**Comparative Perspectives on Environmental Policies and Issues** Robert A. Dibley, 2014-01-10 Comparative Perspectives on Environmental Policies and Issues presents tools and concepts about environmental policies in several developed and developing countries It explores a broad survey of ecological modernization theory ecological feminism theory environmental justice theory the concept of sustainability and research on environmental policies Data were collected through surveys interviews and focus groups and are used to analyze social economic and environmental impact on people The book specifically discusses how the earth's basic life supporting capital soils forests species fresh water and oceans is degraded or depleted to provide for human needs and how air pollution and acid precipitation are causing widespread injury to humans forests and crops Realistically over taxing of natural resources and ecological systems throughout the world has promoted economic growth and created increasing opportunities for people while also advancing social injustice The use of the environment to accomplish social and economic transformation raises fundamental issues for the study of environmental policy and the natural ecological system As human beings exploit the natural environment to meet present needs they often will destroy resources needed for the future generations Thus environmental policies are enacted to ensure that social and economic impacts of the environment are compatible with the limits of natural systems Offering an intuitive and crystal clear explanation of the key concepts and principles of environmental policies and sustainable development this volume is suitable not only for environmental science students but also for instructors practitioners researchers and academics

*Composition and the Rhetoric of Science* Michael J. Zerby, 2007-03-21 Composition and the Rhetoric of Science Engaging the Dominant Discourse calls for instructors of first year writing courses to employ primary scientific discourse in their teaching and for rhetoricians of science to think about teaching scientific discourse as a literacy skill Author Michael J. Zerby argues that inclusion of scientific discourse is crucial because of this rhetoric's status as the dominant discourse in western culture The volume draws on Lyotard and Foucault and Althusser to argue that while important theorists such as these have recognized the dominance of scientific discourse

rhetoric and composition has not to its detriment The text illustrates that scientific discourse remains a miniscule part of the enterprise of rhetoric and composition and thus the field is not fulfilling its mission of providing students with the writing and reading skills they need to live and work in a science and technology dependent society Zerbe provides an analysis of science popularizations and demonstrates how these works can be used to contextualize primary scientific research He also presents three pedagogical scenarios each built around a carefully chosen accessible example of scientific discourse that demonstrate how articles from scientific journals can be used in writing courses Only by gaining a meaningful fluency in this discourse one that is not offered by science textbooks can a more sophisticated scientific literacy be assured Composition and the Rhetoric of Science effectively explores the relatively limited amount of work done in rhetoric and composition on scientific discourse and questions this state of affairs Zerbe presents for the first time cultural studies and science literacy as gateways for incorporating scientific discourse into first year writing courses
