Successful Prevention and Youth Development Programs Laura Ferrer-Wreder,Håkan Stattin,Carolyn Cass Lorente,Jonathan G. Tubman,Lena Adamson,2012-02-02 From a European Perspective This book charts territory that is profoundly important and yet rarely fully understood The authors have attempted a task that has relevance to the widest possible range of professionals working with children and adolescents In describing and assessing the fields prevention and promotion they have performed an immense service to researchers in this field but also to practitioners across the spectrum from mental health nurses and doctors to teachers and psychologists from social work professionals to psychiatrists and youth counselors There are two other key elements that should be emphasized from the outset The first is that the approach in this book is truly multi disciplinary with the authors making a genuine attempt to draw upon knowledge and practice derived from all the relevant disciplines The second element which makes this book so important is that the authors have worked across countries to ensure that work in the field of intervention from both North America and from Europe should be included This is as welcome as it is refreshing There appear to be so many barriers to true collaboration between the two continents and so many examples of either North American to what is going on across the or European social scientists appearing blind border that the approach taken here should be wholeheartedly

Psychotherapy Michael B. Buchholz,Anssi Peräkylä,2021-11-02 Subject Guide to Books in Print ,1971 **Critical**

Existential-Analytic Psychotherapy Del Loewenthal,2021-03-25 This book is an introduction to critical existential analytic psychotherapy It has been written as a response to what is considered to be a crisis point in what is currently taken as psychotherapeutic knowledge A focus point is the relentless move in psychotherapy and psychotherapy trainings towards evidence based practice It is suggested that such developments can be usefully challenged if we are to consider Can starting with theory be a form of violence Should a primacy be given to practice Does reliance on empirical research mean we start from the wrong place From a critical existential analytic psychotherapeutic perspective the answer to all three of these questions is yes This perspective therefore is fundamentally different from what psychological therapists are increasingly purporting to do and further challenges other current notions from diagnosis and treatment to dominant discourses in psychology The aim of this book is to consider some ways in which the psychological therapies might be able to move away from the crisis mainly caused by what is currently wrongly being understood in terms of evidence based practice as the nature of psychotherapeutic knowledge Instead it is proposed that primacy be given to practice considering theories having implications rather than applications and privileging thoughtfulness with notions of research being seen more as cultural practices This book is based on a special issue of the European Journal of Psychotherapy Counselling
