**Sociology Full Circle** William Feigelman, 1976      **Sociology Full Circle** William Feigelman,      Perspectives on Youth, HIV/AIDS and Indigenous Knowledges Anders Breidlid, Austin M. Cheyeka, Alawia Ibrahim Farag, 2015-10-13 This volume is the result of academic cooperation between scholars in Norway Sudan Zambia and South Africa linked to a master's program in international education and development It draws upon studies carried out in Sudan Zambia Namibia and South Africa Most of the chapters deal with the HIV AIDS pandemic in various ways Because youth are the group most vulnerable to HIV AIDS the various chapters discuss the complex discursive spaces that youth inhabit and navigate and where the interlocking concepts of social identity power inequality sexuality vulnerability and resilience are brought together Many of the chapters discuss the HIV AIDS pandemic in relation to indigenous knowledges and argue for including indigenous knowledges in the fight against the pandemic The suggestion to include indigenous knowledges opens space for a more varied holistic and comprehensive approach to the pandemic The book invites readers to explore the oppressive and often dangerous socioeconomic situation that many youth in sub Saharan Africa experience also beyond the HIV AIDS pandemic Chapters on street youth in Namibia and youth in a township in Cape Town discuss the often creative coping mechanisms employed by youth to escape or mitigate the oppressive situations they find themselves in      *Economics as an Evolutionary Science* Anna Sachko Gandolfi, 2018-02-06 Economics is traditionally taken to be the social science concerned with the production consumption exchange and distribution of wealth and commodities Economists carefully track the comings and goings of the human household whether written small microeconomics or large macroeconomics and attempt to predict future patterns under different situations However in constructing their models of economic behavior economists often lose sight of the actual characteristics and motivations of their human subjects In consequence they have found the goal of an explanatory and predictive science to be elusive Economics as an Evolutionary Science reorients economics toward a more direct appreciation of human nature with an emphasis on what we have learned from recent advances in evolutionary science The authors integrate economics and evolution to produce a social science that is rigorous internally coherent testable and consistent with the natural sciences The authors suggest an expanded definition of fitness as in Darwin's survival of the fittest emphasizing not only the importance of reproduction and the quality of offspring but also the unique ability of humans to provide material wealth to their children The book offers a coherent explanation for the recent decline in fertility which is shown to be consistent with the evolutionary goal of maximizing genetic success In addition the authors demonstrate the relevance to economics of several core concepts derived from biologists including the genetics of parent offspring conflict inclusive fitness theory and the phenomena of R selection and K selection The keystone of their presentation is a cogent critique of the traditional concept of utility As the authors demonstrate the concept can be modified to reflect the fundamental evolutionary principle whereby living things including human beings have been selected to behave in a manner

that maximizes their genetic representation in future generations Despite the extraordinary interest in applying evolutionary biology to other disciplines Economics as an Evolutionary Science marks the first major attempt at a synthesis of biology and economics Scholarly yet accessible this volume offers unique and original perspectives on an entire discipline *American Folklore Studies* Simon J.
