**(In)-Security?** Mr. Christian Bogmans, Mr. Andrea Pescatori, Ervin Prifti, 2021-09-24 We study how two aspects of food  
insecurity caloric insufficiency and diet composition are affected by aggregate economic fluctuations The use of cross  
country panel data allows us to adopt a global perspective on the identification of the macroeconomic determinants of food  
insecurity Income shocks are the most relevant driver of food insecurity displaying high elasticities at the early stages of  
economic development The role of food price shocks is more limited Social protection has a direct effect and mitigates the  
impact of income shocks Effects are highly heterogeneous across a range of structural characteristics of the economy  
highlighting the role of distributional aspects and of food import dependency      Handbook of Survey- Based Business Cycle  
Analysis Georg Goldrian, 2007-01-01 This Handbook aims to provide an overview of regular survey activities as well as to  
show how survey results can be used scientifically in the context of business cycle analysis and forecasting Examples of  
various business surveys are described in detail starting with their objectives the questions they pose how they are weighted  
and extrapolated and the representativeness of their results A detailed scientific examination of the explanatory value of the  
data is also made in order to demonstrate their potential usefulness The Handbook has three parts firstly it presents the  
importance of business surveys for empirical research Secondly selected surveys are introduced in detail such as the Ifo  
Business Survey and the Ifo Investment Survey and thirdly a broad spectrum of studies on the consequence of the survey  
results is presented The significance of the surveys applied equally to business cycle analysis and to forecasting An array of  
modern methods of time series analysis and econometric model construction is used in these investigations      Economica
