Tales Of The Ancient Horse:

Horses and Ponies Camilla De La Bédoyère, 2015-07-15 The graceful beauty and energy of horses have long attracted people. In fact, horses have been domesticated for thousands of years. Horse lovers will find everything they want to know in this high interest book including the differences between horses and ponies, what horse hooves are made of and the different gaits of a moving horse. Numerous equine vocabulary words are defined such as colt, filly, foal and mare. Readers will also learn about the evolution of horses and ponies, competitions and grooming and care. A bright design and varied text elements such as diagrams, activities and quizzes augment this informative volume. *Aberdeenshire Folk Tales* Grace Banks, Sheena Blackhall, 2013-11-01

The folklore of the north east has provided a rich tapestry for the tales within. From Celtic and Pictish origins, meet witches, selkies, smugglers, fairies, monsters, despicable rogues, riddles and heroes. Tragic events, spellbinding characters, humour, romance and clever minds are bound together by two well established storytellers living and working in the city and shire of Aberdeen. Some of the tales in this collection are based on historical fact while others are embedded in myth and legend. All the stories are set against the backdrop of this lovely and varied landscape: the silver city and surrounding farm lands, the forested and mountainous terrain through which the River Dee flows, the rolling gentler land surrounding the meandering River Don and the beautiful but sometimes forbidding Aberdeenshire coastline. Sheena and Grace have both been inspired in their storytelling and singing by the traveller, raconteur and balladeer Stanley Robertson.

The Power of the Herd Linda Kohanov, 2015-07-20 Linda Kohanov is beloved for her groundbreaking articulation of the way of the horse, an experiential wisdom known to riders for centuries but little studied or adapted to off horse use. Now Kohanov takes those horse inspired insights on the nonverbal elements of exceptional communication and leadership into the realms of our workplaces and relationships. Here we explore the benefits of nonpredatory power in developing assertiveness, fostering creativity, dealing with conflict and heightening mind/body awareness. In *A Brief History of Power*, the first part of this far reaching book, Kohanov profiles cultural innovators who employed extraordinary nonverbal leadership skills to change history, usually on horseback: Winston Churchill, George Washington, Alexander the Great and Siddhartha Gautama, the Buddha among others. She also draws on the behavior of mature horse herds as well as the herding cultures of Africa and Mongolia to debunk theories of dominance hierarchies, challenge ingrained notions of survival of the fittest and demonstrate the power of a consensual leadership in which governing roles are fluid. Kohanov then adapts these lessons into twelve powerful guiding principles we can all incorporate into our work and personal lives. Eloquent and provocative, this is horse sense for everyone who seeks to thrive in the herds we all run in: our communities, careers, families and friendships.

Horses Catherine Johns, 2006 The remarkable relationship between people and horses has been evoked in art from the beginning of the bond between them. In this beautifully illustrated book, Catherine Johns explores the horse in art from the ancient world to the modern era, from the Horse of Selene to Persian miniatures and prints by Dürer, Stubbs and Hokusai.

Thomas Donaghy,2014-06-30 Although there are many publications which discuss the history of the ancient horse few focus their attention on the origin and development of the various breeds Most publications examine the horse s contribution to human history through its role as transport facilitator and military machine and concentrate mainly on subjects such as the origin and development of chariot and cavalry equipment and changes in military tactics over time This book examines what happened when humans took the horse from the wild and domesticated it for their own use This focus was taken as it was felt that the understanding of the huge role which the horse played in human history can only be improved by gaining an understanding of the equally huge role which humans played when they took horses from the wild and through many hundreds of years of daily interaction cross breeding and training facilitated the development and spread of many breeds across the ancient world This book takes as its chronological focus the Greco Persian world of the second and first millennia BC This time period was selected for examination as it was during these two millennia that the vital role which the horse was to play in human history became fully apparent The second millennium BC saw the development of the vast chariot forces which were to form an important part of the armed forces of numerous lands from Mycenaean Greece in the West to India and China in the far East while the following millennium saw the gradual replacement of chariots with cavalry forces which continued to play a vital role in military warfare right up until the beginnings of the twentieth century AD Part One traces the history of the horse from its evolution to the development and spread of chariot and cavalry forces Parts Two and Three examine the famous horse breeding regions of the ancient world and through an analysis of archaeological iconographical and literary evidence attempts to determine why these regions were famed for horse breeding and what were the physical characteristics and given attributes of the various breeds *Novels and Tales of the Author of Waverley.
