panic sets in A THIN book is the ticket But perhaps a THINNER book Or the THINNEST book of all And how to pick one quickly that will be interesting Students teachers and librarians will love this handy little volume that describes 100 titles recommended for middle and high school students Readable attention grabbing all are less than 200 pages Each entry lists title and author provides information on characters plot and action and even suggests topics to cover in a book report

Librarians and teachers will appreciate the inclusion of curricular areas and readability indexes and students will find the appendix on approaches to writing a book report or booktalk a real gold mine Five indexes make locating the perfect title a breeze The genre index guides you to the kind of book you want to read The subject index lists dozens of subjects from adoption to writing divorce to time travel The readability index guides you to the quick reads or thoughtful novels If you have a favorite author or already know of a novel you want to read there is the author or title index Finally the curriculum index allows you to look for a book for a particular class *Reading Across the Life Span* Steven R. Yussen, M Cecil

Smith, 2012-12-06 One of the liveliest areas of research in the social sciences is reading Scholarly activity is currently proceeding along a number of different disciplinary lines addressing a multitude of questions and issues about reading A short list of disciplines involved in the study of reading would include linguistics psychology education history and gerontology Among the important questions being addressed are some long standing concerns How are reading skills acquired What are the basic components of reading skill How do skilled readers differ from less skilled ones What are the best ways to approach instruction for different groups of readers young beginning readers poor readers with learning problems and teenage and adult illiterates How can reading skill best be measured what standardized instruments and observational techniques are most useful The large volume of textbooks and scholarly books that issue forth each year is clear evidence of the dynamic nature of the field The purpose of this volume is to survey some of the best work going on in the field today and reflect what we know about reading as it unfolds across the life span Reading is clearly an activity that spans each of our lives Yet most accounts of it focus on some narrow period of development and fail to consider the range of questions that serious scholarship needs to address for us to have a richer understanding of reading The book is divided into four parts Title IV, Missing Children's Assistance Act United States.
