The Lost Grizzlies Rick Bass,1995 A search for proof that grizzly bears still live in the San Juan Mountains of Colorado

The Lost Grizzlies Rick Bass,1996 *A Reenchanted World* James William Gibson,2009-04-14 A surprising and enlightening investigation of how modern society is making nature sacred once again For more than two centuries Western cultures as they became ever more industrialized increasingly regarded the natural world as little more than a collection of useful raw resources The folklore of powerful forest spirits and mountain demons was displaced by the practicalities of logging and strip mining the traditional rituals of hunting ceremonies gave way to the indiscriminate butchering of animals for meat markets In the famous lament of Max Weber our surroundings became disenchanted with nature s magic swept away by secularization and rationalization But now as acclaimed sociologist James William Gibson reveals in this insightful study the culture of enchantment is making an astonishing comeback From Greenpeace eco warriors to evangelical Christians preaching creation care and geneticists who speak of human animal kinship Gibson finds a remarkably broad yearning for a spiritual reconnection to nature As we grapple with increasingly dire environmental disasters he points to this cultural shift as the last utopian dream the final hope for protecting the world that all of us must live in **Varmints and Victims** Frank Van Nuys,2015-11-09 It used to be If you see a coyote shoot it Better yet a bear Best of all perhaps A wolf How we ve gotten from there to here where such predators are reintroduced protected and in some cases revered is the story Frank Van Nuys tells in *Varmints and Victims* a thorough and enlightening look at the evolution of predator management in the American West As controversies over predator control rage on *Varmints and Victims* puts the debate into historical context tracing the West s relationship with charismatic predators like grizzlies wolves and cougars from unquestioned eradication to ambivalent recovery efforts Van Nuys offers a nuanced and balanced perspective on an often emotional topic exploring the intricacies of how and why attitudes toward predators have changed over the years Focusing primarily on wolves coyotes mountain lions and grizzly bears he charts the logic and methods of management practiced by ranchers hunters and federal officials Broad in scope and rich in detail this work brings new much needed clarity to the complex interweaving of economics politics science and culture in the formulation of ideas about predator species and in policies directed at these creatures In the process we come to see how the story of predator control is in many ways the story of the American West itself from early attempts to connect the frontier region to mainstream American life and economics to present ideas about the nature and singularity of the region *Mountains Figured and Disfigured in the English-Speaking World* Françoise Besson,2020-06-01 The essays in this book written by poets novelists mountain climbers and academics from all over the world evoke the representation of mountains in the English speaking world as artists writers philosophers or mountain climbers have represented them from the sixteenth to the twenty first centuries From the Alps to the Pyrenees from Mount Fuji to Mount Shasta from the Himalayas to the Scottish Highlands from Ikere in Nigeria to Devil s Tower in the

United States from Uluru in Australia to the most northern mountain of the Arctic the shapes of the world speak the same language and tell the world its own story This interdisciplinary book weaving together mountaineering literature philosophy painting cinema ecology history palaeontology geography geopolitics toponymy law religion and myth invites people to an innovative reading of mountains it reveals the close relationship existing between the shapes of the world and all forms of writing and at the same time it shows how the representations of the imagination may be instrumental in protecting the natural world The story told by the landscape inscribes a broken line in the shapes of the world tearing the landscape like a fragile page whenever historical and political events wars mining or deforestation leave scars in the landscape but writers and artists representations of mountains constitute a path to awareness as they are not only a painting of beauty but an image of our link to nature and a warning as well For centuries the image of the mountain has conveyed a symbolism telling the story of human thought and this book shows to what extent literature and art play an essential part in our awareness of nature

Hidden Animals Michael Newton, 2009-09-10 A global survey of unknown creatures reported by thousands of eyewitnesses creatures that have either been verified refuted or are still being examined by scientific researchers Hidden Animals A Field Guide to Batsquatch Chupacabra and Other Elusive Creatures welcomes readers into the fascinating world of cryptozoology the scientific pursuit of legendary creatures that sometimes reveals hoaxes and sometimes identifies real previously unknown species Compiled by Michael Newton author of the acclaimed Encyclopedia of Cryptozoology it is the first comprehensive guide covering the crossroads of zoology and folklore written for both the young and the young at heart Organized by type of creature type such as giant animals missing links and living fossils Hidden Animals surveys various beings reported and pursued worldwide from ancient times to the present in every corner of the globe In the process it relates classic myths and legends to identified flesh and blood animals Readers will be captivated by both the scientific evidence supporting the existence of specific cryptids and the exposure of notorious frauds or cases of mistaken identity

Lines on the Land Scott Herring, 2004 Lines on the Land Writers Art and the National Parks Scott Herring The nineteenth century photographer William Henry Jackson once complained of the skepticism with which early descriptions of Yellowstone were met the place was too wondrous to be believed The public demanded proof and a host of artists and writers obliged These early explorers possessed a vigorous devotion to the young nation s wilderness the naturalist John Muir famously toured the land from Wisconsin to Florida on foot and through their work established aesthetic categories that exist to this day In Lines on the Land Scott Herring contends that these writers and artists were canon makers recognizing the national parks as naturally occurring works of art and conferring upon them a cultural prestige the parks were the splendid focal points of the American landscape These early canonizing works are homages to a vast untouched wilderness This praise would gradually give way however to a distinctly American anger what Herring calls outraged idealism Later generations were faced with a changing culture that had imperfectly absorbed and even misrepresented the national park aesthetic The

postwar park was overrun by cars and tourists who could not possibly match the pioneering naturalists profound commitment to and appreciation for their surroundings The collective tone of the parks chroniclers as a result evolved from celebration of awesome beauty to indignation over the perceived corruption of the parks both as an ideal and as actual physical settings Herring traces this shift through the work of a wide spectrum of creative minds from early figures such as Muir and Thomas Moran to later observers of the parks such as Ansel Adams Sylvia Plath Edward Abbey and Rick Bass The text is punctuated by autobiographical interchapters in which Herring relates the book s chief themes to his own experiences in Yellowstone National Park Under the Sign of Nature Explorations in Ecocriticism Dwellings of Enchantment Bénédicte Meillon, 2020-10-27 Dwellings of Enchantment Writing and Reenchanted the Earth offers ecocritical and ecopoetic readings that focus on multispecies dwellings of enchantment and reenchant our rapport with the more than human world It sheds light on the marvelous entanglements between humans and other life forms coexisting with us entanglements that when fully perceived call onto humans to shift perspectives on both the causes and solutions to current ecological crises Working against the disenchantment of humans relationships with and perceptions of the world entailed by a modern ontology this book illustrates the power of ecopoetics to attune humans to the vibrant matter both within and outside of us Braiding indigenous with non indigenous worldviews this book tackles ecopoetics emerging from varying locations in the world It underscores the postmodernist remythologizing processes going on in many ecopoetic texts via magical realist modes and mythopoeia *Rethinking Nature* Bruce V. Foltz, Robert Frodeman, 2004-11-02 *Rethinking Nature* brings the voices of leading Continental philosophers into discussion about what is emerging as one of our most pressing and timely concerns the environmental crisis facing our planet The essays featured in this volume embrace environmental philosophy in its broadest sense and include topics such as environmental ethics environmental aesthetics ontology theology gender and the environment and the role of science and technology in forming knowledge about our world Here philosophy goes out into the field and comes back with rich insights and new approaches to environmental problems This far reaching and lively volume affords firm ground for thinking about the multiple ways that humans engage nature Contributors are David Abram Edward S Casey Daniel Cerezuelle Ron Cooper Bruce V Foltz Robert Frodeman Trish Glazebrook James Hatley Robert Kirkman Irene J Klaver Alphonso Lingis Kenneth Maly Diane Michelfelder Elaine P Miller Robert Mugerauer Stephen David Ross John Sallis Ingrid Leman Stefanovic Bruce Wilshire David Wood and Michael E Zimmerman A Thousand Deer Rick Bass, 2012-09-15 In November countless families across Texas head out for the annual deer hunt a ritual that spans generations ethnicities socioeconomics and gender as perhaps no other cultural experience in the state Rick Bass s family has returned to the same hardscrabble piece of land in the Hill Country the Deer Pasture for more than seventy five years In *A Thousand Deer* Bass walks the Deer Pasture again in memory and stories tallying up what hunting there has taught him about our need for wildness and wilderness about cycles in nature and in the life of a family and particularly about how important it is for

children to live in the natural world The arc of *A Thousand Deer* spans from Bass's boyhood in the suburbs of Houston where he searched for anything rank or fecund in the little oxbow swamps and pockets of woods along Buffalo Bayou to his commitment to providing his children in Montana the same opportunity a life afield that his parents gave him in Texas Inevitably this brings him back to the Deer Pasture and the passing of seasons and generations he has experienced there Bass lyrically describes his own passage from young manhood when the urge to hunt was something primal to mature adulthood and the waning of the urge to take an animal his commitment to the hunt evolving into a commitment to family and to the last wild places
