Taking Stock Animal Farming And The Environment:

Taking Stock Alan Thein Durning, Holly B. Brough, 1991 First the importance of livestock economy in different parts of the world the ecological aspects of the livestock industry and the relationship between feed and food are set out Then the requirements for a sustainable livestock industry are discussed , **Animal Agriculture and Natural Resources in Central America: Strategies for Sustainability** , **Solid and Hazardous Waste Research Needs** United States. Congress. House. Committee on Science, Space, and Technology. Subcommittee on Environment, 1992 **Global Sustainability** Gilberto C. Gallopín, Paul D. Raskin, 2003-09-02 Unprecedented levels of wealth technology and institutional capacity can forge a just peaceful and ecologically resilient future However the authors argue social polarization geo political conflict and environmental degradation are threatening the long term well being of humanity and the planet Global Sustainability explores the alternative futures that could emerge from the resolution of these antagonisms Based on extensive international and interdisciplinary research the book identifies the perils of market driven scenarios and considers the possibility of the failure of conventional approaches It also however presents a vision of the possibility of a Great Transition in which revised human values and development goals bring a new stage of civilization It will be essential reading for all scholars and professionals interested in the future of the environment international affairs and sustainable development *Full House* Lester R. Brown, Hal Kane, 2023-10-02 Originally published in 1995 after decades of steady growth this book was written at a time when the world s food supply was no longer keeping up with population increases This book examines the causes of the imbalance in the food population equation and suggests ways in which Malthusian checks can be countered It calls for an international strategy to restore global security and a budget to implement it with a massive redirection of the world s financial resources On one side of the argument the authors advocate increased expenditure on family planning services education and women s rights On the other they stress the environmental importance of reforestation and soil conservation schemes to halt the deterioration of the agricultural resource base The Omnivore's Dilemma Michael Pollan, 2009-10-15 This acclaimed bestseller and modern classic has changed America s relationship with food It s essential reading for kids who care about the environment and climate change What s for dinner seemed like a simple question until journalist and supermarket detective Michael Pollan delved behind the scenes From fast food and big organic to small farms and old fashioned hunting and gathering this young readers adaptation of Pollan s famous food chain exploration encourages kids to consider the personal and global implications of their food choices With plenty of photos graphs and visuals The Omnivore s Dilemma serves up a bold message to the generation most impacted by climate change It s time to take charge of our national eating habits and it starts with you **Meat Science and Applications** Y. H. Hui, Wai-Kit Nip, Robert Rogers, 2001-07-27 Meat Science and Applications compiles the most recent science technology and applications of meat products by products and meat processing It details worker safety waste

management slaughtering carcass evaluation meat safety and animal handling issues from an international perspective Essential concepts are illustrated with practical examples and helpful diagrams *Critical Geographies* Salvatore Engel-Di Mauro,2008 Who Will Feed China? Lester Brown,2023-08-18 Originally published in 1995 but with enduring relevance in a time of global population growth and food insecurity when it was first published this book attracted much global attention and criticism from Beijing It argued that even as water becomes scarcer in a land where 80% of the grain crop is irrigated as per acre yield gains are erased by the loss of agricultural land to industrialization and as food production stagnates China still increases its population by the equivalent of a new Beijing each year This book predicts that in an integrated world economy China's rising food prices will become the world's rising food prices China's land scarcity will come everyone's land scarcity and water scarcity in China will affect the entire world China's dependence on massive imports like the collapse of the world's fisheries will be a wake up call that we are colliding with the earth's capacity to feed us Over time Janet Larsen argued China's leaders came to acknowledge how *Who Will Feed China* changed their thinking As China's wealth increases so do the dietary demands of its population The increasing middle classes demand more grain intensive meat and farmed fish The issue of who will feed China has not gone away *Growing Populations, Changing Landscapes* National Academy of Sciences,Chinese Academy of Sciences,Indian National Science Academy,2001-07-12 As the world's population exceeds an incredible 6 billion people governments and scientists everywhere are concerned about the prospects for sustainable development The science academies of the three most populous countries have joined forces in an unprecedented effort to understand the linkage between population growth and land use change and its implications for the future By examining six sites ranging from agricultural to intensely urban to areas in transition the multinational study panel asks how population growth and consumption directly cause land use change and explore the general nature of the forces driving the transformations *Growing Populations Changing Landscapes* explains how disparate government policies with unintended consequences and globalization effects that link local land use changes to consumption patterns and labor policies in distant countries can be far more influential than simple numerical population increases Recognizing the importance of these linkages can be a significant step toward more effective environmental management In Meat We Trust Maureen Ogle,2013 The untold history of how meat made America a tale of the oversized egos self made millionaires and ruthless magnates eccentrics politicians and pragmatists who shaped us into the greatest eaters and providers of meat in history

Green Gastronomy Colin Spencer,1996-01-01 Research has shown that vegans are the longest living group in the world with the lowest rate of heart disease cancers and osteoporosis Supported by up to the minute medical evidence this book demonstrates how the havoc and disease caused by the Western diet can be remedied by the simple omission of certain foodstuffs This simple act can also alleviate environmental destruction as more and more forests are cleared for animal grazing for example and the needless suffering of animals *Population Politics* Virginia Abernethy,Garrett

Hardin, 2018-05-11 International efforts to regulate fertility rates so that populations do not grow beyond the earth's capacity have included technical assistance and capital improved health care conditions to lower the risk of infant mortality increased opportunities to develop literacy the democratization of governments and several decades of liberal immigration and refugee policies favoring third world nations The persistence of high fertility despite international efforts confounds demographers Population Politics brilliantly dissects the paradigm responsible for the counterproductive efforts of nations and international agencies Abernethy a renowned anthropologist shows why policies hamper the shift to lower fertility Ireland Indonesia Cuba China Turkey and Egypt are but a few of the countries Abernethy examines showing how economic sociocultural and agricultural factors that have caused population growth can be harnessed to stabilize population size Population Politics is a provocative examination of the influence of aid and liberal immigration policies on world population growth and often counterproductive to the role of the United States as an industrial power This volume's uniquely interdisciplinary perspective will enlighten the lay reader as well as demographers and epidemiologists conservationists reproduction and family specialists agricultural economists and public health personnel Virginia D Abernethy is professor emeritus of psychiatry anthropology at Vanderbilt Medical School and was for 11 years the editor of the scholarly journal Population and Environment Garrett Hardin is emeritus professor of human ecology in the Department of Biological Sciences and the University of California Santa Barbara

Economic Globalisation as Religious War Michael McKinley, 2007-06-28 Using a critical theory approach to analyze the globalization of the world economy this provocative and topical new book presents economic globalization not as a recent development but rather as a familiar process that has occurred throughout history Michael McKinley argues that it is ultimately a self-serving arbitrary and destructive imperial project that should be viewed as a religious war

Rainforest Cowboys Jeffrey Hoelle, 2015-04-15 The opening of the Amazon to colonization in the 1970s brought cattle land conflict and widespread deforestation In the remote state of Acre Brazil rubber tappers fought against migrant ranchers to preserve the forest they relied on and in the process these forest guardians showed the world that it was possible to unite forest livelihoods and environmental preservation Nowadays many rubber tappers and their children are turning away from the forest based lifestyle they once sought to protect and are becoming cattle raisers or even caubois cowboys Rainforest Cowboys is the first book to examine the social and cultural forces driving the expansion of Amazonian cattle raising in all of their complexity Drawing on eighteen months of fieldwork Jeffrey Hoelle shows how cattle raising is about much more than beef production or deforestation in Acre even among carnivorous environmentalists vilified ranchers and urbanites with no land or cattle He contextualizes the rise of ranching in relation to political economic structures and broader meanings to understand the spread of cattle culture This cattle centered vision of rural life builds on local experiences and influences from across the Americas and even resembles East African cultural practices Written in a broadly accessible and interdisciplinary style Rainforest Cowboys is essential reading for a global audience interested in

understanding the economic and cultural features of cattle raising deforestation and the continuing tensions between conservation and development in the Amazon *Animal Geographies* Jennifer Wolch, Jody Emel, 1998-09-17 Each year billions of animals are poisoned dissected displaced killed for consumption or held in captivity usually for the benefit of humans The animal world has never been under greater peril and this broad ranging collection contributes to a much needed fundamental rethinking about our relation with it *Animal Geographies* explores the diverse ways in which animals shape the formation of human identity Essays on zoos and wolves for example reveal how animals figure in social constructions of race gender and nationality From questions of identity and subjectivity it moves to a consideration of the places where people and animals confront the realities of coexistence on an everyday basis by way of case studies of species such as mountain lions and the golden eagle It then examines the ways in which animals figure in the ongoing globalization of production and mass consumption illustrated by essays on the US meatpacking industry and meat production in the Indian state of Rajasthan and finally takes up legal and ethical approaches to human animal relations *Animal Geographies* compels a profound rethinking of the nature of human animal relations and offers a series of proposals for reconstituting this relationship on a progressive basis Contributors Kay Anderson Glen Elder Andrea Gullo Unna Lassiter William S Lynn Suzanne M Michel Chris Philo James D Proctor Paul Robbins Frances M Ufkes James L Wescoat Jr *Resisting Structural Evil* Cynthia D. Moe-Lobeda, 2013 Reorienting Christian ethics from its usual anthropocentrism to an ecocentrism entails a new framework that Moe Lobeda lays out in her first chapters culminating in a creative rethinking of how it is that we understand morally **Vanishing Borders** Hilary French, 2013-11-05 National governments are ill equipped for tackling transnational environmental problems from ozone depletion to soaring trade in commodities like timber and shrimp As these issues climb higher on the political agenda industrial and developing countries are on a collision course over climate change and water shortages Goods money microbes pollution people and ideas are crossing global boundaries evermore frequently The implications for our future and for the health of the planet are profound This text describes what we need to do to cope with the challenge **Restoration and Management of Lakes and Reservoirs** G. Dennis Cooke, Eugene B. Welch, Spencer Peterson, Stanley A. Nichols, 2016-04-19 It has been more than ten years since the last edition of the bestselling *Restoration and Management of Lakes and Reservoirs* In that time lake and reservoir management and restoration technologies have evolved and an enhanced version of this standard resource is long overdue Completely revised and updated the third edition continues the
