A Birder's Guide to Wyoming Oliver K. Scott, 1992 **Geologic and Historic Guide to the Beartooth Highway, Montana and Wyoming** Harold Lloyd James, 1995 **Protecting Yellowstone** Michael J. Yochim, 2013-04-15 Yellowstone National Park looks like a pristine western landscape populated by its wild inhabitants bison grizzly bears and wolves But the bison do not always range freely snowmobile noise intrudes upon the park's profound winter silence and some tourist villages are located in prime grizzly bear habitat Despite these problems the National Park Service has succeeded in reintroducing wolves allowing wildfires to play their natural role in park forests and prohibiting a gold mine that would be present in other more typical western landscapes Each of these issues bison snowmobiles grizzly bears wolves fires and the New World Mine was the center of a recent policy making controversy involving federal politicians robust debate with interested stakeholders and discussions about the relevant science Yet the outcomes of the controversies varied considerably depending on politics science how well park managers allied themselves with external interests and public thinking about the effects of park proposals on their access and economies Michael Yochim examines the primary influences upon contemporary national park policy making and considers how those influences shaped or constrained the final policy In addition Yochim considers how park managers may best work within the contemporary policy making context to preserve national parks

Ecology and Management of Larix Forests, 1995 *History of Montana. 1739-1885* Michael A. Leeson, 1885 **Proceedings** James K. Brown, Robert W. Mutch, Charles W. Spoon, Ronald H. Wakimoto, 1996-07 This symposium held one decade after Missoula Montana's first major wilderness fire conference examined past lessons understanding constraints programs posters Maps charts tables **General Technical Report INT.**, 1995 **National Parks**, 1996 **Scorched Earth** Rocky Barker, 2013-09-24 In 1988 forest fires raged in Yellowstone National Park destroying more than a million acres As the nation watched the land around Old Faithful burn a longstanding conflict over fire management reached a fever pitch Should the U.S. Park and Forest Services suppress fires immediately or allow some to run their natural course When should firefighters be sent to battle the flames and at what cost In *Scorched Earth* Barker an environmental reporter who was on the ground and in the smoke during the 1988 fires shows us that many of today's arguments over fire and the nature of public land began to take shape soon after the Civil War As Barker explains how the government responded to early fires in Yellowstone and to private investors in the region led ultimately to the

protection of 600 million acres of public lands in the United States Barker uses his considerable narrative talents to bring to life a fascinating but often neglected piece of American history *Scorched Earth* lays a new foundation for examining current fire and environmental policies in America and the world Our story begins when the West was yet to be won with a colorful cast of characters a civil war general and his soldiers America's first investment banker railroad men naturalists and fire fighters all of whom left their mark on Yellowstone As the truth behind the creation of America's first national park is revealed we discover the remarkable role the U S Army played in protecting Yellowstone and shaping public lands in the West And we see the developing efforts of conservation's great figures as they struggled to preserve our heritage With vivid descriptions of the famous fires that have raged in Yellowstone the heroes who have tried to protect it and the strategies that evolved as a result Barker draws us into the very heart of a debate over our attempts to control nature and people This entertaining and timely book challenges the traditional views both of those who arrogantly seek full control of nature and those who naively believe we can leave it unaltered And it demonstrates how much of our broader environmental history was shaped in the lands of Yellowstone *Tension on the String...* Mark R. Baker, 2012-10-08 There are those among us hunters who revel in the minimalistic pursuit of wild animals using the most rudimentary of tools and seeking out the whole of the experience up close and personal and as intimately involved with our prey as we possibly can be This experience rewards us with the greatest sense of accomplishment and challenge and connects us directly with our forefathers and ancient pasts It too cements our admiration and awe for the wild places and animals we share this journey with along the way Classic Bowhunting is our vehicle in this journey a completely different pathway of regression rather than the technological domination over mother nature and our inadequacies in seeking and taking our prey This acceptance of the challenges enhances our immersion and participation into the wild and natural world and replenishes our spirit Enjoy adventures with real stick and string appeal in some of the wildest country in North America Beaverhead-Deerlodge National Forest (N.F.), Revised Land and Resource Management Plan ,2005 **Water-resources Investigations Report** ,1999
