egoism and competitiveness At the same time Walton argues that the storylines despite much comic invention caricature and exaggeration create resonances which hold up a distorted but highly revealing mirror to the multiple subgroups of people who ride motorcycles for pleasure The author also demonstrates how the implied biker readers of this subgenre confront comic representations of themselves which repeatedly undermine any positive self image they may possess Yet the comics are also seen to offer valuable insights into much broader cultural concerns ranging from subculture consumption habits in authenticity taste freedom risk and delinquency without forgetting other key aspects of cultural studies like class race and ethnicity gender sexuality and ecocriticism
