Meyers, William R. Miller, 2001-08-23 The community reinforcement approach CRA to treating alcohol and other drug problems is designed to make changes in the client's daily environment to reduce substance abuse and promote a healthier lifestyle It is of proven effectiveness and should be more widely used This 2001 book presents research on the effectiveness of the CRA for a clinical readership It includes the original study comparing CRA with traditional treatments of alcohol dependence and summarizes other trials with alcohol cocaine and heroin users The CRA program provides basic guidelines for clinicians focusing on communication skills problem solving and drink refusal strategies and addresses the needs of the client as part of a social community Combining practical advice on such matters with a scientific survey of CRA in use this book offers a treatment approach to all involved with the support and treatment of those with alcohol and drug problems *Social Casework*, 1982

This book tells the story of how family therapy began based on the work of one of the pioneers of family theory and therapy Murray Bowen M D Bowen s psychiatric training began at the Menninger Foundation in 1946 It was during the later part of his eight years at Menninger s that he began his transition away from conventional psychoanalytic theory and practice Bowen left Menninger s in 1954 and began a historic family research program at the National Institutes of Mental Health NIMH in Bethesda Maryland This program called the Family Study Program involved hospitalizing entire families on a specialized research ward He was interested in families with a child diagnosed with schizophrenia There were two central findings of Bowen s four year project The first was the concept that the family could be conceptualized and treated as an emotional unit The second was family psychotherapy which began as staff family daily meetings on the inpatient unit The findings of Bowen s project remain part of mainstream mental health practice today From that project Bowen went on to develop his well known eight interlocking theoretical concepts that continue to be highly influential both in mental health and business Bowen s project also significantly transformed the therapeutic relationship The psychotherapist tried to achieve a balance when working with the families by making emotional connections while staying out of intense emotional reactions They also worked diligently to avoid psychologically replacing parents This book details the story of how these transformative changes came about by highlighting the original papers of the project Handbook Of Family Therapy Alan S.
