Taking Place The Works Of Michael Elmgreen And Ingar Dragset:

The New Décor Ralph Rugoff, 2010 PREFACE These fleeting sketches are all republished by kind permission of the Editor of the DAILY NEWS in which paper they appeared They amount to no more than a sort of sporadic diary a diary recording one day in twenty which happened to stick in the fancy the only kind of diary the author has ever been able to keep Even that diary he could only keep by keeping it in public for bread and cheese But trivial as are the topics they are not utterly without a connecting thread of motive As the reader's eye strays with hearty relief from these pages it probably alights on something a bed post or a lamp post a window blind or a wall *The Monumental Challenge of Preservation*

Michele Valerie Cloonan, 2023-08-15 The enormous task of preserving the world's heritage in the face of war natural disaster vandalism neglect and technical obsolescence The monuments movable immovable tangible and intangible of the world's shared cultural heritage are at risk War terrorism natural disaster vandalism and neglect make the work of preservation a greater challenge than it has been since World War II In *The Monumental Challenge of Preservation* Michèle Cloonan makes the case that at this critical juncture we must consider preservation in the broadest possible contexts Preservation requires the efforts of an increasing number of stakeholders In order to explore the cultural political technological economic and ethical dimensions of preservation Cloonan examines particular monuments and their preservation dilemmas The massive Bamiyan Buddhas blown up by the Taliban in 2001 are still the subject of debates over how or whether to preserve what remains and the U S National Park Service has undertaken the complex task of preserving the symbolic and often ephemeral objects that visitors leave at the Vietnam Veterans Memorial to take just two of the many examples described in the book Cloonan also considers the ongoing genocide and cultural genocide in Syria the challenges of preserving our digital heritage the dynamic between original and copy efforts to preserve the papers and architectural fragments of the architect Louis Sullivan and the possibility of sustainable preservation In the end Cloonan suggests we are what we preserve and don't preserve Every day we make preservation decisions individually and collectively that have longer term ramifications than we might expect **Living Inside the Grid**

Museum Space

Kali Tzortzi, 2016-03-09 Museums are among the iconic buildings of the twenty first century as remarkable for their architectural diversity as for the variety of collections they display But how does the architecture of museums affect our experience as visitors This book proposes that by seeing space as common ground between architecture and museology and so between the museum building and its display we can illuminate the individuality of each museum and the distinctive experience it offers for example how some museums create a sense of personal exploration while others are more intensely didactic and how the visit in some cases is transformed into a spatial experience and in other cases into a more social event The book starts with an overview of the history of museum buildings and display strategies and a discussion of theoretical and critical approaches It then focuses on specific museums as in depth case studies and uses methods of spatial analysis to look at the key design choices available to architects and curators and their effects on visitors behaviour Theoretically grounded methodologically original and richly illustrated this book will equip students researchers and professionals in the fields of architecture museum studies curating exhibition design and cultural studies with a guide for studying museums and a theoretical framework for their interpretation

Demarcation and Demystification J. Moufawad-Paul, 2019-11-29 Marx once declared that philosophers have only interpreted the world but the point is to change it Demarcation and Demystification examines the ways in which a radical practice of philosophy is possible under the aegis of Marx's 11th thesis arguing that philosophy's radicality is discovered by understanding that it can only ever interpret the world that social transformation lies beyond the sphere of its operations Demarcation and Demystification is a major statement on the gulf between what philosophers actually do and what they think they do Matthew R McLennan author of Philosophy and Vulnerability **Unplanned Visitors** Olivier

Vallerand, 2022-03-30 Sexuality and gender have long been influential in understanding the construction of domestic space its meanings often revealing a binary division of private and public female and male By reconstructing the foundation of queer critiques of space and by analyzing the representation of domesticity in contemporary art and architecture Unplanned Visitors shows the blurring of private and public that can occur in any domestic space and explores the potential of queer theory for understanding and designing the built environment Olivier Vallerand investigates how queer critiques building on pioneering feminist work question the relation between identity and architecture and highlight normative constructs underlying domestic spaces He draws out a genealogy of queer space in theoretical discourse in architecture studying projects by Mark Robbins Joel Sanders J Mayer H Elmgreen Dragset Andr's Jaque and MYCKET among others These works blur the traditional borders between architecture and art to emphasize the tensions between private and public and their impact on assumptions about domestic space and family structure The challenges in moving from experimental installations to built environments suggest how designers must acknowledge and respond to the social contexts that shape architecture rethinking how domestic spaces can be designed to allow everyone to better manage the expression of their self identification through their living environments Unplanned Visitors poses a challenge to traditional architectural theory and history but also suggests a renewed and more inclusive ethics whereby designers explicitly address social and political power structures The potential of a queer approach to architectural design history theory and education is precisely to enact a method that creates more inclusive buildings and safer neighbourhoods for everyone **Appropriated Interiors** Deborah Schneiderman, Anca I.
