**The Formation of National States in Western Europe** Gabriel Ardant, David H. Bayley, 1975 **The Formation of National States in Western Europe** Social Science Research Council (U.S.). Committee on Comparative Politics, 1975 Nine essays examine and evaluate in relationship with current political and economic conditions the events processes preconditions and developments between 1500 and 1900 which brought about the establishment of powerful nation states *The State, Identity, and the National Question in China and Japan* Germaine A. Hoston, 2021-02-09 The first decades of the twentieth century witnessed an explosion of nationalist sentiment in East Asia as in Europe This comprehensive work explores how radical Chinese and Japanese thinkers committed to social change in this turbulent era addressed issues concerning national identity social revolution and the role of the national state in achieving socio economic development Focusing on the adaptation of anarchism and then Marxism Leninism to non European contexts Germaine Hoston shows how Chinese and Japanese theorists attempted to reconcile a relatively new appreciation for the nation state with their allegiance to a vision of internationalist socialist revolution culminating in stateless socialism Given the influence of Western experience on Marxism Chinese and Japanese theorists found the Marxian national question to be not merely one of whether the working man has no country but rather the much more fundamental issue of the relative value of Eastern and Western cultures Marxism argues Hoston thus placed native Marxists in tension with their own heritage and national identity The author traces efforts to resolve this tension throughout the first half of the twentieth century and concludes by examining how the tension persists as Chinese and Japanese dissidents seek identity affirming modernity in accordance with the Western democratic model

*Securitising Decolonisation* Julius Heise, 2024-05-23 With the right to petition the United Nations the Ewe and Togoland unification movement enjoyed a privilege unmatched by other dependent peoples Using language conveying insecurity the movement seized the international spotlight ensuring that the topic of unification dominated the UN Trusteeship System for over a decade Yet its vociferous securitisations fell silent due to colonial distortion leaving unification unfulfilled thus allowing the seeds of secessionist conflict to grow At the intersection of postcolonial theory and security studies Julius Heise presents a theory driven history of Togoland's path to independence offering a crucial lesson for international statebuilding efforts

**Geopolitics, Geography and Strategic History** Geoffrey Sloan, 2017-02-17 This volume examines geopolitics by looking at the interaction between geography strategy and history This book addresses three interrelated questions why does the geographical scope of political objectives and subsequent strategy of states change How do these changes occur Over what period of time do these changes occur The theories of Sir Halford Mackinder and Nicholas Spykman are examined in order to provide an analytical narrative for five case studies four historical and one contemporary Taken together they offer the prospect of converting descriptions of historical change into analytic explanations thereby highlighting the importance of a number of commonly overlooked variables In addition the case studies will illuminate the challenges that states face when attempting to change the scope of their foreign policy and geo strategy in response to shifts in the geopolitical reality This book breaks new ground in seeking to provide a way to understand why and how the geographical scope of political objectives and subsequent strategy both expands and contracts This book will be of much interest to students of geopolitics strategic studies military history and international relations
