Taken In American Gullibility And The Reagan Mythos:

Taken in Stephen Ducat,1988 **The Reagan Rhetoric** Toby Glenn Bates,2011-05-17 The Reagan Rhetoric examines the extraordinary connections between President Ronald Reagan's conversations with the American people and the profound changes that swept the nation under those conversations influence Through the lens of history rhetoric and memory Bates work draws connections between the style manner and consistency of Reagan's oratory and the social and cultural settings in which it played so vital a role Specifically focusing on the 1980 Neshoba County Mississippi Campaign visit the popular culture memory of the Vietnam War and the controversy of Iran Contra this book illustrates Reagan's sweeping ability to change how Americans thought about themselves their past and their politics By concluding with an examination of media coverage of Reagan's 2004 death Bates reveals that certain interpretations Reagan rhetorically offered during his presidency had become an accepted collective memory for millions of Americans In death as in life Reagan had the last word Through extensive archival research the careful examination of well known and obscure 1980s print media and popular culture as well as new interviews Bates challenges the prevailing Reagan historiography and provides a thoughtful reality check on some of the traditional views of his eight years in the Oval Office The Reagan Rhetoric offers new and important contributions to Reagan studies that will appeal to scholars of the 40th president This look at the 1980s will be of great interest to the growing number of historians studying that decade *Annals of Gullibility* Stephen Greenspan,2008-12-30 The first book to provide a comprehensive look at the problem of gullibility this groundbreaking work covers how and why we are fooled in areas that range from religion politics science and medicine to personal finance and relationships First laying the groundwork by showing gullibility at play in the writings of historic authors we all know developmental psychologist Stephen Greenspan follows with chapters that describe social duping across the gamut of human conduct From people who pour bucks into investment scams to those who follow the faith of scientologists believe in fortunetellers or champion unfounded medicine akin to snake oil we all know someone who has been duped A lot of us have been duped ourselves out of naive trust It's not a matter of low intelligence that moves us to without evidence believe the words of politicians salesmen academics lawyers military figures or cult leaders among others Greenspan shows us the four broad reasons we become drawn into gullible behavior and he presents ways people can become less gullible Greenspan takes us into the vast realm of gullibility from the fictional Pied Piper to the historical Trojan Horse then through modern day military maneuvers political untruths police and criminal justice scams and financial and love lies While there have been earlier books focused on liars and manipulators of all sorts this is the first to focus on the gullible who are their victims and how the gullible can become less likely to be taken again Men, Masculinities and Social Theory (RLE Social Theory) Jeff Hearn,D.H.J.
