Social and Personality Development Kevin B. MacDonald, 2012-12-06 This volume is an attempt to integrate the theory and data of social and personality development within a modern evolutionary framework The various chapters are not meant to be read in isolation from one another but rather are intended to form an integrated whole There is thus a great deal of cross referencing between chapters and to some extent they all stand or fall together This also suggests that the accuracy or usefulness of a particular chapter cannot be judged until the book is comprehended as a whole Chapter 1 deals with the theoretical foundations of this enterprise and the focus is on the compatibility of mainstream approaches within the field to a modern evolutionary approach Chapters 2-4 concern what I view to be the fundamental proximal mechanisms underlying social and personality development Chapter 2 on temperament and personality development is particularly central to the rest of the volume because these processes are repeatedly invoked as explanatory concepts at later points in the volume

Socialization and Personality Development Edward Zigler, Irvin Long Child, 1973 An important overview of socialization and personality development this book couples broad coverage with intensive treatment of special topics making it very useful as a supplementary text in both undergraduate and graduate child development and personality courses This book is divided into two parts The first is an integrated review by the authors of overall developments in the field of socialization The second a collection of 12 essays by various authors was selected to give the reader some sense of the diversity and empirical efforts that must be considered in any serious investigation of the socialization process
