Manipulation of Flowering presents the edited proceedings of the 45th University of Nottingham Easter School in Agricultural Science held at Sutton Bonington in England on April 7-10 1986 This book is organized into eight sections The first main section examines the measurement and prediction of flowering and analyzes how best to measure flowering when the aim is either to assist physiological interpretations or construct predictive models The following sections explore juvenility the nature of determination in meristems vernalization photoperiodic induction and flower evocation and initiation

and development to anthesis Each of the main sections provides an analysis of the flowering problems and a critical view of how to achieve a better understanding and use of the physiology of flowering This book will be of interest to crop researchers plant physiologists geneticists and others interested in understanding flowering manipulation The Physiology of Flowering Jean-Marie Kinet,2018-01-10 The present work is organised such that the whole phenomenon of flowering is divided into two major steps 1 the initiation of flower primordia and 2 The development of these primordia into mature flowers until anthesis With this volume aiming to provide a balanced account of the most important and recent contributions in all aspects of the subject *Flower Breeding* Umang Mehrotra,2025-01-03 Flower Breeding Techniques and Innovations is a comprehensive guide for anyone fascinated by flowers from high school students to professional biologists We delve into the world of flower breeding discussing various species their evolution and breeding techniques Our book is divided into two parts the first addresses breeding program issues while the second focuses on crop specific breeding and genetics We emphasize flowering plants the dominant plants on earth and offer a balanced selection of botanical material This book is designed to be accessible to all eliminating controversial categories and exposing readers to current thinking on plant classification Whether you are an artist ecologist or horticulturist you will find valuable insights and practical information in our pages **The Physiology of Flowering** Georges Bernier,Jean-Marie Kinet,Roy M.
