

The Importance of Tear Function

- Without normal tears, the ocular surface can become ulcerated and infected (with bacteria, viruses, or fungi), pigmented and/or scarred. Infected ulcerations can progress to ocular perforations, and excessive pigmentation or scarring can lead to blindness

The Function Of Tears:

The Function of Emotions Heather C. Lench, 2018-04-20 This eye opening text brings together research from behavioral science neuroscience and other fields to make a cogent case for emotions acting as a practical framework for living our lives. A dozen basic emotions are analyzed in terms of what causes them how they change thoughts and behaviors and the functional value of these responses. Contrary to the common idea of emotions as fleeting occurrences they are shown as having the potential for lasting impact on moods thoughts and behaviors. Intriguing findings assert that even negative emotions such as jealousy and anger can have positive results such as promoting positive goals and can lead to successful outcomes in overarching domains such as cognition and well being. Among the topics covered: How fear and anxiety promote attention and protective behavior. How sadness and depression promote analysis of complex problems in goal pursuits. How happiness promotes processing and attention. How love promotes relationship development and goal attainment. How pride promotes sense of self and identity. The Function of Emotions is a valuable resource for students researchers and clinicians interested in the psychology and neuroscience of emotions and their function in everyday life. It will attract an interested readership among professionals working in such fields as education management and leadership social work and psychotherapy.

The Valley of Tears (eBook) Nola Shaw, 2002-07-01 THE VALLEY OF TEARS is written against the background of Nola's deep commitment to Jesus Christ sensitive concern for people in pain and careful study and wide experience as a bereavement support group facilitator. The thoughtful words and guidance in this book will provide valuable comfort for the bereaved and bring a message of hope to anybody who is grieving the loss of a loved one.

Biology and Emotion Neil McNaughton, 1989-07-13 There have been rapid and important advances in all behavioural sciences in recent years. These advances have in one sense been very diverse and specialised sufficiently so for a scientist to quickly lose touch with the current concerns of even neighbouring researches but in some cases the developments have seemed also to be fundamental and perhaps convergent with implications across a range of disciplines. In either case there is a real and increasing need for scientists to communicate their discoveries and to a new generation of students in their own. Problems in the Behavioural Sciences is designed to meet this need. The books are by leading researchers and deal with problems or topics that are attracting a special current interest. The central subject matter is psychology but many of the issues will need to be pursued across existing and fluid boundaries between psychology and other behavioural sciences like physiology pharmacology sociology ethology and linguistics. The central idea of this book is that biology and particularly evolution provides the best starting point for the study of emotion. In particular it is argued that all the conventional properties of emotion such as expression feeling and motivation can be considered in a scientific manner and useful conclusions drawn therefrom. The major part of the book involves the application of this central idea to a wide variety of the phenomena of emotion. The resultant review should be useful as an undergraduate text and so explanations in the text are aimed at the non

specialist At the same time the specific conclusions drawn in the book should be of interest to all those who do research on emotion and particularly those who need a solid framework on which to base interdisciplinary studies Biology and Emotion differs from the majority of books in the field in that it does not present a specific theory of emotion The material covered is therefore more general than is often the case and has not been selected to support a particular point of view It combines an organised yet artheoretical approach with coverage of both animal and human emotions **De Die Iudicii** Graham D.

Vingerhoets,Randolph R. Cornelius,2012-12-06 Crying is a typical human expression of emotion Surprisingly until now little scientific attention has been devoted to this phenomenon Many textbooks on emotion fail to pay attention to it and in scientific journals there are hardly any contributions focusing on this behavior In contrast there is much interest from the lay public allowing pseudo scientists to formulate theories that have little or no scientific basis Is there any evidence in support of statements that crying is healthy or that not crying may result in toxification How do people react to the crying of others Is crying important for the diagnosis of depression and if so how This book aims to fill this gap in scientific literature Crying is discussed from several perspectives and specific attention is given to methodological issues and assessment Each chapter provides a review and a summary of the relevant scientific literature **The Many Faces of Grief (eBook)** Nola

Shaw,2010-09-20 Grief is a part of the life cycle of every person Loss loneliness hurt and pain are experienced by every person during different stages of his or her life Grief can seem unbearable at times but it is a necessary process which has the potential to heal the heart of the bereaved THE MANY FACES OF GRIEF will encourage comfort and help you to realize that the greatest Healer of all Jesus Christ cares for you in a special way He walks with you as you travel through your personal journey of pain and grief Nola Shaw uses real life stories to address the different types of grief such as Bereavement Divorce Old Age Trials and Tribulation Abuse THE MANY FACES OF GRIEF offers hope and healing for grief stricken hearts

The Door on Every Tear Neil Carpathios,2020-01-29 To get at the mysterious inner essence of human experience requires an almost savage preoccupation with attentiveness By keenly looking outward then corkscrewing deeply inward Neil Carpathios attempts to locate and understand the origin of all tears What is the function of sadness How can one know delight in a world of conflict pain and loneliness How do birth and death overlap in this miraculous place Clues are uncovered to these and other questions in surprising moments such as when the poet eavesdrops on two angels hovering in

the corner of his dying mother's hospital room or when a homeless friend describes the art of homelessness Ghosts are everywhere as are the flesh and blood people that make life worth living In poems of rare and raw honesty and directness Carpathios invites the reader into the beautiful and awful silences of his heart **Adler's Physiology of the Eye** Leonard A.
