Niekisch Spengler and Fried to provide such a solution in the form of an ideology of social conservatism Originally published in 1969 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **The Lower Middle Class in Britain 1870-1914** Geoffrey Crossick, 2021-02-25 First published in 1977 This book records the emergence of a lower middle class in late Victorian and Edwardian Britain Victorian society had always contained a marginal middle class of shopkeepers and small businessmen but in the closing decades of the nineteenth century the growth of white collar salaried occupations created a new and distinctive force in the social structure These essays look at the place of the lower middle class within British society and examine its ideals and values Some essays concentrate on occupational groups clerks and shopkeepers while others focus on aspects of lower middle class life religion housing and jingoism This title will be of interest to students of history

Lower-Middle-Class Nation Nicola Bishop, 2020-12-10 Lower Middle Class Nation provides an unparalleled interdisciplinary cultural history of the lower middle class worker in British life since 1850 Considering highbrow lowbrow and middle brow forms across literature film television and more Nicola Bishop traces the development of the lower middle class from the mid 19th century to the present day tackling a number of pressing consistent concerns such as automation commuting and the search for a life work balance Above all this book brings together ideas about class nationhood and gender demonstrating that a particularly British lower middle class identity is constructed through the spaces and practices of the everyday Aimed at undergraduate postgraduates and scholars working in media and social history literature popular culture cultural studies and sociology Lower Middle Class Nation represents a new direction in cultural histories of work labour and leisure **Reactionary Modernism** Jeffrey Herf, 1986-05-31 In a unique application of critical theory to the study of the role of ideology in politics Jeffrey Herf explores the paradox inherent in the German fascists rejection of the rationalism of the Enlightenment while fully embracing modern technology He documents evidence of a cultural tradition he calls reactionary modernism found in the writings of German engineers and of the major intellectuals of the Weimar right Ernst Juenger Oswald Spengler Werner Sombart Hans Freyer Carl Schmitt and Martin Heidegger The book shows how

German nationalism and later National Socialism created what Joseph Goebbels Hitler's propaganda minister called the steel like romanticism of the twentieth century By associating technology with the Germans rather than the Jews with beautiful form rather than the formlessness of the market and with a strong state rather than a predominance of economic values and institutions these right wing intellectuals reconciled Germany's strength with its romantic soul and national identity

Race, Class and Conservatism Thomas D Boston, 2013-09-27 First Published in 1988 The author's arguments are a response to five recent and controversial books Thomas Sowell's Markets and Minorities and Civil Rights Rhetoric or Reality Walter Williams's State Against Blacks George Gilder's Wealth and Poverty and William J Wilson's Declining Significance of Race These authors insist that racial discrimination can no longer explain the disadvantaged position of blacks in American society indeed while sociologists argue that class has become more important than race conservative economists insist that disparities in earnings are a fair reflection of racial differences in education skills and similar measures of productivity Free markets they contend are anathemas to racial discrimination Dr Boston demonstrates that these views lack empirical support and explains how discrimination persists in labor markets While acknowledging that class position is increasingly important he nevertheless illustrates how black class stratification itself uniquely reflects racial subjugation But in the author's own words These findings will not be received comfortably by conservatives because they are just another chapter in the continuing saga of why their revolution has failed so miserably Flawed theory creates failed policies Yet his book is of major importance in understanding the current position of black people in society and the reality that has to be addressed in contemporary public policy More than this he provides a solution to the riddle of race and class which has eluded social investigators for decades

preservation informed and defined the Conservative party the views of its leaders the beliefs of its supporters and the political outlook they espoused

Why Americans Don't Join the Party Zoltan Hajnal, Taeku Lee, 2011-02-07 Two trends are dramatically altering the American political landscape growing immigration and the rising prominence of independent and nonpartisan voters Examining partisan attachments across the four primary racial groups in the United States this book offers the first sustained and systematic account of how race and immigration today influence the relationship that Americans have or fail to have with the Democratic and Republican parties Zoltan Hajnal and Taeku Lee contend that partisanship is shaped by three factors identity ideology and information and they show that African Americans Asian Americans Latinos and whites respond to these factors in distinct ways The book explores why so many Americans in particular Latinos and Asians fail to develop ties to either major party why African Americans feel locked into a particular party and why some white Americans are shut out by ideologically polarized party competition Through extensive analysis the authors demonstrate that when the Democratic and Republican parties fail to raise political awareness to engage deeply held political convictions or to affirm primary group attachments nonpartisanship becomes a rationally adaptive response By developing a model of partisanship that explicitly considers America's new racial diversity and evolving nonpartisanship this book provides the Democratic and Republican parties and other political stakeholders with the means and motivation to more fully engage the diverse range of Americans who remain outside the partisan fray

The Twilight of Social Conservatism John Dombrink, 2015-08-14 Despite many Americans triumphant proclamations that Barack Obama's 2008 and 2012 elections signified a post partisan post racial society it seems that the United States is more divided than ever From the rise of the Tea Party to strident anti immigration and anti welfare movements to the so called war on women the United States on its surface appears to be caught in the turmoil of a culture war that has not relented since the Reagan era But as John Dombrink writes

in *The Twilight of Social Conservatism* the conservative backlash seen during Obama's presidency is indicative not of a rising social conservative force in society but of a waning one. Drawing on demographic research, political polls, contemporary media and internet commentary, Dombrink demonstrates that the vitality of major social conservative ideas from the culture war era has faded. Support for once divisive wedge issues like same sex marriage and reproductive rights has increased dramatically and Americans, particularly young Americans, are less religious and more libertarian than ever before. As he traces the end of the culture wars and the unwedding of American politics over the last eight years, Dombrink is quick to caution that social conservatism has not disappeared entirely from view. Nevertheless, the once prominent Moral Majority pushing for dominance in American culture is now reconsidering itself as a minority and Dombrink argues that it is unlikely that social conservative forces will ever regain the power and potency they once held in American politics. A comprehensive and insightful work, *The Twilight of Social Conservatism* deftly analyzes the liberalizing trends that created the social and political culture America has today and that portend to the culture America will have in years to come. *Elites Against Democracy* Walter Struve, 2015-03-08 Since the beginning of the current era of imperialism in the late nineteenth century, there has been a striking contrast between bourgeois political thought in Germany and the West. Walter Struve demonstrates how German political culture went through a phase in which great emphasis was placed on the establishment of a new political elite recruited on the basis of merit and skill but ruling in an authoritarian way and not controlled by the populace. He suggests that this type of elitism, many aspects of which were vital to the political culture of Nazi Germany, seems today to be widespread in the West. The development of this concept of an open yet authoritarian elite is approached through the analysis of the political ideas and activities of nine elitists among them Max Weber, Walther Rathenau and Oswald Spengler. The author relates biography to intellectual, political, social and economic history so that his work becomes a study in the political and social context of intellectual history. Originally published in 1973, The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. [Home Schooling in China](#) Xiaoming Sheng, 2019-11-15 *Home Schooling in China* seeks to provide a better understanding of the social movement of home schooling in China. In this book, the author addresses several major themes of home education including marketization, social stratification, culture, religion, Confucianism, gender, policy, gender and home schooling. This book draws a broad attention to the in-depth information to the relationship of marketisation, social stratification and home education in China. It offers an implication for a better understanding not only for influences of religion, e.g. Christianity, but also the effects of Confucianism on the growth of home education in China. With a strong theoretical foundation, the book

comprehensively untangles the key possible factors that shape China's social movement of home education. The book offers a background on theories and research methodology as well as reports on empirical studies that analyse the influences of marketisation on home schooling, social stratification and the development of home schooling. This book is ideal reading for academics, researchers and postgraduate students in the fields of Confucianism, social class, gender and education in China.

State against Civil Society Cameron Ross, 2017-10-02 Over the period December 2011-July 2013 a tidal wave of mass protests swept through the Russian capital and engulfed scores of cities and regions. These demonstrations came as a great shock to the Russian political establishment. After decades of passive acceptance of the status quo, it appeared that civil society was at last awakening. The protests came in the wake of the Arab Spring revolts which toppled authoritarian dictators in Tunisia, Egypt and Libya. However, by the end of 2013 the number of mass protests in Russia and their size had declined precipitously. President Putin, on returning to office in 2012, had quickly regained the upper hand over the protestors. This book examines the reasons for the rise and fall of the mass protests in the Russian Federation. Internationally renowned experts in the field of Russian politics from Russia and the UK provide important new insights into the nature of the mass opposition movement, the non-systemic opposition, its strengths and its weaknesses. A key novel aspect of the study is its focus on the national and regional dimensions of the protest movement and its class and ethnic dimensions. This book was published as a special issue of *Europe Asia Studies*.

Australian Liberals and the Moral Middle Class Judith Brett, 2003-11-06 The Liberal Party of Australia was late to form in 1945 but the traditions and ideals upon which it is founded have been central to Australian politics since Federation. This 2003 book by award-winning author and leading Australian political scientist Judith Brett provides the very first complete history of the Australian liberal tradition and then of the Liberal Party from the second half of the twentieth century. The book sparkles with insight, particularly in its sustained analysis of the shifting relationships between the experiences of the moral middle class and Australian liberals' own self-understandings. It begins with Alfred Deakin facing the organised working class in parliament and ends with John Howard electorally triumphant but alienated from key sections of middle class opinion. This book is destined to become the definitive account of Australian liberalism and of the Liberal Party.
